FLORIDA includes the peninsula of Florida, which extends from the northern boundary of the state, in a direction S. S. E. for 350 mls., between the Atlantic Ocean and the Gulf of Mexico; and West Florida, a narrow region extending along the Gulf of Mexico to the River Perdido, 350 mls. west of the Atlantic coast-line. On the north the state boundary separates it from Georgia and Alabama, while on all other sides it is surrounded by water. The area of the state is 59,268 sq. mls., or 37,931,520 acres, of which 46,000 sq. mls. are embraced in the peninsula. The latter has a nearly uniform width of a little more than a hundred mls., and extends from 25° to 30° N. lat.

Surface.—No part of the state rises to an elevation of more than 250 feet above the sea level. The greater part of the peninsula is but a few feet above high tide. The land which forms it slopes eastward and westward from a central elevation about 175 feet high, composed of a porous limestone somewhat older than the miocene group, and of a friable sand-rock. This "Back Bone Ridge," as it has been called, is about fifty mls. wide, and extends as far south as Charlotte Harbor. Low, swampy tracts extend E. and S. of it, with a muddy or sandy surface soil. Part of this is a vast field of coarse saw grass, and aquatic plants known as the Everglades; they cover an area of about 4,000 sq. mls. Between them and the Gulf of Mexico extends a vast forest of cypress about one-half the size of the Everglades, and known as the Big Cypress. Most of this region is wholly uninhabited and almost unexplored. The Atlantic and the Gulf coast are covered by forests of cypress, live-oak and cedar on the low lands, and of pine on the sand ridges. The whole of the southern portion of the peninsula lies on a modern coral formation, and has been formed by the addition of successive crescent-shaped reefs around the extremity of the "Back Bone Ridge." About seven of these reefs have been noted S. of Lake Okee Chobee, and the process is still going on. The so-called "Keys" (from an Indian word signifying an island) are the summits of a reef which is constructing under similar laws. West Florida is low and swampy within ten or twenty mls. of the coast-line, when it rises into a tertiary plateau limestone, the commencement of the slope, which, slowly ascending, reaches the foot of the Appalachians in Ga.

Rivers and Lakes.—The peninsula of Florida presents some singular contrasts in the arrangement of its inland waters. The principal river is the St. Johns. This is a sluggish, tortuous stream about 250 miles in length, and from two to three miles in width as far up as Lake George. Its current is about one mle. an hour and the slope of its bed so little that at Lake Monroe, about 140 mls. above its mouth, it is but three feet six inches above the sea-level. Its course until within 15 mls. of its mouth is nearly due north, contrasting in this respect with the other large streams of our country. Its only important tributary is the Oklawaha. They both rise in a chain of ponds, lakes, and swamps on the northern limit of the Everglades. On the Gulf coast the Hillsborough R. falls into Tampa B.; N. of it is the Withlacooche; and the Suwannee, with its two main branches, drains the N. portion of the peninsula. West Florida is traversed by the Apalachicola, a handsome stream, navigable for steamboats throughout its whole course in this state. The slight elevation of the peninsula has led to the formation of numerous lakes and ponds. The largest is Lake Okee Chobee, 1,200 sq. mls. in area, but with an average depth of but 12 feet. Lake Kissimmee, on the river of that name, and Lake George, on the St. John, are next in size. Lake Orange is noted for the extensive and beautiful wild orange groves that ornament its shores. Alligator lake in the north is remarkable for its varying size, almost disappearing in the dry season, and becoming several mls. in diameter after the summer rains. Florida is famous for the number, size, and variety of its springs. The largest are the Silver Spring, in Marion co., and the Wakulla Spring, in Wakulla co. Each of these throws out sufficient water to form a small river. There are also many mineral and thermal springs, among which, the White Spring, Hamilton co.; Orange Spring, Marion co., and Greene Cove Spring and the Warm Sulphur Spring, Lake Monroe, with many others on the St. Johns, are best known.

Climate and Vegetation.—The climate of Fla., especially of the peninsula, partakes more of the tropical character than that of any other state. The average summer temperature is 80° Fah.; the winter 65°, rising at Key West to 70°. In the interior the summer heats are debilitating, but on the coast they are tempered by the sea breeze. Frosts occur in all parts, but very rarely; on the south-eastern coast, where the climate is most equable, once in two or three years. In summer the prevailing winds are from the E. and S.; in winter, from the N., N. E. and N. W. The annual rain-fall averages 55 inches. Three-fourths of this falls between April and October, which is the rainy season. The winter is comparatively dry, and is equable and bracing. Indeed, the winter months in Fla. offer generally such delightful and healthful weather that the state is visited annually by many thousands of northern visitors in search of pleasure and health.

The vegetation of the peninsula is varied. The low saw palmetto and tall and graceful cabbage palm (both species of chamærops); the Spanish moss, trailing from the mighty limbs of live oak and cypress; the mangrove, clothing and concealing with its dense growth the shore islands, and the groves of wild orange trees, strongly arrest the attention of the visitor from the north. The dry sandy tracts are occupied by forests of red pine, while the interior limestone ridge produces hickory, white oak, gum and other hard woods.

The animal life is abundant. The manatee or sea cow was formerly frequent, but is now almost extinct. Alligators are numerous. Deer, bear, panthers and wild turkeys abound. Parroquets, curlews, and other birds of brilliant plumage enrich the woods and waters. The mullet, river trout, pompano and other excel-

least fish swarm in the rivers and lagoons. The green turtle is caught on the sea-shores, and the gopher in the interior. Scorpions, centipedes, stinging insects, and venomous snakes are also not rare, but serious accidents from them are infrequent.

Population.—The population of the state was, in 1830, 34,730; in 1840, 54,477; in 1850, 87,455; in 1860, 140,424, and in 1870, 187,748, including 96,057 whites, 91,689 colored persons and 27 Indians. The natives of the United States consisted of 91,395 whites and 91,384 colored persons. The native population of the state numbered 182,781, the foreign born population 4,967, inclusive of 1,155 Cubans, 597 Germans, 399 Englishmen and 737 Irishmen. Of the population 10 years old and over, which numbered 131,119, there were engaged in the useful occupations, 60,703; and of these were engaged in agriculture, 42,492; in professional and personal services, 10,897; in trade and transportation, 3,023, and in manufactures and mechanical industries, 4,291.

Agriculture.—Much of the soil of Fla. is not promising in appearance. The Everglades and Cypress swamps are worthless to the farmer, unless they are drained. The ridge of sand and decomposed limestone along the southern coast from Cape Sable to Indian R. is capable of cultivation and offers a good field for the introduction of tropical plants, especially coffee. Its area is estimated at 7,000,000 acres.

The northern portion of the peninsula consists of "scrubs" (dry, sterile tracts covered with thickets of black-jack, oak and spruce), pine lands and hammocks. The latter are rich river bottoms, densely timbered, and often yield from 70 to 80 bushels of corn to the acre with imperfect tillage. The pine lands are of deep white sand and are but moderately productive, unless they are thoroughly manured. The eastern part of Fla. has on the whole less fertile lands than the western and middle.

The chief staples of the state are Indian-corn and cotton. Of the former 2,225,056 bush. were produced in 1870; of the latter, 39,789 bales. The other farming productions were: 114,204 bush. oats; 10,218 bush. Irish pot's.; 789,456 bush. sweet pot's.; 401,687 lbs. rice; 157,405 lbs. tobacco; 37,562 lbs. wool; 952 hhds. sugar, and 344,339 galls. of cane molasses. The live stock had a value of $5,212,157, and comprised 11,902 horses, 8,835 mules and asses, 61,922 milch cows; 322,701 other cattle; 26,509 sheep, and 158,908 swine.

The farms had 736,172 acres of improved land, 1,425,786 acres of woodland, and 211,583 of unimproved land. Their cash value was $9,947,920, and the value of all farm productions, including additions to stock, etc., $8,909,746. The orchard products had a value of $53,639, and the slaughtered animals of $520,966.

Manufactures.—The value of the products of manufactures according to the last census was $1,685,403; of materials consumed therein, $2,330,873; of capital invested, $1,679,930. The amount of wages paid was $989,930, and the number of hands employed, in the 659 manufactories, 2,749. The principal productions were flour and meal ($508,388), and sawed lumber ($2,235,780).

Commerce and Railroads.—The commerce of Fla. is limited to the importation of commodities required for home consumption, and the exportation of its products, mostly lumber, cotton, sugar, etc. The direct foreign commerce is unimportant. The state has seven ports of entry, viz.: Fernandina, St. Johns, St. Augustine, Key West, St. Marks, Apalachicola and Pensacola. Their registered, enrolled and licensed vessels numbered 244, with 15,780 tons of burden. The foreign imports had a value of $267,271, and the domestic exports of $1,662,276.

In 1852 Fla. had 402 mls. of railroads, and in 1872, 466 mls. The principal lines are the Jacksonville, Pensacola & Mobile R. R., connecting Lake City with Chattahoochee, and with branches to Monticello & St. Marks, 176 mls. long, and the Florida R. R., from Fernandina to Cedar Keys, 152 mls.

Education.—In 1870 Fla. had a total of 377 schools; 226 of which were public and had 265 teachers and 10,132 pupils. The 10 classical, professional and technical schools or academies had 32 teachers and 580 pupils.

The 23 newspapers published in the state in 1870 had a circulation of 10,545.

Wealth, Taxation and Debt.—The last census reports the estimated value of real and personal property as high as $44,163,655, but the assessed value is $32,480,043; of which real estate embraced $20,197,601, and personal property $12,283,152. The state taxes in 1870 amounted to $248,768; the county taxes to, $168,389, and the town and city taxes to $79,009.

The state debt in that year was $3,474,535; the county debts, $443,041, and the town and city debts, $454,100. The state debt has since then greatly increased, and was estimated in 1872 at $5,307,805, or over $28 per head of the population.

Government.—The new state constitution was adopted in February, 1868. It provides that slavery shall not exist in the state; that there shall be no civil or political distinction on account of color, and that the state shall ever remain a member of the American Union. The Governor and Lieutenant-Governor are chosen by the qualified electors and hold their offices for four years. The Secretary of State, Treasurer, Comptroller, Attorney-General, Superintendent of Public Instruction, Commissioner of Immigration and Adjutant-General are appointed by the Governor and confirmed by the Senate.

The members of the Assembly, 53 in number, are chosen biennially, and the 24 Senators for a term of four years. The sessions of the Legislature are annually held on the first Tuesday after the first Monday in January and may extend to 60 days. Special sessions convened by the Governor cannot sit over 20 days. Every male of 21 years of age and over, who is a citizen of the United States, or who shall have declared his intention of becoming such, and who shall have resided in Fla. for one year and in the county for six months, next preceding the election at which he shall offer to vote, shall be deemed a qualified elector.

The judicial power of the state is vested in a Supreme Court, Circuit Courts, County Courts and justices of the peace. The Supreme Court consists of a Chief Justice and two Associate Justices, who hold their offices for life or during good behavior. They are appointed by the Governor and confirmed by the Senate. The Supreme Court holds three sessions annually at the state capitol. It has appellate jurisdiction. There are 7 Circuit Judges, appointed by the Governor and confirmed by the Senate, who hold their offices for 8 years, and the state is divided into 7 judicial districts. The judge must reside in the district to which he is assigned. The Circuit Courts have original jurisdiction in all cases in which the Supreme Court has appellate jurisdiction, and they have final jurisdiction in all civil cases arising in the county courts, in which the amount of controversy is $100 and more, and in all cases of misdemeanor. The county judges are also appointed by the Governor and confirmed by the Senate, and each judge holds his office for four years.

The state capital is Tallahassee.

Florida is divided into the following 39 counties: Alachua, Baker, Bradford, Brevard, Calhoun, Clay, Columbia, Dade, Duval, Escambia, Franklin, Gadsden, Hamilton, Hernando, Hillsborough, Holmes, Jackson, Jefferson, La Fayette, Leon, Levy, Liberty, Madison, Manatee, Marion, Monroe, Nassau, Orange, Polk, Putnam, Santa Rosa, St. John's, Sumter, Suwanee, Taylor, Volusia, Wakulla, Walton and Washington.

The last census report ennumerates the following incorporated cities: Jacksonville, Pensacola, Tallahassee and St. Augustine.

Florida, p. v. in Madison co., Ind., on the Pittsburgh, Cincinnati & St. Louis R. R., 4¼ mls. N. N. W. of Anderson. Pop. about 100.

Florida, tn. in Berkshire co., Mass. Pop., 1,322.

Florida, p. v. in the above tn., on the Troy & Greenfield R. R., 5 mls. E. of N. Adams. It lies near the W. end of the Hoosac Tunnel.

Florida, p. v. in Monroe co., Mo., 12 mls. from Monroe. Pop., 120.

Florida, tn. in Montgomery co., N. Y. Pop., 3,002.

Florida, p. v. in Orange co., N. Y., on the Erie R. R., 5 mls. S. of Goshen. Pop., 459.

Florida, p. v. in Henry co., Ohio, on the Maumee R., 2½ mls. S. of Okolona.

Florida Keys, a chain of coral islands and reefs, extending in a S. W. direction from the Key Biscayne B. for 230 mls. They are low and flat, but possess a fertile soil. The largest among them are Elliott's Key, Cayo Largo, Plantation Key, Matacumba Key, Long Key, Estella Key, Big Pine Key, Hueso Key and Key West.

Florin, p. o. in Sacramento co., Cal.

Floris, p. v. in Davis co., Iowa, on the Chicago, Rock Island & Pacific R. R., Southwest Branch, 28 mls. W. S. W. of Fairfield.

Florisant, p. v. in St. Louis co., Mo., 3 mls. from Bridgeton.

Florissant, p. o. in Park co., Colo.

Flourtown, p. o. in Montgomery co., Pa.

Flower Creek, p. o. in Pendleton co., Ky.

Flower Creek, p. o. in Oceana co., Mich.

Flower Dale, p. o. in Barbour co., Ala.

Flowerdale, p. o. in Richardson co., Nebr.

Flowerfield, tn. in St. Joseph co., Mich. Pop., 1,538.

Flowerfield, p. v. in the above tn., near a branch of the Michigan Southern R. R., 8 mls. N. of Three Rivers. Pop., 210.

Flower's Place, p. o. in Smith co., Miss.

Flowery Branch, p. o. in Hall co., Ga.

Flowerville, p. o. in White co., Ind.

Floyd, co. in Ga., N. W. part. Area, 510 sq. mls. Pop., 17,230; in 1860, 15,195. It borders in the W. on Ala., and is traversed from E to W. by the Etowah R., which receives the Oustanaula R. from the N. The surface is rolling and hilly; the soil of the valleys very productive. Rome is the co. seat. Agr. productions in 1870: Wheat, 96,464 bush; rye, 130 bush.; Indian-corn, 245,091 bush.; oats, 43,229 bush.; Irish pot's, 6,503 bush.; sweet pot's, 14,249 bush.; cotton, 3,182 bales; butter, 120,314 lbs.; hay, 515 tons. Cash value of farms, $2,331,144. Total, estimated, value of all farm productions, including additions to stock, etc., $975,438. Value of manufactures, $1,050,620.

Floyd, tn. in Warren co., Ill. Pop., 1,146.

Floyd, co. in Ind., S. part. Area, 148 sq. mls. Pop., 23,109; in 1860, 20,183. A range of hills trends through the co. from N. to S., terminating on the bank of the Ohio R., which forms the S. E. boundary. The Louisville, New Albany & Chicago R. R. intersects the co. New Albany is the co. seat. Agr. productions in 1870: Wheat, 47,472 bush.; rye, 988 bush.; Indian-corn, 124,807 bush.; oats, 66,110 bush.; Irish pot's, 71,634 bush.; sweet pot's, 5,407 bush.; butter, 93,243 lbs.; hay, 4,569 tons. Cash value of farms, $2,697,946. Total, estimated, value of all farm productions, including additions to stock, etc., $478,138. Value of manufactures, $4,038,313.

Floyd, tn. in Putnam co., Ind. Pop., 1,269.

Floyd, co. in Iowa, N. part. Area, 555 sq. mls. Pop., 10,768; in 1860, 3,744. Red Cedar R. and Shell Rock R. drain the co. The surface is generally level and the soil fertile. Charles City is the co. seat. Agr. productions in 1870: Wheat, 565,990 bush.; rye, 491 bush.; Indian-corn, 310,119 bush.; oats, 293,591 bush.; Irish pot's, 42,606 bush.; wool, 24,938 lbs.; butter, 251,718 lbs.; hay, 18,517 tons. Cash value of farms, $3,807,985. Total, estimated, value of all farm productions, including additions to stock, etc., $1,609,631. Value of manufactures, $283,668.

Floyd, tn. in Floyd co., Iowa. Pop., 1,328.

Floyd, p. v. in the above tn., on the Illinois Central R. R., 6 mls. N. N. W. of Charles City.

Floyd, co. in Ky., E. part. Area, 740 sq. mls. Pop., 7,877; in 1860, 6,388. The surface is uneven; pasture land predominates. Stone coal is found abundantly. On the S. border are spurs from the Cumberland Mts. The W. Fork of the Big Sandy intersects the co. from N. to S. E. Prestonsburgh is the co. seat. Agr. productions in 1870: Wheat, 8,621 bush.; rye, 1,162 bush.; Indian-corn, 338,009 bush.; oats, 26,325 bush.; Irish pot's, 17,795 bush.; sweet pot's, 6,007 bush.; butter, 57,168 lbs.; hay, 442 tons. Cash value of farms, $712,547. Total, estimated, value of all farm productions, including additions to stock, etc., $330,044. Value of manufactures, $2,504.

Floyd, p. o. in Carroll parish, La.

Floyd, tn. in Oneida co., N. Y. Pop., 1,209.

Floyd, p. v. in the above tn., 2½ mls. W. of Stittville. Pop., 95.

Floyd, co. in Va., S. W. part. Pop., 9,824; in 1860, 8,236. It extends along the western declivity of the Blue Ridge and includes the head waters of Little R., a tributary of New R. The surface is uneven and greatly diversified by hills. Much of the land affords excellent facilities for grazing and stock raising. Floyd Court House is the co. seat. Agr. productions in 1870: Wheat, 29,410 bush.; rye, 41,515 bush.; Indian-corn, 112,789 bush.; oats, 93,692 bush.; Irish pot's, 16,033 bush.; sweet pot's, 136 bush.; tobacco, 157,467 lbs.; butter, 119,180 lbs.; hay, 3,646 tons. Cash value of farms, $1,000,650. Total, estimated, value of all farm productions, including additions to stock, etc., $582,824. Value of manufactures, $151,228.

Floyd, tn. in Scott co., Va. Pop., 1,171.

Floyd Court House, p. v. and the co. seat of Floyd co., Va., 15 mls. from Christiansburgh and 180 mls. W. S. W. of Richmond. Pop., 321.

Floyd's Creek, p. o. in Adair co., Mo.

Floyds Forks, p. o. in Jefferson co., Ky.

Floyd's Knobs, p. o. in Floyd co., Ind.

Floydsburg, v. in Oldham co., Ky., 35 mls. W. N. W. of Frankfort.

Flukes, v. in Botetourt co., Va., on the Virginia & Tennessee R. R., 18 mls. W. of Liberty.

Flushing, tn. in Genesee co., Mich. Pop., 1,919.

Flushing, p. v. in the above tn., 10 mls. N. W. of Flint. Pop., 687.

Flushing, tn. in Queens co., N. Y. Pop., 14,650.

***Flushing,** p. v. in the above tn., on the Flushing & North Side R. R., 10 mls. E. of New York; has large nurseries and is the seat of several educational establishments. Pop., 6,322. Three newspapers. Steamboats ply regularly between New York and Flushing.

Flushing, tn. in Belmont co., Ohio. Pop., 1,484.

Flushing, p. v. in the above tn., 14 mls. S. W. of Cadiz.

Flushing, v. in Bucks co., Pa., on the Neshaminy Cr., 20 mls. N. E. of Philadelphia.

Fluvanna, p. v. in Chautauqua co., N. Y., at the S. E. extremity of Chautauqua Lake, 4¼ mls N. W. of Jamestown.

Fluvanna, co., in Va., E. central part. Area about 175 sq. mls. Pop., 9,875; in 1860, 10,353. It is bounded on the S. by the James R. and drained by Ravanna R. and numerous other small tributaries of the James. The surface is uneven and broken. The soil of the river

valleys is excellent; of the uplands barren. Palmyra is the co. seat. Agr. productions in 1870: Wheat, 77,486 bush.; rye, 265 bush.; Indian-corn, 126,448 bush.; oats, 67,247 bush.; Irish pot's, 3,142 bush.; sweet pot's, 1,905 bush.; tobacco, 894,023 lbs.; butter, 61,397 lbs.; hay, 454 tons. Cash value of farms, $1,306,339. Total, estimated, value of all farm productions, including additions to stock, etc., $416,242. Value of manufactures, $276,503.

Fly Creek, p. v. in Otsego co., N. Y., 3 mls. W. N. W. of Cooperstown.

Fly Mountain, p. v. in Ulster co., N. Y., on the Delaware & Hudson Canal, 4¼ mls. S. W. of Rondout.

Flynn, tn. in Sanilac co., Mich. Pop., 131.

Flynn's Lick, p. o. in Jackson co., Tenn.

Fly Summit, p. o. in Washington co., N. Y.

Fogelsville, p. v. in Lehigh co., Pa., 3 mls. N. W. of Trexlertown on the Catasauqua & Fogelsville R. R.

Folker, tn. in Clark co., Mo. Pop., 824.

Folkville, p. o. in Morgan co., Ala.

***Folsom City,** p. v. in Sacramento co., Cal., on the Sacramento Valley R. R., 23 mls. from Sacramento and 25 mls. from Shingle Springs. One newspaper.

Folsomdale, p. v. in Wyoming co., N. Y., 6¼ mls. S. S. E. of Alden on the Buffalo Branch of the Erie R. R.

Folsomville, p. o. in Warrick co., Ind.

***Fonda,** p. v. and the co. seat of Montgomery co., N. Y., on Mohawk R., the Erie Canal and the Central R. R., 43¼ mls. W. of Albany and 51¼ mls. E. of Utica. Pop., 1,092. One newspaper. It is the terminus of the Fonda, Johnstown & Gloversville R. R.

Fond du Lac, tn. in Tazewell co., Ill. Pop., 889.

Fond du Lac, p. o. in Tazewell co., Ill.

Fond du Lac, tn. in St. Louis co., Minn. Pop., 800.

Fond du Lac, p. v. in the above tn., near the mouth of the St. Louis R. and on the Northern Pacific R. R., 10 mls. S. W. of Duluth.

Fond du Lac, tn. in Steele co., Minn. Pop., 800.

Fond du Lac, co. in Wis., E. part. Area, 760 sq. mls. Pop., 46,273; in 1870, 34,154. The surface consists of prairie lands; the soil is fertile. A portion of Lake Winnebago extends into the N. E. part. The Milwaukee & St. Paul R. R. runs through the S. E. part. Fond du Lac is the co. seat. Agr. productions in 1870: Wheat, 1,615,266 bush.; rye, 11,988 bush.; Indian-corn, 287,400 bush.; oats, 879,515 bush.; Irish pot's, 242,961 bush.; butter, 1,095,482 lbs.; hay, 76,027 tons. Cash value of farms, $17,161,131. Total, estimated, value of all farm productions, including additions to stock, etc., $3,547,091. Value of manufactures, $4,142,692.

Fond du Lac, tn. in Fond du Lac co., Wis. Pop., 1,266.

***Fond du Lac,** city and the co. seat of Fond du Lac co., Wis., at the southern termination of Lake Winnebago and on the Chicago & Northwestern R. R., 16 mls. S. of Oshkosh and 177 mls. N. by W. of Chicago. A railroad connects it with Sheboygan. Steamboats ply on Fox R. to Green B. The lumber business is very extensive. The city is noted for its numerous artesian wells, varying from 90 to 130 feet in depth. Pop., 12,764; in 1860, 5,450. Seven newspapers.

Foneswood, p. o. in Richmond co., Va.

Fonta Flora, p. o. in Burke co., N. C.

Fontaines Creek, a tributary of the Meherrin R., in Greenville co., Va.; has an easterly course.

Fontana, p. o. in Butler co., Ohio.

Fontana, p. o. in Lebanon co., Pa.

***Fontanelle,** p. v. and the co. seat of Adair co. Iowa, on the Middle Nodaway R., 49 mls. S. W. of Des Moines. Two newspapers.

***Fox Lake,** p. v. in the above tn., on Beaverdam Cr. and on Fox Lake, 8½ mls. N. W. of Beaverdam. It lies 2½ mls. N. of a station on the Milwaukee & St. Paul R. R. A line of horse cars connects it with Fox Lake Junction on the Chicago, Milwaukee & St. Paul R. R., 69 mls. from Milwaukee. Pop., 1,086. One newspaper.
Fox River, in Wis.; rises in Green Lake co., and flows at first W. S. W. until within 1¼ mle. of Portage city on the Wisconsin R., where it sharply turns N. and then pursues a north-easterly course, until it empties into Green B. below Fort Howard. It drains several lakes, which are expansions of its bed, as Buffalo Lake, Lake Packawa, Green Lake and Winnebago Lake. Its largest tributary is Wolf R., which rises in Oconto co., and drains a large territory in the N. E. part of the state. A canal connects this river with the Wisconsin R. at Portage city, so as to establish a passage for ships from the great lakes to the Mississippi R. The obstructions which yet hamper navigation will soon be removed.
Fox River, a tributary of the Illinois R.; rises in Waukesha co., Wis., and flows first S., then S. W., emptying into the Illinois R. at Ottawa. It has much fall and furnishes extensive water-power.

Fresno, co. in Cal., S. part. Pop., 6,336; in 1860, 4,605. It extends from the high crest of the Sierra Nevada on the N. E. to the Diablo Mts., one of the principal coast ranges. The eastern part is mountainous and extremely rugged, being occupied by the spurs of the Sierra, which are cut by tremendous chasms and cañons through which the upper course of the San Joaquin and its tributaries flow. The central part comprises a section of the San Joaquin Valley, and is a level plain, dry and arid, so as to produce but little grass. Here there are no streams during the summer; the winter rains even sometimes fail to start the water in the dry beds of the creeks. The western part, belonging to the coast-range region, is mountainous, and is not only supplied with grass and water, but also a sparse growth of oak and scrubby pine timber. The principal stream is the San Joaquin, which rises in the high Sierra, flows at first S. W. and then turns to the N. W. The Fresno R., Chowchilla R. and Cottonwood Cr. are its main tributaries. Kings R. traverses the southern part of the co., and during the wet season sends off a branch, the Kings River Slough, to the San Joaquin. The agricultural resources of the co., owing to the remoteness from a market and the exceedingly dry summers, have been but very little developed. Large herds of cattle and sheep are kept by the inhabitants. Millerton is the co. seat. Agr. productions in 1870: Wheat, 19,765 bush.; rye, 205 bush.; Indian-corn, 3,930 bush.; Irish pot's, 4,268 bush.; sweet pot's, 1,659 bush.; wool, 191,594 lbs.; butter, 5,600 lbs.; hay, 1,746 tons. Cash value of farms, $629,705. Total, estimated, value of all farm productions, including additions to stock, etc., $229,068. Value of manufactures, $520,200.

Gallatin, co. in Ky., N. part. Area, 160 sq. mls. Pop., 5,074; in 1860, 5,056. The surface is hilly; the soil is thin and not fertile. It is separated from Ind. on the N. by the Ohio R., and is bounded by the Eagle Cr. on the S. Warsaw is the co. seat. Agr. productions in 1870: Wheat, 46,675 bush.; rye, 5,140 bush.; Indian-corn, 277,140 bush.; oats, 23,890 bush.; Irish pot's, 32,070 bush.; sweet pot's, 120 bush.; hay, 2,133 tons. Cash value of farms, $2,046,600. Total, estimated, value of all farm productions, including additions to stock, etc., $420,300. Value of manufactures, $130,898.

Gallatin, co. in Ill., S. E. part. Area, 310 sq. mls. Pop., 11,134; in 1860, 8,055. The surface is generally level; the soil fertile. On the banks of Saline Cr., which flows through the S. part, are salt springs. It is separated on the E. from Ind. by the Wabash R. and from Ky. by the Ohio R. The Illinois Southern R. R. touches the N. W. corner and two other local routes at Shawneetown. Shawneetown is the co. seat. Agr. productions in 1870: Wheat, 83,093 bush.; rye, 512 bush.; Indian-corn, 509,491 bush.; oats, 27,164 bush.; Irish pot's, 22,657 bush.; sweet pot's, 2,016 bush.; butter, 7,953 lbs.; hay, 2,252 tons. Cash value of farms, $1,795,075. Total, estimated, value of all farm productions, including additions to stock, etc., $665,821. Value of manufactures, $288,333.

Gallatin, tn. in Clay co., Mo. Pop., 2,241.

***Gallatin,** p. v. and the co. seat of Daviess co., Mo., 1 mle. S. W. of Grand R. and on the Chicago & Southwestern R. R., 21 mls. N. W. of Chillicothe. Center of a grazing region. Pop. about 500. Two newspapers.

Gallatin, co. in Mont., S. part. Pop., 1,578. It is bounded on the S. by the territories of Idaho and Wyo. Ter.; on the E. partly by the Yellowstone R., and on the N. W. by the Jefferson Fork and the Missouri R. With the exception of the eastern extremity, it lies entirely in the Rocky Mts. Broad and lofty ranges of these mountains occupy by far the largest portion of its surface, and are separated from each other by picturesque and fertile valleys. Two principal ranges may be distinguished. One extends along the western boundary of the co., between the Madison R. and the West Gallatin R., and the other separates the valley of the Gallatin R. from that of the Yellowstone R. It includes the valleys of the East Gallatin, and many small streams flowing eastward into the Yellowstone or westward into the West Gallatin. Dozeman is the co. seat. Agr. productions in 1870: Wheat, 87,676 bush.; rye, 575 bush.; Indian-corn, 8 bush.; oats, 68,520 bush.; Irish pot's, 13,388 bush.; butter, 58,251 lbs. Cash value of farms, $117,343. Total, estimated, value of all farm productions, including additions to stock, etc., $367,112. Value of manufactures, $267,829.

Gallatin, p.v. in Gallatin co., Mont. Ter., at the junction of the Gallatin and Jefferson Forks and the Missouri R., 35 mls. N. of Bozeman. Pop., 53.

Gallatin, tn. in Columbia co., N. Y. Pop., 1,416.

***Gallatin,** p. v. and the co. seat of Sumner co., Tenn., on the Louisville & Nashville R. R., 25 mls. N. E. of Nashville. It is a prosperous place, and contains several academies and manufactories. Pop., 2,123. Two newspapers.

GEORGIA, one of the original 13 states of the Union; is bounded on the N. by Tenn. and N. C.; on the S. by Fla.; on the E. by the Atlantic Ocean and by S. C., from which it is separated by the Savannah R., and on the W. by Ala. and Fla. It extends from 30° 21′ 40″ to 35° N. lat., and from 80° 52′ to 85° 35′ 38″ W. long. The area is 58,000 sq. mls., or 37,120,000 acres.

Surface.—A level or but slightly undulating plain extends inland from the Atlantic Ocean, varying in width from 100 to 150 mls., and consisting of alluvial soil. The coast (128 mls. long), is indented by numerous sounds and inlets, which separate a series of low, sandy islands from the main land. These are as follows: Tybee Island, between the mouth of the Savannah R. and Warsaw sound; Ossabaw Island, between Ossabaw and St. Catharine sounds; St. Catharine Island, between the last-named sound and Sapelo Sound; Sapelo Island; St. Simon's Island, south of Altemaha Sound; Jykill Island, south of St Simon's Sound, and Cumberland Island, between St. Andrews and Cumberland sounds. Along the coast extends a belt of swamps, the largest of which is the Okefinokee in Ware and Clinch cos., and further inland are the so-called "Pine Barrens," which extend from the lower course of the Savannah R. in a southwesterly direction into Ala., and have an average breadth of about 20 mls. Beyond the Pine Barrens is a broad belt of hilly lands, which is in some parts diversified by isolated ridges and peaks, as the Dug Down Mt. trending from Ala. through Polk and Paulding cos., and terminating W. of the village of Dallas; the Kenesaw Mt., near Marietta, Cobb co., the summit of which affords a view over a wide extent of country; and the Stone or Rock Mt., in DeKalb co., an isolated peak rising abruptly from the low plain to a height of 2,220 feet above the sea, and devoid of tree or shrub. The mountain region, which occupies the northern part of the state, comprises the southern extremities of the Appalachian System. The Blue Ridge extends from N. C. through Rabun and Towns cos. to the borders of Bartow co., gradually diminishing in height from the N. E. to the S. W. Its spurs and extensions branch off in a north-westerly direction, as the Stansbury Mts., between the Notteley and Toccoa Rs.; and the Frog Mts., which form the water-shed between the Coosawatee and the Toccoa Rs. The N. W. portion of Georgia, lying W. of Oostanaula R. and Coychattee Cr., is traversed by a series of parallel ranges which are separated from each other by narrow valleys. The most eastern of these is Chattoogata Mt.; then follow successively John's Mt., Taylors Ridge, Chickamauga Hill, Pigeon Mt., Missionary Ridge, the northern portion of the elevated Lookout Mt., and at last the broad heights of Raccoon Mt. Thus Georgia presents every variety of surface, from the low sandy beach, broad swamps and marshes, level plains covered with forests of the long-leaved southern pine, to gently undulating hills and lofty mountains, abounding in grand and impressive scenery.

Rivers.—The Savannah R., which divides Ga. from S. C., is formed by the confluence near Andersonville, S. C., of the Tugaloo and Keowee Rs. The Tugaloo is formed by the Chatuga and Tallulah Rs., which rise in the Blue Ridge. The Savannah is 450 mls. long, and is navigable to Augusta, 230 mls. above its mouth. Its largest tributary is Broad R., formed by the North and South Forks. The Ogeechee R. flows parallel with the Savannah, and empties into Ossabaw Sound. The Oconee and Ocmulgee Rs. rise in the central portion of the state, and form, by their junction near Colquit, the Altamaha, which empties into the sound of the same name. Steamboats ascend the Altamaha and its source streams as far as Macon and Milledgeville. The south-eastern counties of Ga. are drained by the Satilla and St. Mary's Rs., which are navigable for about 40 mls., and the southern counties by the Suwanoochee, Allapaha and Withlacooche Rs., which enter Fla. and there form the Suwanee R. The Ocklockonee R. also passes into Fla. The Flint R. rises in Clayton co., and after a southerly course of 300 mls. joins the Chattahoochee R. near the south-western corner of the state, to form the Apalachicola. It is navigable as far as Albany, Dougherty co. The sources of the Chattahoochee are in the Blue Ridge, and this large stream intersects the state from N. E. to S. W. to West Point, whence it flows S., separating Ga. from Ala., to its junction with the Flint. The Chattahoochee is navigable for large steamboats to Columbus, about 350 mls. from the Gulf of Mexico. Northern Ga. is drained by the Etowah and Oostanaula Rs., which rise on

the opposite slopes of the Blue Ridge, have a westerly course and join at Rome to form the Coosa R., one of the source streams of the Alabama R. The north-western corner of the state is drained by several small affluents of the Tennessee R., the most important of which are East, Middle and West Chickamauga Crs., which latter intersects McLamore's Cove between Pigeon Mt. and Missionary Ridge, Chattanooga Cr. and Lookout Cr., which traverses the valley between Lookout and Raccoon Mts. A small portion of Ga., lying N. of the Blue Ridge, is drained by the Toccoa and Notteley Rs., tributaries of the Hiawassee R. of Tenn. The mountainous portion of Ga. abounds in picturesque waterfalls. A few mls. from Clarksville, Habersham co., are the Toccoa Falls, where the Tallulah R. falls over a perpendicular, rocky wall of 180 feet in height. The cataracts of Tallulah, or Terrora, 12 mls. from Clarksville, are very grand and impressive. The stream frets and foams through a ravine or glen over 1,000 feet deep, with overhanging sides, and descends over a succession of rocky precipices. The Falls of the Estatoiah are formed by an affluent creek of the Little Tennessee R , in Rabun Gap of the Blue Ridge, N. of the v. of Clayton. The Falls of Amicolah, in Lumpkin co., 17 mls. W. of Dahlonega, have a descent of 400 feet in as many yards. In Monroe co. the Towaliga R., a tributary of the Ocmulgee, flows swiftly over a rocky ledge and forms two precipitous falls.

Climate and Vegetation. — The difference in height above the sea and in latitude produces a striking difference in temperature between the northern and southern parts of Ga. While in the former, the warmest season is invigorating and delightful, the summer heat in the latter is often very oppressive. At Atlanta the mean annual temperature is nearly 60° Fahr.; the maximum on hottest day, 92°; and the minimum on the coldest day, 16°; at Savannah the thermometer rises in summer about 100°, and falls in winter below 30°. Ga. is abundantly supplied with magnificent forests. These consist, in the mountainous and central portions, of deciduous trees; in the sandy barrens of the live oak and the valuable southern pine, yielding masts and ship timber, and in the swamps and marshes of cedar and cypress. The vegetation along the coast is semi-tropical. Here are found the graceful palmetto, a species of palm; the magnolia, laurel, jessamine and other evergreens, interspersed with vines and creepers of great variety, bearing in the spring the most brilliant flowers.

Population.—The population of Ga. has steadily increased since the state was organized. In 1790 it was 82,548; in 1800, 162,686; in 1810, 252,433; in 1820, 340,985; in 1830, 516,823; in 1840, 691,392; in 1850, 906,185; in 1860, 1,057,286, and in 1870, 1,184,109. Of the last number there were 638,926 whites; 545,142 colored persons; 1 Chinaman, and 40 Indians. With regard to nativity the inhabitants are classified in the last census as follows: born in the United States, 1,172,982, including 1,033,962 natives of the state; born in foreign countries, 11,127, including 2,760 Germans, 1,088 Englishmen, and 5,093 Irishmen.

The number of inhabitants of 10 years of age and over was, in 1870, 845,929, and of these there were 444,678 persons engaged in the useful occupations. In agriculture were engaged 336,145 persons; in personal and professional services, 64,083; in trade and transportation, 17,410; and in manufactures, mining and mechanical occupations, 27,040.

Minerals and Mining.—Iron ores of the very best quality abound in various parts of the state, especially in Cass and Cherokee counties. Copper occurs in the northern districts, known as the Cherokee country, and numerous mines have been opened; a few of which only are worked with profit. Gold is found in limited quantities, and, before the Cal. discovery, was considered of sufficient importance to supply a United States Mint at Dahlonega with the metal. Mineral and medicinal springs occur in various portions of Ga., as the Madison Springs, 7 mls. from Danielsville, Madison co.; the Warm Springs in Meriwether co., 36 mls. from Columbus, and 6 mls. S. of them the Rowland Springs; the Sulphur Springs, 6 mls. N. of Gainesville; the Red Sulphur Springs at the foot of Taylor's Ridge in Walker co., and the Powder Springs, containing sulphur and magnesia, in Cobb co., 20 mls. from Atlanta.

Agriculture is by far the most important branch of industry in the state, and, as so much of the soil is highly productive, will be the great source of wealth for years to come. Cotton is the principal product. In 1860, 701,840 bales of 400 lbs. each were harvested; in 1870, 473,934 bales. Sea Island cotton, which is the most valuable variety on account of its long, silky fiber, is grown on the islands near the coast; Upland cotton in the interior. The rice crop of 1870 was 22,277,380 lbs., mostly grown in Chatham, McIntosh, Camden and Bryan counties. The product of Indian-corn was 17,646,459 bush.; of spring wheat, 308,890 bush.; of winter wheat, 1,818,127 bush.; of oats, 1,904,601; of Irish pot's, 197,101 bush.; of sweet pot's, 2,621,562; of butter, 4,499,592 lbs.; of wool, 846,947 lbs., and of tobacco, 288,596 lbs. The live stock had a value of $30,155,317, and comprised 81,777 horses, 87,426 mules and asses, 231,310 milch cows, 54,332 working oxen, 412,261 other cattle, 419,465 sheep and 988,566 swine.

The land in farms had an area of 23,647,941 acres, of which 6,831,855 acres were improved and 12,928,084 were woodland. The cash value of farms was $94,559,468, and the estimated value of farm productions, including betterments and additions to stock, $80,390,228.

Manufactures. — Before the war Ga. had made considerable progress in the establishment of manufactories, and has resumed it since the return of peace. In 1870 there were 3,836 establishments, and the value of manufactures amounted to $31,196,115 against $16,925,564 in 1860. The capital invested in 1870 was $13,930,125; the wages paid, $4,844,508; the materials consumed, $18,583,731, and the hands employed, 17,871. The principal articles produced and their value were as follows: Flour and meal, $11,202,029; sawed lumber, $4,044,375 and cotton goods, $3,648,973 (against $3,027,377 in 1860).

Commercial and Railroads. — The domestic commerce of Ga. is increasing, but direct foreign commerce is inconsiderable. The state has three ports of entry, Savannah, Brunswick and St. Mary's. They had, in 1870, 85 vessels (28 of which were steamers), with a tonnage of 15,828; they imported goods to the amount of $1,383,727, and exported domestic goods to the amount of $33,442 520, consisting chiefly of cotton and ship-building materials.

The railroad mileage in 1872 was 2,108, showing a very great increase since 1862, when it was 1,420. The state has the following 10 railroad lines: Atlanta & West Point, 87 mls.; Atlantic & Gulf, 347 mls., the main line of which connects Savannah with Bainbridge; Central, 192 mls., connecting Savannah with Macon; Georgia, 232 mls., connecting Augusta with Atlanta, Camack with Warrington, Barnett with Washington and Union Point with Athens; Macon & Augusta, 78 mls.; Macon & Brunswick, 197 mls.; Macon & Western, 102 mls., connecting Macon with Atlanta; Rome, 20 mls., connecting Rome with Kingston; Southwestern, 257 mls., connecting Macon with Eufaula, Ala.; Fort Valley with Columbus, Smithville with Albany, and Cuthbert with Fort Gaines, and Western & Atlantic, 138 mls., connecting Atlanta with Chattanooga, Tenn.

Education.—According to the census, Ga. has three universities: the State University, at

Athens; Oglethorpe University (Presbyterian), at Milledgeville, and Mercer University (Baptist), at Penfield, with 18 teachers and 379 pupils. The 28 colleges and 123 academies have respectively 133 and 226 teachers, with 2,593 and 6,550 pupils. The number of public schools is 246, and the number of private, parochial and charity schools, 1,471. The former, in 1870, had 327 teachers and 11,150 pupils, and the latter, 1,702 teachers and 45,342 pupils. The total expenditure in the state for educational institutions was $1,072,113.

The 110 newspapers had, in 1870, a circulation of 150,987, and comprised 15 dailies, 5 tri-weeklies, 9 semi-weeklies, 73 weeklies, 2 semi-monthlies, 6 monthlies and 1 quarterly. The following three papers had a circulation of more than 5,000; the weekly "Southern Christian Advocate," published at Macon; the daily "Savannah Advertiser," and the monthly "Illustrated Record and Repository," published at Sparta.

Wealth and Taxation.—The true valuation of real and personal estate in 1870 was $268,169,207; the assessed value $227,219,519, of which $143,948,216 were for real estate, and $83,271,303 for personal estate. The state debt was $6,544,500, but has, since 1870, considerably increased; the county debt was $300,386, and the town and city debt was $14,383,313. The total amount of taxation was $2,627,029, which sum included $945,394 state taxes.

Government.—The new Constitution was adopted in convention in March, 1868, and ratified by the people in the next month. It declares all citizens of the United States residing in the state to be citizens thereof. The Governor is chosen by the people for four years; and for the same period are elected by the General Assembly the following officers: the Secretary of State, Comptroller-General, Treasurer and Surveyor-General.

The Senate consists of 44 members, one-half elected biennially for four years, and the House of Representatives, elected biennially for two years.

The Judiciary of the state comprises a Supreme Court, a Superior Court for each judicial district, Courts in Ordinary and Justices of the Peace.

The Supreme Court has appellate jurisdiction only. The Superior Courts have exclusive jurisdiction in cases of divorce, in criminal cases, where the penalty is death or confinement in the penitentiary, in cases respecting titles to land, and in equity cases. They have also power to correct errors in inferior judgments, and to issue writs that may be necessary for carrying into effect their powers. The judges of the Supreme and Superior Courts, the Attorney-General, Solicitors-General and the District Judges and Attorneys are appointed by the Governor with the advice and consent of the Senate.

The State Lunatic Asylum, at Midway, near Milledgeville, and the Academy for the Blind at Macon, are in successful operation. The State Penitentiary is located at Milledgeville.

Atlanta is the capital of the state. Ga. is divided into the following 137 cos.: Appling, Baker, Baldwin, Banks, Bartow, Berrien, Bibb, Brooks, Bryan, Bullock, Burke, Butts, Calhoun, Camden, Campbell, Carroll, Catoosa, Charlton, Chatham, Chattahoochee, Chattooga, Cherokee, Clarke, Clay, Clayton, Clinch, Cobb, Coffee, Colquitt, Columbia, Coweta, Crawford, Dade, Dawson, Decatur, De Kalb, Dodge, Dooley, Dougherty, Douglas, Early, Echols, Effingham, Elbert, Emanuel, Fannin, Fayette, Floyd, Forsyth, Franklin, Fulton, Gilmer, Glascock, Glynn, Gordon, Greene, Gwinnett, Habersham, Hall, Hancock, Haralson, Harris, Hart, Heard, Henry, Houston, Irwin, Jackson, Jasper, Jefferson, Johnson, Jones, Laurens, Lee, Liberty, Lincoln, Lowndes, Lumpkin, Macon, Madison, Marion, McDuffie, McIntosh, Meriwether, Miller, Milton, Mitchell, Monroe, Montgomery Morgan, Murray, Muskogee, Newton, Oglethorpe, Paulding, Pickens, Pierce, Pike, Polk, Pulaski, Putnam, Quitman, Rabun, Randolph, Richmond, Rockdale, Schley, Screven, Spalding, Stewart, Sumter, Talbot, Taliaferro, Tatnall, Taylor, Telfair, Terrell, Thomas, Towns, Troup, Twiggs, Union, Upson, Walker, Walton, Ware, Warren, Washington, Wayne, Webster, White, Whitfield, Wilcox, Wilkes, Wilkinson, Worth. Ga. has but four incorporated cities: Savannah, Atlanta, Columbus and Augusta.

Greene, co. in Ala., W. part. Area about 900 sq. mls. Pop., 18,399; in 1860, 30,859. It is bounded on the E. by the Black Warrior R.; on the W. and S. by the Tombigbee R. and on the N. W. by the Sipsey R. The surface is slightly broken and the soil is exceedingly productive. The Northeast & Southwest Alabama R. R. passes through the co. Eutaw is the co. seat. Agr. productions in 1870: Wheat, 1,265 bush; rye, 25 bush.; Indian-corn, 207,782 bush.; oats, 2,038 bush; Irish pot's, 853 bush.; sweet pot's, 22,080 bush.; cotton, 9,910 bales; butter, 81,187 lbs. Cash value of farms, $1,560,652. Total, estimated, value of all farm productions, including additions to stock, etc., $1,154,762. Value of manufactures, $10,830.
Greene, co. in Ark., forming the N. E. extremity of the state, and bordering on Mo. Area about 950 sq. mls. Pop., 7,573; in 1860, 5,843. The Cache R. forms the western boundary; the St. Francis R. the eastern. The surface is generally level, and the bottom lands of the streams, consisting of alluvium, are exceedingly productive. Gainesville is the co. seat. Agr. productions in 1870: Wheat, 10,890 bush.; Indian-corn, 208,352 bush.; oats, 10,623 bush.; Irish pot's, 7,691 bush.; sweet pot's, 12,904 bush.; cotton, 983 bales; tobacco, 16,912 lbs. Cash value of farms, $341,480. Total, estimated, value of all farm productions, including additions to stock, etc., $347,819. Value of manufactures, $65,614.
Greene, co. in Ga., central part. Area, 350 sq. mls. Pop., 12,454; in 1860, 12,652. The Oconee R. forms the western boundary. The surface is hilly and the soil moderately productive. Greensborough is the co. seat. Agr. productions in 1870: Wheat, 24,651 bush.; rye, 20 bush.; Indian-corn, 132,635 bush.; oats, 9,735 bush.; Irish pot's, 662 bush.; sweet pot's, 13,971 bush.; cotton, 5,699 bales; butter, 63,020 lbs.; hay, 43 tons. Cash value of farms, $1,059,700. Total, estimated, value of all farm productions, including additions to stock, etc., $763,855. Value of manufactures, $281,925.
Greene, co., in Illinois, W. S. W. part. Area, 490 sq. mls. Pop., 20,277; in 1860, 16,093. The

surface consists of rolling prairie land; the soil is exceedingly fertile. The Illinois R., navigable by steamboat, forms the entire W. border; the Macoupin Cr. bounds it on the S. Three railroads center at Whitehall, in the N. part of the co. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 577,400 bush.; rye, 415 bush.; Indian-corn, 1,051,313 bush.; oats, 64,029 bush.; Irish pot's, 50,435 bush.; sweet pot's, 2,107 bush.; butter, 195,992 lbs.; hay, 20,031 tons. Cash value of farms, $11,007,844. Total, estimated, value of all farm productions, including additions to stock, etc., $2,507,350. Value of manufactures, $573,868.

Greene, co. in Ind., S. W. central part. Pop., 19,514; in 1860, 16,041. The surface is undulating and the soil productive. It is intersected in the N. by Eel R., which joins the West Fork of White R., and the latter stream passes through the co. from N. to S., receiving, from the E., Richland Cr. and First Cr., and from the W., several small tributaries. Bloomfield is the co. seat. Agr. productions in 1870: Wheat, 190,647 bush.; rye, 5,340 bush.; Indian-corn, 784,195 bush.; oats, 101,410 bush.; Irish pot's, 39,639 bush.; sweet pot's, 212 bush.; butter, 160,958 lbs.; hay, 7,833 tons. Cash value of farms, $4,701,180. Total, estimated, value of all farm productions, including additions to stock, etc., $1,301,518. Value of manufactures, $330,668.

Greene, tn. in Randolph co., Ind. Pop., 1,034.

Greene, p. o. in Jay co., Ind.

Greene, co. in Iowa, central part. Area, 600 sq. mls. Pop., 4,627; in 1860, 1,374. The surface is rolling; the soil is moderately fertile. It is traversed by the Coon R. and three of its tributaries. The Chicago & Northwestern R. R. passes through the central part from E. to W. Jefferson is the co. seat. Agr. productions in 1870: Wheat, 98,943 bush.; rye, 394 bush.; Indian-corn, 226,965 bush.; oats, 54,967 bush.; Irish pot's, 18,951 bush.; wool, 5,192 lbs.; butter, 81,201 lbs.; hay, 6,862 tons. Cash value of farms, $1,285,286. Total, estimated, value of all farm productions, including additions to stock, etc., $394,810. Value of manufactures, $172,830.

Greene, tn. in Iowa co., Iowa. Pop., 1,040.

Greene, tn. in Androscoggin co., Me. Pop., 1,094.

Greene, p. v. in the above tn., on the Maine Central R. R., 7½ mls. N. E. of Auburn.

Greene, co., in Miss., S. E. part. Area, 735 sq. mls. Pop., 2,038; in 1860, 2,232. The surface is generally level or slightly undulating and the soil moderately productive. The Chickasawha R. and Leaf R. intersect the co., and joining in the southern part of it form the Pascagoula R. Leakesville is the co. seat. Agr. productions in 1870: Indian-corn, 21,473 bush.; oats, 125 bush.; Irish pot's, 594 bush.; sweet pot's, 13,877 bush.; butter, 6,707 lbs. Cash value of farms, $29,065. Total, estimated, value of all farm productions, including additions to stock, etc., $95,114. Value of manufactures, $15,873.

Greene, co. in Mo., S. W. part. Pop., 21,549; in 1860, 13,186. The Ozark Mts. occupy the southeastern part of the co., while the northwestern consists of rolling prairies, which are extensive and have a productive soil. Timber sufficient for home supply grows in the valleys, which are drained by tributaries of the White and Osage Rs. The Atlantic and Pacific R. R. passes through it from N. E. to S. W. Springfield is the co. seat. Agr. productions in 1870: Wheat, 171,166 bush.; rye, 713 bush.; Indian-corn, 859,953 bush.; oats, 256,096 bush.; Irish pot's, 47,626 bush.; sweet pot's, 9,212 bush.; tobacco, 29,382 lbs.; butter, 159,245 lbs.; hay, 4,487 tons. Cash value of farms, $4,062,269. Total, estimated, value of all farm productions, including additions to stock, etc., $1,466,776. Value of manufactures, $933,795.

Greene, tn. in Platte co., Mo. Pop., 2,245.

Greene, co. in N. C., E. central part. Area, 275 sq. mls. Pop., 8,687; in 1860, 7,925. The surface is mostly level, and the soil fertile near the rivers. Little Contentaca Cr. forms the E. boundary and Moccasin Cr. intersects the central part from N. W. to S. E. Snow Hill is the co. seat. Agr. productions in 1870: Wheat, 10,732 bush.; rye, 1,184 bush.; Indian-corn, 223,988 bush.; oats, 5,517 bush; Irish pot's, 5,924 bush.; sweet pot's, 44,531 bush.; butter, 8,227 lbs.; cotton, 6,268 bales; hay, 1,596 tons. Cash value of farms, $1,534,503. Total, estimated, value of all farm productions, including additions to stock, etc., $842,785. Value of manufactures, $78,937.

Greene, tn. in Sussex co., N. J. Pop., 868.

Greene, co. in N. Y., E. central part. Area, about 550 sq. mls. Pop., 31,832; in 1860, 31,920. It is bounded on the E. by the Hudson R., and drained by Catskill Cr., tributary of the Hudson R., and Schoharie Cr., tributary of the Mohawk R. The surface is greatly diversified. The highest ranges and peaks of the famous Catskill Mts. occupy the central part of the co., while the north-eastern section of it is undulating. The soil of the valleys and plains is productive and in a high state of cultivation. The Athens Branch of the New York Central R. R. intersects the co., following the W. bank of the Hudson R. Catskill is the co. seat. Agr. productions in 1870: Wheat, 11,457 bush.; rye, 72,016 bush.; Indian-corn, 138,889 bush.; oats, 378,422 bush.; Irish pot's, 276,787 bush.; butter, 1,538,203 lbs.; wool, 52,147 lbs.; hay, 103,357 tons. Cash value of farms, $14,734,775. Total, estimated, value of all farm productions, including additions to stock, etc., $3,051,687. Principal products of industry: Ship-building and repairing, $725,800, and woollen goods, $748,500. Total value of manufactures, $2,997,337.

Greene, tn. in Chenango co., N. Y. Pop., 3,537.

Greene, p. v. in the above tn., on the Chenango R. and Canal, 6 mls. N. E. of Chenango Forks, on the Utica Division of the Delaware, Lackawanna & Western R. R., 83 mls. from Utica. Pop., 1,025. One newspaper.

Greene, co. in Ohio, S. W. central part. Area, 430 sq. mls. Pop., 28,038; in 1860, 26,197. It is intersected by the Mad and Little Miami Rs. The surface is rolling; the soil very fertile. It is intersected by the Little Miami, Columbus & Xenia R. R., Dayton & Xenia R. R., and the Springfield Branch of the Cleveland, Columbus & Cincinnati R. R. Xenia is the co. seat. Agr. productions in 1870: Wheat, 643,980 bush.; rye, 10,674 bush.; Indian-corn, 1,527,647 bush.; oats, 152,747 bush.; Irish pot's, 83,270 bush.; sweet pot's 3,237 bush.; butter, 370,179 lbs.; hay, 14,283 tons. Cash value of farms, $14,868,341. Total, estimated, value of all farm productions, including additions to stock, etc., $2,877,165. Value of manufactures, $2,017,936.

Green Mountains, a range of the Appalachian systems, extending from N. to S. through Canada, Vt. and Mass. They attain their greatest height in Vt., where they possess many lofty peaks, as Mt. Equinox, 3,872 ft.; Shrewsbury Pk., 3,845 ft.; Mt. Pico, 3,954 ft.; Killington Pk., 4,221 ft.; Mt. Hogback, 3,648 ft.; Mt. Mansfield, 4,430 ft.; Camel Hump, 4,088 ft., and Mt. Lincoln, 4,078 ft. Although this range is the highest between the valley of the Connecticut R. and the valley of the Hudson R. and Lake Champlain, it is not the divide between these waters and the largest rivers of Vt., as the Winooski, Lamoille and Missisquoi Rs. rise E. of and flow through them in transverse valleys of great pastoral beauty.

***Harrisburgh,** city, the co. seat of Dauphin co. and the capital of Pa.; is situated on the Susquehanna R., 100 mls. W. by N. of Philadelphia, and on the Pennsylvania Central R. R., Cumberland Valley R. R., Northern Central R. R., Lebanon Branch and Schuylkill & Susquehanna Branch of Philadelphia & Reading R. Rs. and Pennsylvania Canal. The State Capitol occupies a position on Capitol Hill, and is a modest brick structure. There are many fine residences, especially on the street commanding a view of the river, which is here isle-checkered and beautiful. A state arsenal and a state lunatic asylum are located here. The city has developed wonderfully within the last few years, and sustains many fine schools and churches, banks and other institutions, is the center of an immense traffic by railroad, and has several very large furnaces, rolling mills and machine shops. It was founded by John Harris in 1785; incorporated as a borough in 1808; became the state capital in 1812, and a city in March, 1860. Pop. in 1870, 23,104; in 1860, 13,405; in 1850, 7,834. It has 14 newspapers, 4 of which are published daily, the rest weekly and monthly. The former are the "Telegraph," "State Journal," "Patriot," and "Mercury."

The principal products of industry are: Agricultural implements, $486,400; leather belting, $500,000; carpets, $1,945,156; men's clothing, $581,142; cotton goods, $584,000; edge tools, $879,911; fire-arms, $1,535,000; flour and meal, $923,356; gun-powder, $750,000; hardware, $3,050,658; hosiery, $1,000,160; iron castings, $929,505; machinery, $1,728,532; paper, $6,273,152; sewing machines, $1,000,000; silk goods, $1,653,500; tobacco and cigars, $541,228; woollen goods, $2,196,375, and clocks, $483,000. Total value of manufactures, $35,039,324.
Hartford, tn. in Hartford co., Conn. Pop., 37,743.
***Hartford,** city, co. seat of Hartford co., and capital of Conn.; is situated on the W. bank of the Connecticut R. at the head of navigation, and at the intersection of the New Haven, Hartford & Springfield R. R. with the Hartford, Providence & Fishkill R. R., 110 mls. from New York, 36 mls. N. of New Haven and 26 mls. S. of Springfield, Mass. It covers an area of about 2,000 acres; is for the most part com-

pactly built and contains many elegant private residences, magnificent business buildings and fine public edifices. The population was, in 1850, 17,966; in 1860, 29,152 and in 1870, 37,180, of whom 26,363 were natives and 10,817 foreigners. In all classes of occupations were engaged 13,339 persons, viz.: 357 in agriculture; 4,749 in personal and professional services; 2,659 in trade and transportation, and 5,574 in manufactures and mechanical industries.

The business of Hartford is very extensive. Not only are most of the manufactories of the co. (which see) located in or near the city, but it has much commerce; is one of the centers of the life and fire insurance companies of the country, an important market for wool and tobacco, and contains several large publishing houses.

It is the seat of Trinity College, a wealthy Episcopalian institution founded in 1823; of the Congregational Theological Institute, founded in 1834, and has a thoroughly well organized system of public schools. The Deaf and Dumb Asylum founded by Dr. Gallaudet in 1817 is the oldest institution of the kind in America. The Retreat for the Insane and the City Hospital are in the S. W. part of the city. The State Arsenal, Widows' Home, and the extensive North Cemetery, are in the N. E. part.

The Wadsworth Athenæum, which was founded by a son of Col. Wadsworth, Washington's commissary-general, contains a gallery of statuary and a picture gallery. In the N. wing of the building is the library of the Young Men's Institute, and in the S. wing are the rooms of the Connecticut Historical Society, containing a fine library and an interesting collection of historical curiosities.

The old State House, which was built in 1794, will soon be removed and a new one erected on a hill in the park. The City Hall is near the old State House. Other prominent buildings are: The Connecticut Mutual Insurance Co.'s magnificent granite structure opposite State House Square; the fine building of the Hartford Fire Insurance Co., on Main st; the palatial granite building of the Charter Oak Insurance Co., near the Athenæum, etc. The Colts' fire-arms manufactory and the Willow works form a village near the river, in the S. E. part of the city; and Sharp's Rifle manufactory is in the W. part.

There are seventeen papers published in Hartford. The leading ones are the "Courant," daily; the "Post," evening daily, and the "Times," evening daily.

Hudsondale, p. o. in Carbon co., Pa.
Hudson River, in N. Y., one of the most important streams of the continent; is formed by the confluence of two small creeks in the Adirondack Mts., Essex co. The course of the Hudson in the mountain region is winding and irregular; but at Sandy Hill, Washington co., it assumes a southerly course, which it pursues with slight deviations to its entrance into New York B. Its length is somewhat over 300 mls.; and below Troy, to which city it is navigable, its width varies between 300 and 1,000 yards. In its lower course it expands into wide basins. Such are Haverstraw B., above Croton Point, and Tappan Sea, below that point. The Hudson is famous for the magnificent scenery on its shores, and in this respect fully equals the Rhine in Germany. The most beautiful part of its course is where it breaks through the Highlands above and below West Point; mountains of from 1,500 to 2,000 ft. in elevation here rise precipitously from the banks. The Hudson has but few large tributaries, and these all join it from the W., as Sacondaga R., Mohawk R., Esopus Cr., Rondout Cr., with Wallkill, etc. The eastern tributaries are small creeks. The largest steamboats ascend it to Albany, 142 mls. above its mouth at New York; and 6 mls. higher up, to Troy, smaller boats find a sufficient depth of water. The Hudson was named after Hendrick Hudson, who first explored it.

Humboldt, co. in Cal., N. W. part. Area, 2,812 sq. mls. Pop., 6,140; in 1860, 2,694. It borders on the Pacific Ocean, and near the center of its coast lies C. Mendocino. Humboldt B., a spacious, land-locked harbor, is in the N. W. part of the co. The surface is mountainous, as the co. is traversed by several of the Coast Ranges. They are rugged and broken, and attain a considerable altitude. Mt. Pierce is over 6,000 feet above the sea level, and Mt. Yallow Balley, 6,357 feet. The principal streams are Mad R., Eel R., which receives Van Dusen and South Forks, and the Mattole R., all flowing in a N. W. direction. The mountains are mostly covered with heavy forests of pine and maple trees, while the valleys contain extensive tracts of fertile farm lands. Large quanties of lumber are exported from the ports on Humboldt B. Eureka is the co. seat. Agr. productions in 1870: Wheat, 32,284 bush.; Indian-corn, 10,022 bush.; oats, 137,022 bush.; Irish pot's, 372,924 bush.; sweet pot's, 140 bush.; wool, 51,867 lbs.; butter, 112,580 lbs.; hay, 7,426 tons. Cash value of farms, $1,244,775. Total, estimated, value of all farm productions, including additions to stock, etc., $557,212. Value of manufactures, $805,272.
Humboldt, tn. in Coles co., Ill. Pop., 2,023.
Humboldt, co. in Iowa, N. central part. Area, 570 sq. mls. Pop., 2,796; in 1860, 332. The surface consists of rolling prairie land, quite fertile. It is intersected in the central part from N. to S. by the Des Moines R. Dakotah is the co. seat. Agr. productions in 1870: Wheat, 59,101 bush., rye, 15 bush.; Indian-corn, 107,950 bush.; oats, 60,316 bush.; Irish pot's, 12,416 bush.; wool, 4,609 lbs.; butter, 83,985 lbs.; hay, 9,133 tons. Cash value of farms, $780,093. Total, estimated, value of all farm productions, including additions to stock, etc., $242,424. Value of manufactures, $273,565.

Humboldt, co. in Nev., N. W. part. Pop., 1,916. The N. W. section is characterized by high basaltic table-lands, cut up by deep ravines with high precipitous sides. In many places large areas—sometimes several miles in length and breadth—appear to have sunk bodily below the general level of the plateau, forming valleys with rugged, wall-like boundaries, varying from a few hundred to a thousand feet in height. The Lake and Granite ranges form the W. boundary; the Rabbit Hole Mts., Antelope Mts., Quinn's River Mts., Eugene Mts., Sonoma Mts. and Humboldt Mts. are the principal ranges, traversing the co. from S. to N. The Humboldt R. enters from the E. and describes a great curve to the S. W. It receives the Little Humboldt from the N., which flows through the Paradise Valley. The Black Rock Desert, or the Valley of the Mud Lakes, is an extensive region, covered during the rainy season with alkaline water. The Quinn's R. enters the co. from the N. and terminates in a sink N. of the Black Rock Desert. In the S. E. section of this co. there are numerous mining districts, located mostly in the Humboldt Mts. and the East Range. They produce gold and silver and are among the richest of the state. The S. W. section consists of barren deserts and mountains comparatively destitute of wood, water and grass. The Pacific R. R. follows the valley of the Humboldt R. Unionville is the co. seat. Agr. productions in 1870: Wheat, 4,419 bush.; oats, 450 bush.; Irish pot's, 5,504 bush.; butter, 5,050 lbs; hay, 2,249 tons. Cash value of farms, $158,970. Total, estimated, value of all farm productions, including additions to stock, etc., $101,210. Value of manufactures, $387,984.

Humboldt House, p. o. in Humboldt co., Nev.
Humboldt River, the largest stream in Nev.; rises in the N. E. part of Lander co., flows W. for a distance of 250 mls. to 117° 43' W. long., where it is joined by the Little Humboldt, and then deflects to the S. W. Near the boundary of Humboldt and Churchill cos. it expands into the Humboldt Lake, and a few miles further S. terminates in Humboldt Sink. This river has an average width of 40 yards and a depth of 4 feet. At ordinary stages it is fordable at many places. There is a narrow belt of alluvium along its banks, expanding at some points into grassy bottoms of considerable extent. The few tributaries it receives are but small creeks. Those which join it from the N. are Muddy Cr., Grouse Cr. and the Little Humboldt R.; those which join it from the S. are Huntington Cr. and Roberts Cr.

Huron, Lake lies between 80° and 80° 40′ W. long., and is bounded by the state of Mich. and the Canadian Dominion. It is connected with Lake Michigan by the Strait of Mackinaw, and with Lake Superior by the St. Mary's R. The outlet is the St. Clair R., at its southern extremity. The long peninsula of Cabot's Head and the chain of the Manitouline Islands separate its western part from its eastern, called the Georgian B. The greatest length from N. W. to S. E. is 275 mls., and the average width 70 mls. The area is estimated at 20,400 sq. mls. The surface of the lake is 13 feet higher than Lake Erie, 347 feet higher than Lake Ontario and 578 feet above the sea level. The depth exceeds in many parts 1,000 feet. The water of this lake is very transparent.
Huron River, in Mich., rises in Oakland co., flows through Livingston, Washtenaw and Wayne cos., and empties into Lake Erie near the mouth of St. Clair R.

***Idaho,** p. v. and the co. seat of Clear Creek co., Colo. Ter., 25 mls. W. of Golden City. Pop., 229.

IDAHO, one of the western territories; is bounded on the N. by British Columbia, on the S. by Nev. and Utah Ter., on the E. by Mont. Ter. and Wyo. Ter., and on the W. by Wash. Ter. and Oregon. It extends from 42° to 49° N. lat., and from 111° to 117° W. long., and has an area of 86,294 sq. mls., or 55,228,160 acres. The length from N. to S. is 410 mls.; the width on the southern boundary, 385; on the northern, 50.

Surface.—Idaho Ter. is a mountainous country. The Bitter Root Mts., a chain of the Rocky Mountain System, form the north-eastern boundary, separating the territory from Mont. Ter., and their spurs and extensions occupy a large portion of its surface. Such spurs are the Kootenay, or Kootanie, Mts. in the N., the Coeur d'Allène Mts., near the 47th parallel, and the Lapway Mts., which intersect Idaho Ter. from E. to W., near the Clearwater R. The principal Rocky Mountain chain, sweeping in a wide curve around the sources and upper streams of the Missouri R., separates the southern portion of Idaho Ter. from Mont. Ter., and the Teton range, which latter branches off from the Rocky Mts. in a southerly direction, and nearly coincides with the boundary between Idaho Ter. and Wyo. Ter. The Bear River Mts., the Goose Creek Mts. and other ranges, enter into southern Idaho Ter. from Utah Ter. and Nev., while the Salmon River Mts., forming an intricate system of numerous ranges, occupy the entire central portion of the territory. The peaks and crests of nearly all these chains are covered with perpetual snow, feeding numerous brooks and torrents, which deeply furrow their sides.

Rivers and Lakes.—A small district in the south-eastern corner of Idaho Ter. is drained by the Bear R., an affluent of the Great Salt Lake of Utah Ter. With this single exception the rivers of the territory are tributaries of the Columbia R. The Kootanie, or Flat Bow, R., waters the extreme north-eastern portion. The Clark Fork of the Columbia R. intersects Idaho Ter. from E. to W., near the 48th parallel, and passes through the beautiful mountain lake of Pend d'Oreille. South of this is the Coeur d'Allène Lake, which receives the river of the same name and the two forks of the St. Joseph R., and from which emerges the Spokane R. The largest stream of Idaho Ter. is the Snake R., which rises in a small mountain lake of Wyo. Ter., flows S. through a romantic valley between the Wind River and Teton ranges, then turns N. W., and near 112° W. long. begins its westward course through the plains and prairies of southern Idaho Ter., which extend between the Salmon River Mts. and the chains or table-lands near the southern boundary. In 43° 48′ N. lat. it makes a great bend to the northward, and thence forms the western boundary of Idaho Ter. for a distance of 150 mls. Passing through eastern Wash. Ter. it joins the Columbia R. N. of Old Fort Walla Walla. Its course through the plains of the territory is interrupted by several cascades, the most famous of which are the Shoshone Falls, in long. 114° 20′, as high as those of Niagara and 600 ft. wide. Above these are the American Falls, and below, near the mouth of the Malade R., the Salmon Falls. The southern tributaries of the Snake R. are Blackfoot Cr., Port Neuf R., Goose Cr., Salmon Falls R. and Bruneau R.; the northern, Henry's Fork, issuing from Henry Lake near the Mont. boundary; Malade R., draining the southern extremity of the Salmon River Mts., Boise R., Payette Cr. and Wiser Cr. Salmon R. having its sources on the northern slopes of those ranges, which derive from it their name, flows N. to Fort Lemhi and then W. to its junction with the Snake R. Clearwater R. rises in the Bitter Root Mts. and joins the Snake near Lewiston. Paloose R. drains the northern slopes of the Lapway Mts. and flows westward to its junction with the Snake R. in Wash. Ter.

The Snake R. is navigable from its mouth as far up as Lewiston; but above this point for about 200 mls. to the mouth of Powder R., (Oreg.) the stream is shallow and swift, rendering navigation difficult and often dangerous. Above the mouth of Powder R. light draft steamers navigate the Snake R. through south-western Idaho Ter. during the greater part of the year.

Climate and Vegetation.—Northern Idaho has a cool climate, owing to its high latitude and its great elevation above the sea. The rain-fall is sufficient for the support of vegetation, and the mountain slopes are generally covered with magnificent pine forests. The climate of southern Idaho is warmer, but also more arid, though not so dry, as that of Utah and Nevada. Forests are also less abundant than farther N., and the fertile valleys of the streams and the extensive prairies and plains are mostly covered with grasses and herbs. The wild sage brush, or Artemisia, covers the more sterile portions of these plains. On the whole it may be said, Idaho has a salubrious climate; the air is everywhere pure, fresh and invigorating.

Population.—Idaho is as yet but thinly settled, the population numbering, in 1870, only 14,999, including 10,618 whites, 60 colored persons and 4,274 Chinese. The total number of Indians was estimated at 5,631, of whom 5,584 sustained tribal relations, including 3,284 who were settled on reservations, and 2,300 wandering bands. The natives of the United States numbered 7,114 (nearly all whites); the foreign-born inhabitants, 7,885, including 1,233 Germans, 539 Englishmen, 986 Irishmen, 114 Scotchmen, 335 Welshmen, and 4,267 Chinamen.

The number of persons engaged in all classes of occupations was 10,879, viz.: in agriculture, 1,462; in professional and personal services, 1,423; in trade and transportation, 721; in mining and mechanical industries, 7,273.

Mining is as yet the most important occupation in the territory. The "Alta California" estimates the total gold and silver product for 1872 at $2,514,090. The Land-office Report for 1870 states the bullion product to have been, during the preceding year, $7 000,000, which is probably too high. The principal mines are in Idaho co., which embraces portions of the Salmon River Mts., Nez Perces co. and Boise co. Rich silver mines are situated near Ruby City and Silver City, in the Owyhee Range.

Agriculture.—The arable surface of Idaho fit for profitable farming is estimated at 16,925,000 acres, and the grazing surface at 5,000,000 acres. The valleys of the North Malade R., and other tributaries of the Snake, contain from 400 to 500 sq. mls. each of excellent farm land. The valleys in Ada co., traversed by Wiser, Fayette and other creeks, are also fertile. The reservation set apart for the Shoshone Indians, in Oneida co., contains some of the finest land in the territory; yet farming is in its infancy. Only 26,603 acres were improved in 1870. The value of farms was $492,860; of farm productions, including additions to stock, $637,797; and of all live stock, $520,580. The principal products were as follows: Spring wheat, 73,725 bush.; winter wheat, 1,925 bush.; rye, 1,756 bush.; Indian-corn, 5,750 bush.; oats, 100,119 bush.; barley, 72,316 bush.; Irish pot's, 64,534 bush.; wool, 3,415 lbs.; cheese, 4,464 lbs.; butter, 111,480 lbs.; hay, 6,985 tons. The number of horses was 2,151; of mules, 371; of milch cows, 4,171; of working oxen, 522; of other cattle, 5,763; of sheep, 1,021, and of swine, 2,316.

The North Pacific R. R. will intersect the territory along the course of the Salmon R.

The Manufactures amounted in value, in 1870, to $1,047,624, including flour and meal, $211,010; milled quartz, $523,100; boots and shoes, $32,267; sawed lumber, $56,850.

Education.—A public school system was organized in Idaho soon after it was erected into a territory. The law makes provision for the appointment or election of a State Superintendent of Public Instruction, and of a County Superintendent for each county. In 1870 there were 21 public schools with 26 teachers and 1,048 pupils, and 4 private schools with 7 teachers and 160 pupils. Higher institutions of education have not yet been established.

The six newspapers had, in 1870, a circulation of 2,750.

Wealth and Taxation.—The total assessed value of real and personal estate in 1870 was $5,292,205 ($1,926,565 for the former and $3,365,640 for the latter); but the estimated value was $6,552,681. The total taxation, not national, amounted to $174,711, and the public debt to $222,621, comprising $217,522 county debt and $4,099 town and city debt.

Government.—The Governor and Secretary of State are appointed by the President for a term of four years; the Treasurer, Comptroller and Superintendent of Public Instruction are elected by the people. The legislature comprises a council of 10 members, chosen for two years, and a House of Representatives of 20 members, chosen for one year.

The Supreme Court consists of a Chief Justice and two Associate Justices, appointed by the President for four years. It holds at least one session annually at the seat of government. The territory is divided into three judicial districts, in each of which one of the Supreme Court Justices holds a District Court session.

Idaho is divided into the following counties: Ada, Alturas, Boise, Idaho, Kootenay, Lemhi, Nez Perces, Oneida, Owyhee and Shoshone.

The territorial capital is Boise City.

Idaho, co. in Idaho, central part. Pop., 849. It is bounded on the N. by Salmon R. and on the W. by Snake R. The Salmon River Mts., which extend into this co., contain some of the richest placer deposits yet discovered in the territory, and also gold and silver-bearing quartz veins. Excellent land is found along the streams, but the altitude of the greater part of the co. is unfavorable to agriculture. Washington is the co. seat. Agr. productions in 1870: Wheat, 1,111 bush.; oats, 1,675 bush.; Indian-corn, 1,580 bush.; Irish pot's, 6,310 bush.; butter, 5,900 lbs.; hay, 63 tons. Cash value of farms, $24,200. Total, estimated, value of all farm productions, including additions to stock, etc., $24,725. Value of manufactures, $5,100.

Illinois, tn. in Washington co., Ark. Pop., 1,200.

ILLINOIS, one of the central states; is bounded on the N. by Wis.; on the E. by Lake Michigan and the state of Ind.; on the S. by Ky., from which it is separated by the Ohio R., and on the W. by Iowa and Mo., from which it is separated by the Mississippi R. It extends from 37° 3′ to 42° 30′ N. lat. and from 87° 30′ to 91° 40′ W. long., and has an area of 55,410 sq. mls., or 35,462,400 acres.

Surface.—Ill. is a plain, gently sloping from the N. and E. toward the Mississippi and Ohio Rs. The table-land which occupies Wis. extends into the northern portions of the state. Another elevated region includes Ford and the adjacent cos. Neither of these two portions of the state exceed 800 feet in height above the sea, while the most southern parts near the confluence of the Ohio and Mississippi Rs. are but 350 feet high. No mountain chains intersect Ill., but it is by no means an unbroken plain. The alluvial soil, of which the state almost entirely consists, easily gives way to the erosive power of flowing water, and consequently most of the streams have cut their beds deeply into the yielding ground, so that their valleys and flood grounds are bordered by more or less precipitous slopes and bluffs, which often give the country a rough and broken aspect. The lead region in the north-western corner is the most uneven and hilly portion of Ill.

Rivers and Lakes.—Ill. is included almost entirely in the drainage system of the Mississippi, which flows along its western border. Lake Michigan, which washes the N. E. corner, receives but a few insignificant tributaries, so that the St. Lawrence system includes but the narrow littoral of the great lake. Rock. R. enters the state from Wis., and joins the Mississippi at Rock Island. The largest stream intersecting the state is the Illinois R., which is formed by the confluence, near Shermanville, of the Des Plaines R. and the Kankakee R. It flows W. as far as Hennepin, and thence S. S. W. into the Mississippi, 15 mls. above Alton. In Woodford and Peoria cos. its bed expands, forming Peoria Lake. This stream drains a large portion of the state and receives numerous affluents; from the N. and W. are Fox R., Spoon R., La Main R., and from the S. and E. the Vermillion R., Mackinaw R., Sangamon R. and Macoupin Cr. The Kaskaskia R. rises in Champaign co., and has a S. S. W. course, joining the Mississippi near Chester, in Randolph co. The Ohio washes the southern border of the state, and its tributary, the Wabash, the south-eastern. The Ohio receives no affluent of importance in the state; the Wabash several, as the Little Wabash R., the Embarras R. and the Big Vermillion R., which has a south-easterly course, and joins the main stream in Ind.

The Climate of Ill. is marked by great extremes. The summers are very warm; the winters very cold. The range of temperature, observed in 1859, at Peoria, was 117° Fahr.; and at Riley, 123°. The maximum observed at the former place was 104° (July); the minimum, —13° (December). The summer heat is generally however tempered by fresh breezes, so that farm labor is not thereby interrupted. The mean temperature of the year in 40° lat. is about 54°; of the summer 77°, and of the winter 33½°. At Beloit the mean annual temperature is 47½°; and at Cairo, 58½°, thus showing a marked difference between the northern and southern extremities of the state. Southerly and south-westerly winds greatly prevail; during the winter months only, are northerly and north-easterly winds in excess. About 245 days of the year are clear, and but 120 days rainy or cloudy. The climate is on the whole salubrious, except in the low and swampy bottom-lands, where the settlers are often afflicted with chills and fevers.

Large portions of Ill. consist of prairies. The "Grand Prairie," between the affluents of the Wabash and Mississippi, extends nearly across the state, from Jackson co. to Iroquois co., varying in width from 5 to 20 mls., being intersected by numerous small wood-land areas, is in reality a series of prairies. In other parts of the state other prairies are also found. They have a rich and very deep soil, consisting of alluvium and mould, and as they produce in the spring and early summer a great abundance of wild flowers of various colors, they then present a most beautiful appearance. But in the hot season, when the sun has seared and burned their covering of flowers and grasses, they are by no means attractive. Ill. has enough wood-land to supply the home requirements. The trees commonly found are various species of maple, oak, walnut, hickory, ash and lime trees, etc. In the S. and E. yellow poplars and birches are abundant, and on the borders of the Ohio are found cedars and yellow pines.

Population.—Ill. is one of the most rapidly-growing states of the Union. The number of inhabitants according to the decennial census reports has been as follows:

		Inc. in per cent.
1810	12,282	
1820	55,162	357
1830	157,445	185
1840	476,183	139
1850	851,470	85
1860	1,711,951	101
1870	2,539,891	48

The white population greatly predominates, being, in 1870, 2,511,096. The remainder included 28,762 colored persons, 15 Chinese and 32 Indians. With regard to nativity, the census gives the following numbers: Natives of the United States; 2,024,693 (including 1,189,503 natives of the state; 86,807 of Ind.; 11,384 of Iowa; 67,702 of Ky.; 12,588 of Md.; 22,156 of Mass.; 30,872 of Mo.; 8,213 of N. H.; 16,336 of N. J.; 133,491 of N. Y.; 163,012 of Ohio; 98,614 of Pa.; 47,514 of Tenn.; 18,515 of Vt.; 35,742 of Va. and W. Va.; and 12,771 of Wis.); natives of foreign countries, 515,198; including 32,550 of British America, 203,758 Germans, 53,866 Englishmen, 120,162 Irishmen, 15,733 Scotchmen, 4,180 Dutchmen, 29,979 Swedes, and 8,980 Swiss.

In the various useful occupations there were engaged 742,015 persons. Of these there were in agriculture, 376,441; in professional and personal services, 151,931; in trade and transportation, 80,422; and in manufactures and mechanical and mining industries, 133,221.

Mineral Resources.—The productive coal measures occupy the portion of Ill. lying S. of a line drawn from Rock R. in a westerly direction to La Salle co., and thence S. E. to the state boundary. Their area is estimated at 45,000 sq. mls., but their depth is not great. The coal is bituminous, and contains from 4 to 20 per cent. of incombustible materials. In 1870 over 400 coal mines were in operation, and the product amounted to 2,500,000 tons. Joe Daviess co. belongs to the great lead region of the northern Mississippi. The ore is a silver-bearing galena, and from this mineral the city of Galena derives its name. Copper abounds in northern Ill., on the Peckatonica R. and Plum Cr. Lime, zinc, freestone, gypsum and a fine, variagated marble are among the other mineral treasures. Chalybeate and sulphur springs are found in Jefferson co.; other medicinal springs between Ottawa and Peru, and salts springs in Jackson, Vermillion and Gallatin cos.

Agriculture.—Ill. surpasses any other state in the Union in the fertility of its soil. Some of the prairies and bottom-lands are said to be overlaid by loam and mould from 25 to 100 feet thick. The "American Bottom," on the Missis-

sippi, between the mouths of Kaskaskia and Missouri Rs., contains 288,000 acres of the very richest land, and the narrower bottoms of other streams are not less fertile.

The improved land amounted to 19,329,952 acres in 1870, or more than one-half the total area of the state; the woodland to 5,061,578 acres, and the other unimproved land in farms to 1,491,331 acres. The cash value of farms was $920,506,346; the estimated value of farm products, including betterments and increase of stock, $210,860,585; of orchard products, $35,71,789; of market gardens, $765,992; of forest products, $1,087,144, and of animals slaughtered, $56,718,944. The farms produced 10,133,207 bush. of spring wheat; 19,995,198 bush. of winter wheat; 2,456,578 bush. of rye; 129,921,395 bush. of Indian-corn; 42,780,851 bush. of oats; 2,480,400 bush. of barley; 10,944,790 bush. of Irish pot's; 322,641 bush. of sweet pot's; 5,249,274 lbs. of tobacco; 465 bales of cotton; 5,739,249 lbs. of wool; 111,882 gallons of wine; 1,960,473 gallons of sorghum molasses; 36,080,405 lbs. of butter, and 2,747,339 tons of hay.

The live stock had a value of $149,756,698, and comprised 853,738 horses, 85,075 asses and mules, 640,321 milch cows, 19,766 working oxen, 1,055,499 other cattle, 1,568,288 sheep, and 2,703,343 swine.

Manufactures in Ill. have increased of late very rapidly. In 1870 there were 12,597 manufacturing establishment against 4,268 in 1860; and the total value of products had increased during the decade from $57,580,887 to $205,620,672. The manufacturing industry employed, in 1870, 2,330 steam-engines with 73,091 horse-power, and 82,979 hands, and consumed raw materials to the amount of $127,600,077. The capital invested was $94,368,057, and the amount of wages paid was $31,100,244. The counties most largely engaged in manufacturing were: Coles, including the city of Chicago, which turned out products to the amount of $92,518,742; Peoria, with $8,844,493 worth of goods; then follow Adams, Rock Island, St. Clair, Kane, McLean and Winnebago. The products in detail amounted to the following values: Flour and meal, $43,876,775; packed pork, $19,818,851; agricultural implements, $8,880,390; distilled liquors, $7,888,751; men's clothing, $7,429,363; planed lumber, $7,290,465; sawed lumber, $4,546,769; carpentering and building, $6,785,264; boots and shoes, $4,443,794; malt beer, $4,154,224, etc.

Commerce and Communications.—The situation of Ill. with regard to commerce is highly favorable. The Great Lakes afford an outlet for its produce to the east and the Mississippi and Ohio Rs. to the south. A canal, 100 mls. long, has been constructed from Chicago to Peru, connecting the waters of Lake Michigan with those of the Mississippi. A net work of railroads connects every portion of the state with the great commercial centers of the country. The aggregate mileage of railroads has increased from 2,998 in 1862 to 5,904 in 1872. H. V. Poor's Railroad Manual enumerates 15 lines, the most important of which are: The Belleville & Southern Illinois R. R., connecting Belleville with Duquoin (56 mls.); the Chicago & Alton R. R. (359 mls.); the Chicago, Burlington & Quincy R. R. (705 mls.); the Chicago, Rock Island & Pacific R. R., (544 mls.); the Illinois Central R. R. (707 mls.), connecting Cairo with Dunleith and Centralia with Chicago; the Indianapolis, Bloomington & Western R. R. (202 mls.), connecting Indianapolis, Ind., with Pekin; the Peoria, Pekin & Jacksonville R. R. (83 mls.); the Rockford, Rock Island & St. Louis R. R., (319 mls.); the St. Louis, Alton & Terre Haute R. R. (219 mls.); the St. Louis, Vandalia & Terre Haute R. R. (158 mls.); the Toledo, Peoria & Warsaw R. R. (246 mls.), and the Western Union R. R. (180 mls.), connecting Racine, Wis., with Savannah and Port Byron, Ill.

Education.—Ill. is provided with most excellent schools. In 1870 there were 11,050 public schools, with 20,097 teachers (8,791 male and 11,306 female); and 677,623 pupils. The total income of these schools was $7,810,265, mostly raised by taxation and public funds. The 80 classical, professional and technical schools had 371 teachers and 11,755 pupils, and the 705 other not public schools, 3,388 teachers and 78,397 pupils. The six universities had 56 teachers and 1,277 students (including 148 females).

The State Industrial University, founded by act of the legislature in 1867, and located in Champaign co., was opened in 1868. It has over 1,000 acres of improved farming lands, 40 acres of which have been set apart for gardens, nurseries and specimen orchards. The remainder is to be used for experimental and stock farms. The course of this institution is science, literature and arts. Neither the classical nor modern languages are taught. The State Normal University was opened in October, 1857, near the city of Bloomington, and is in a prosperous condition.

In 1870 there were published in Ill. 439 newspapers and periodicals, viz.: 40 dailies, 14 semi and tri-weeklies, 328 weeklies, 10 semi-monthlies, 56 monthlies and 1 quarterly. Among them were 27 German, 4 Swedish, 2 Danish, 1 Bohemian and 1 French. Among the daily papers the following had the largest circulation: "Chicago Times," 35,000; "Chicago Journal," 15,000; "Chicago Post," 15,000, and the "Staats Zeitung," 12,000. Among the weeklies: "Chicago Times," 45,000; "Chicago Advance," 21,000; "Chicago Prairie Farmer," 35,000; "Chicago Western Rural," 35,000; and among the monthlies: "Chicago Little Corporal," 60,000; "Chicago National Sunday-school Teacher," 40,000. The state and school libraries contained 592,711 volumes, and the Sunday-school libraries 501,273 volumes.

Penal, Reformatory and Charitable Institutions.—The State Penitentiary is located at Joliet. A board of commissioners, having charge of the institution, is appointed by the Governor, and this board selects a warden, who has the general management of the prison. The labor of the convicts is leased to persons engaged in special pursuits; but the state retains complete control of their discipline and government. The State Orphan School for juvenile offenders is located at Pontiac, and though but recently organized, is expected to exercise a salutary influence. The other charitable institutions of the state are mostly located at Jacksonville, and comprise the Institution for the Deaf and Dumb, which receives pupils between 10 and 21 years of age; the State Hospital for the Insane, which can accommodate 500 patients, and has a large and productive farm; the Institution for the Blind; the Institution for Idiots and Imbeciles, and the Soldiers' Orphan Home. The erection of a State Inebriate Asylum has been recommended to the Legislature by Governor John M. Palmer, and is likely to be ordered.

Wealth, Taxation and Debt.—The true value of real and personal estate in 1870 was $2,121,680,579, whereas the assessed value was but $482,899,575, of which $348,433,906 were for real estate and $134,465,669 for personal estate. The total taxation, not national, amounted to $21,825,008, of which $3,620,681 were state taxes, $5,242,137 county taxes, and $12,962,190 town and city taxes. The collections on account of state revenue, for the two fiscal years from Dec. 1, 1870, to Dec. 1, 1872, were $3,415,386.86. On Dec. 1st, 1870, the debt of the state was $4,890,937; during the year 1871 it was increased to $5,140,937, by the issue of $250,000 bonds to the city of Chicago, in part payment for money expended by that city in deepening the Illinois & Michigan Canal. On the 9th of Jan., 1871, $2,983,307 were called in for redemption, and paid in coin. From Dec. 1, 1870, to Dec. 1, 1872, the debt was reduced $3,080,787, and the total of the outstanding debt on the latter day was $2,060,150. The county debt in 1870 amounted to

$12,817,922, and the town and city debt to $24,483,010.

Government.—The Governor, Lieutenant-Governor, Secretary of State, Auditor, Treasurer and Superintendent of Public Instruction are elected by the people for four years. The general election is held on the first Tuesday in November. The Senate consists of 51 members, elected for 4 years; the House of Representatives of 153 members, elected for 2 years. The Legislature meets biennially, on the first Monday in January, in the odd years, 1871, 1873, etc. The Governor has the veto power; but vetoed bills become laws if passed in both houses by a two-thirds majority.

The Supreme Court has appellate jurisdiction only, and consists of three divisions, corresponding to three divisions of the state. There are 28 Circuit Courts, presided over by as many judges. These courts have original jurisdiction in civil cases of all sums over $100, and concurrent jurisdiction with the justices of inferior courts of all sums under $100 and over $20. Each county has a county court, with jurisdiction to the same amount as justices of the peace.

Ill. is divided into the following 102 counties: Adams, Alexander, Bond, Boone, Brown, Bureau, Calhoun, Carroll, Cass, Champaign, Christian, Clark, Clay, Clinton, Coles, Cook, Crawford, Cumberland, De Kalb, De Witt, Douglas, Du Page, Edgar, Edwards, Effingham, Fayette, Ford, Franklin, Fulton, Gallatin, Greene, Grundy, Hamilton, Hancock, Hardin, Henderson, Henry, Iroquois, Jackson, Jasper, Jefferson, Jersey, Jo Daviess, Johnson, Kane, Kankakee, Kendall, Knox, Lake, La Salle, Lawrence, Lee, Livingston, Logan, McDonough, McHenry, McLean, Macon, Macoupin, Madison, Marion, Marshall, Mason, Massac, Menard, Mercer, Monroe, Montgomery, Morgan, Moultrie, Ogle, Peoria, Perry, Piatt, Pike, Pope, Pulaski, Putnam, Randolph, Richland, Rock Island, St. Clair, Saline, Sangamon, Schuyler, Scott, Shelby, Stark, Stephenson, Tazewell, Union, Vermillion, Wabash, Warren, Washington, Wayne, White, Whitesides, Will, Williamson, Winnebago, Woodford.

The state capital is Springfield; the largest city, Chicago. According to the last census there were in Ill. the following 42 incorporated cities: Chicago, Quincy, Springfield, Champaign, Morris, Watseca, Galena, Aurora, Elgin, Galesburg, Waukegan, La Salle, Mendota, Ottawa, Peru, Amboy, Dixon, Decatur, Alton, Centralia, Bushnell, Macomb, Bloomington, Litchfield, Jacksonville, Peoria, Mound City, Olney, Rock Island, Shelbyville, Belleville, Freeport, Pekin, Anna, Danville, Mt. Carmel, Monmouth, Sterling, Joliet, Canton, Rockford and El Paso.

Illinois City, p. v. in Rock Island co., Ill., on the Mississippi R., 16 mls. from Rock Island.

Illinois Grove, p. o. in Marshall co., Iowa.

Illinois River, a tributary of the Mississippi, and the largest river in Ill.; is formed by the Des Plaines and Kankakee Rs., which unite near Dresden, in Grundy co., and intersect the state from N. E. to S. W., emptying into the Mississippi R. 20 mls. N. of Alton. It is navigable for 285 mls., to the mouth of the Fox R. Its channel is being improved so as to afford a uniform depth during all seasons, of at least 4 feet, and the canal connecting it with Lake Michigan at Chicago is being enlarged. When these improvements are completed there will be an uninterrupted water communication from that lake to the Mississippi R.

Illiopolis, tn. in Sangamon co., Ill. Pop., 1,829.

Illiopolis, p. v. in the above tn., on the Toledo, Wabash & Western R. R., 16 mls. W. of Decatur. Pop., 395.

Indian, tn. in Plumas co., Cal. Pop., 880.

INDIANA, one of the states lying in the great Mississippi Valley; is bounded on the N. by Lake Michigan and the state of Mich., on the E. by Ohio, on the W. by Ill., and on the S. by Ky., from which it is separated by the Ohio R. It extends from 37° 51′ to 41° 46′ N. lat., and from 85° 48′ to 88° 1′ W. long. The area is 33,809 sq. mls., or 21,737,760 acres. The greatest length from N. to S. is 277 mls. and the greatest width from E. to W. 176 mls.

Ind. has no elevations prominent enough to be called mountains. Two-thirds of the state is level or but slightly undulating, and the remainder, though broken and rolling, is nowhere mountainous. The eastern is the highest portion of the state and has an average elevation of 800 or 900 feet. The surface thence gradually descends toward the W. and S. W., where it reaches the lowest point at the junction of the Wabash and Ohio Rs., which is only 297 feet above the sea level. Thus it will be seen that its inequalities present extremes of only 600 feet, a very small difference considering the extensive area of the state. The surface is, however, considerably diversified by the streams, most of which flow in valleys of erosion, skirted on both sides by steep slopes. Although but the margins of the general surface of the country, they are, locally, called "river hills." In the south-western corner of the state the river hills of the Ohio and Wabash form an exceedingly rugged and broken country. Several miles below the Falls of the Ohio, in Floyd co., commences a series of low and detached hills, called "The Knobs," trending N. They are from half a mile to somewhat over a mile wide, and produce a species of small pines, which is found in no other part of the state. Their height above the surrounding country rarely exceeds 200 feet.

Rivers.—Ind. belongs to the two great drainage systems of the St. Lawrence and Mississippi Rs. The latter includes by far the largest part of the state, the former only a portion of the most northern tier of counties. The watershed between them is nowhere marked by a ridge or a prominent elevation of the ground; it traverses Steuben, Noble, Kosciusko, St. Joseph, La Porte, Porter and Lake cos. The St. Lawrence system is represented by affluents of Lake Michigan, the largest of which is the St. Joseph R. This stream rises in Mich. and belongs to Ind. only with its most southern curve, in Elkhart and St. Joseph cos. It receives the Pigeon and Elkhart Rs. The only river of Ind. which flows directly into Lake Michigan is the Calumet. The Ohio R. washes the southern boundary of the state for a distance of nearly 400 mls. With the exception of the Wabash, its Ind. affluents are small streams, as Laughery Cr., Indian Cr., Kentucky Cr., Silver Cr., Great Blue R., Little Blue R., Anderson Cr., Little Pigeon Cr. and Pigeon Cr. Whitewater R. is formed by two branches which rise in Randolph co. and pass into Ohio, joining the Miami R. The Wabash R. rises in Ohio, flows N. W. as far as the vicinity of Huntington, Ind., then nearly due W. to beyond Logansport, and lastly turns to the S. W. and S., joining the Ohio at the S. W. corner of the state. Its entire course is over 600 mls. long. Formerly its commerce amounted to several millions of dollars, but its navigability has been much impaired by the accumulation of driftwood and other obstructions. With proper skill and an outlay of considerable sums of money it might be so improved that large steamboats could run up as far as Wabash Town, in Wabash co. Its principal affluents from the N. are Eel R., Tippecanoe R. and Big Pine Cr. Its affluents from the S. are Salamanie R., Mississinewa R. and Wild Cat Cr. The White R. is formed by the confluence of the East and West Forks, which unite at the S. W. corner of Daviess co., and with its numerous source streams and tributaries drains the S. central part of the state.

Climate and Vegetation.—The climate is somewhat milder than that of the same latitudes on the Atlantic coast. The winters are often very cold but of short duration, and heavy snows rarely cover the ground. The summers are hot, and on the whole salubrious. The difference in temperature between the northern and southern portions of the state is considerable. At Logansport the mean annual temperature is nearly 53° Fahr.; the maximum on the warmest day 102°, and the minimum on the coldest —10°. The average rain-fall is about 42.8 inches, of which the winter has 12.3; the spring, 10.5; the summer, 12.8, and the fall, 7.2. Fruit trees usually begin to bloom in March.

The extensive forests which formerly covered the state are disappearing rapidly. They consist mostly of deciduous trees, as black walnut, several species of oak, ash, maple, elm, hickory, beech, sycamore, poplar and whitewood, or tulip, tree.

Population.—Ind. was admitted into the Union as a state in 1816; in 1800 it had 5,641 inhabitants; in 1810, 24,520; in 1820, 147,178; in 1830, 343,031; in 1840, 685,866; in 1850, 988,416; in 1860, 1,350,428, and in 1870, 1,680,637. The great majority of the inhabitants, 1,655,837, are white; only 24,560 were colored, and the Indians numbered 240.

With regard to nativity, the population is distributed as follows: Born in the United States, 1,539,163, including 1,048,575 natives of the state; born in foreign countries, 141,474. Of these, 4,765 were born in British America, 6,362 in France, 78,056 in Germany, 9,945 in England, 28,698 in Ireland, 2,507 in Scotland, 873 in Holland and 523 in Poland.

The total population of over 10 years of age numbered 1,197,936. There were engaged in all classes of occupations 459,369; of whom 266,777 were engaged in agriculture; 80,018 in profes-

sional and personal services; 36,517 in trade and transportation, and 76,057 in manufactures and mechanical and mining industries.

Minerals and Mining.—Ind. includes a large portion of the Illinois coal region, to the extent of 7,800 sq. mls. Building materials are found extensively, as gray and blue limestone, on the Upper Wabash, Muscatatuck and Sand Crs.; white limestone, underlaying the coal-fields and cropping out at the surface in the cos. of Crawford, Harrison, Washington, Orange, Lawrence, Monroe, Owen and Putnam. It is very soft when quarried, but on being exposed to the air becomes very hard. An excellent sandstone of fine grain, and resembling the Chemung Sandstone of N. Y., or the Portsmouth Freestone of Ohio, is quarried in the eastern parts of the state. Iron, gypsum, some copper and grindstones are the other mineral products of Ind.

Agriculture.—The soil is generally productive, while the bottom-lands of the streams are very rich and deep; especially those of the Ohio and the Wabash, with its tributaries, above Terre Haute. The uplands between the water-courses, though less fertile, yield fair returns to the cultivator.

The principal staple of Ind. is Indian-corn, of which there were produced, in 1870, 51,094,538 bush., and in the following year 79,205,000 bush. on 2,218,627 acres. The wheat crop in 1870 was 27,747,222 bush.; but had fallen off in 1871 to 19,190,000 bush. Oats were produced in the two years, respectively, to the extent of 8,590,409 and 11,784,000 bush.; rye, 457,468 and 423,000 bush.; barley, 356,262 and 352,000 bush.; Irish pot's, 5,399,044 and 2,436,000 bush.; tobacco, 9,325,392 and 8,316,000 lbs. The other products in 1870 were: 150,705 bush. of sweet pot's; 22,915,385 lbs. of butter; 283,807 lbs. of cheese, and 1,076,768 tons of hay.

The improved land measured 10,104,279 acres, or nearly one-half of the entire area of the state. The woodland in farms was 7,189,334 acres, and the other unimproved land, 826,035 acres. The cash value of farms was $634,804,189, and of farming implements and machinery, $9,676,348. The value of farm productions, betterments and additions to stock, was estimated at $122,914,302, and of slaughtered animals, $30,246,962.

Ind. had, in 1870, 497,883 horses, 43,250 mules and asses, 393,736 milch cows, 14,088 working oxen, 618,360 other cattle, 1,612,680 sheep, and 1,872,230 hogs. The value of all live stock was $83,776,782.

The Manufacturing industry is not yet very largely developed, but is steadily growing in extent. In 1860 the value of all products was $41,840,434; in 1870, $108,617,278. The last census reports 11,847 establishments with 2,881 steam-engines (of an aggregate of 76,851 horse-power); 58,852 hands, and $52,052,425 invested capital. The raw materials used amounted to $63,135,492, and the wages paid $18,366,780.

The most important manufactures were: Agricultural implements, $2,128,794; boots and shoes, $2,699,114; carriages and wagons, $3,448,959; freight and passenger cars, $2,577,726; men's clothing, $2,261,374; flour and meal, $25,371,322; furniture, $3,826,930; forged and rolled iron, $2,845,005; pig iron, $1,191,834; iron castings, $2,592,908; leather, tanned and curried, $2,461,549; whisky, $2,038,420; beer, $1,315,116; sawed lumber, $12,324,755; machinery, including steam-engines and boilers, $3,881,024; packed pork, $2,780,021, and woollen goods, $4,212,737.

Commerce and Railroads.—The commercial activity is greatly facilitated by the navigable rivers, the lake (on which the state borders), canals, and a railroad net which extends to every part, and is still expanding. The Erie & Wabash Canal connects the Ohio with the great lakes. It seems not to fulfill the great expectations of its projectors, and is at present used by small craft only, as far as La Fayette. The Whitewater Canal extends from Hagerstown to Lawrenceburgh, is 75 mls. long, and passes by Brooksville, Connersville and Cambridge. Ind. had, in 1862, 2,175 mls. of railroad, and ten years later, 3,529.

The following are the most important lines: Chicago, Cincinnati & Louisville R. R., connecting La Porte with Peru (73 mls.); Cincinnati & Indianapolis Junction R. R., connecting Hamilton, Ohio, with Indianapolis (98 mls.), and Connersville with New Castle (25 mls.); Cincinnati, Richmond & Fort Wayne R. R., (42 mls.); Columbus, Chicago & Indiana Central R. R., connecting Columbus, Ohio, with Indianapolis (188 mls.), Bradford Junction, Ohio, with Chicago (231 mls.), Richmond with Logansport (107 mls.), and Logansport to Ill. state line (61 mls.); Evansville & Crawfordsville R. R. (132 mls.); Indianapolis, Cincinnati & La Fayette R. R. (179 mls.); Indianapolis, Peru & Chicago R. R., connecting Indianapolis with Michigan City (161 mls.); Indianapolis & St. Louis R. R. (72 mls.); Indianapolis & Vincennes R. R. (117 mls.); Jefferson, Madison & Indianapolis R. R., connecting Louisville, Ky., with Indianapolis (110 mls.), Madison with Columbus (45 mls.), Jeffersonville with New Albany (6 mls.), and Columbus with Cambridge City (65 mls.); Louisville, New Albany & Chicago R. R. (288 mls.); Ohio & Mississippi R. R., connecting Cincinnati with East St. Louis, Ill. (340 mls.), and North Vernon with Louisville, Ky. (53 mls.); Terre Haute & Indianapolis R. R. (93½ mls.); Toledo, Wabash & Western R. R., connecting Toledo, Ohio, with Camp Point, Ill. (451½ mls.), and intersecting the N. part of the state; and the White Water Valley R. R., connecting Valley Junction, Ohio, with Hagerstown (70 mls.)

Wealth, Taxation and Debt.—The estimated value of real and personal estate in 1870 was $1,268,180,543, but the assessed value of the same amounted to only $663,455,044; $203,334,070 representing the personal property and $460,120,974 the real estate. The state taxes were $2,943,078; county taxes, $4,654,466, and town and city taxes $3,193,577, making the total taxation $10,791,121.

The entire indebtedness in said year was $7,818,710, which included $4,167,507 state debt, $1,127,269 county debt, and $2,523,934 town and city debt. On the 1st day of Nov., 1872, the state debt was $3,905,906.27, showing a decrease since the census was taken of $261,601. The school fund bonds (now negotiable) are the chief item of the state debt, viz.: $3,729,016.

The receipts of the treasury during the fiscal year ended on Oct. 31, 1872, including cash on hand from the year preceding, were $5,450,558.22, and the disbursements $2,687,201.85, leaving, on Nov. 1, 1872, cash in the treasury, $763,356.37.

Education.—The sum expended in the state for tuition in all schools amounted (1870) to $2,499,511, mostly derived from taxation.

Ind. has six universities. The State University at Bloomington, Monroe co., was opened in 1824, and comprises a college of arts, literature and science, a college of law, a college of civil engineering, a college of military science and a normal school; "all manned," as the report of the State Superintendent, for 1870, says, "with competent and able instructors." The libraries embrace over 5,000 volumes, and the philosophical and chemical apparatus is very complete. The faculty consists of the president, ten professors and two tutors; the number of students was, in 1870, 304. Indiana Asbury University, located at Greencastle, Putnam co., is under the control of the Methodists. Wabash College, with which a military department is connected, is at Crawfordsville; Earlham College, near Richmond; the University of Notre Dame, at Notre Dame; Salem College, at Bourbon; Fort Wayne College and Concordia College, at Fort Wayne. In 1870 there were in the state 8,871 public schools (including 69 high and 371 graded schools), with 11,042 teachers and

446,076 pupils, with an income of $2,063,599. The 32 classical institutions (colleges and academies) had 268 teachers, and 6,682 pupils. The four professional schools had 10 teachers and 137 pupils, and the 14 technical schools had 33 teachers and 1,518 pupils. The number of private and parochial schools was 152, with 285 teachers and 10,064 pupils.

The Charitable and Penal Institutions are: The Asylum for the Deaf and Dumb, the Institution for the Education of the Blind, the Indiana Hospital for the Insane, the Indiana Reformatory Institute for Women and Girls, the House of Refuge, near Plainfield, and the Soldiers' Home, which is exclusively for the care of orphan children of soldiers. There are two state prisons, the one styled the State Prison North, at Michigan city, and the other, the State Prison South, at Jeffersonville.

Government.—The Governor, Lieutenant-Governor, Secretary of State, Treasurer, Auditor, Attorney-General and Superintendent of Public Instruction are chosen by the people at the general election, held on the second Tuesday of October. The Governor and Lieutenant-Governor hold office four years; the others two years. The legislature meets biennially in the month of January, in the odd years, 1873, 1875, etc., and comprises a Senate of 50 members and a House of Representatives of 98 members.

The judiciary consists of a Supreme Court, Circuit Courts and a Court of Common Pleas. The Supreme Court is composed of four judges, chosen by the people for seven years; the judges of the Circuit Courts are elected for six years, and those of the Court of Common Pleas for four years.

Ind. is divided into the following 92 counties: Adams, Allen, Bartholomew, Benton, Blackford, Boone, Brown, Carroll, Cass, Clarke, Clay, Clinton, Crawford, Daviess, Dearborn, Decatur, De Kalb, Delaware, Dubois, Elkhart, Fayette, Floyd, Fountain, Franklin, Fulton, Gibson, Grant, Greene, Hamilton, Hancock, Harrison, Hendricks, Henry, Howard, Huntington, Jackson, Jasper, Jay, Jefferson, Jennings, Johnson, Knox, Kosciusko, La Grange, Lake, La Porte, Lawrence, Madison, Marion, Marshall, Martin, Miami, Monroe, Montgomery, Morgan, Newton, Noble, Ohio, Orange, Owen, Parke, Perry, Pike, Porter, Posey, Pulaski, Putnam, Randolph, Ripley, Rush, Scott, Shelby, Spencer, Starke, Steuben, St. Joseph, Sullivan, Switzerland, Tippecanoe, Tipton, Union, Vanderburgh, Vermillion, Vigo, Wabash, Warren, Warrick, Washington, Wayne, Wells, White, Whitley.

The state capital is Indianapolis. The other incorporated cities are: Fort Wayne, Logansport, Jeffersonville, Lawrenceburgh, Goshen, Connersville, New Albany, Seymour, Madison, Franklin City, Vincennes, La Porte, Peru, Crawfordsville, Kendallville, Valparaiso, Shelbyville, Greencastle, South Bend, La Fayette, Evansville, Terre Haute, Wabash City, Richmond, Columbia.

Indiana, tn. in Marion co., Iowa. Pop., 1,332.

Indiana, co. in Pa., W. central part. Pop., 36,138; in 1860, 33,681. It is bounded on the S. by the Conemaugh R. and intersected by Little Mahoning Cr., Plum Cr., Black Lick Cr. and Yellow Cr. Chestnut Ridge intersects the co. from S. W. to N. E.; the remainder of the surface forms a gently rolling table-land. The Pennsylvania Central R. R. extends along the Conemaugh R. and the Indiana Branch of the same intersects the co. from S. to N., terminating at Indiana, the co. seat. Agr. productions in 1870: Wheat, 308,183 bush.; rye, 97,550 bush.; oats, 906,255 bush.; Indian-corn, 652,263 bush.; Irish pot's, 77,367 bush.; sweet pot's, 51 bush.; butter, 1,100,925 lbs.; hay, 38,749 tons. Cash value of farms, $12,945,069. Total, estimated, value of all farm productions, including additions to stock, etc., $2,640,875. Value of manufactures, $1,393,408.

Indiana, tn. in Alleghany co., Pa. Pop., 2,806.

***Indiana,** p. bor. and co. seat of Indiana co., Pa.; is the northern terminus of the Indiana Branch of the Pennsylvania Central R. R., 19 mls. from Blairsville. It is a shipping point for produce and lumber and has important manufactories. Pop., 1,605. Three newspapers.

***Indianapolis,** city and co. seat of Marion co., and capital of Indiana, on the West Fork of White R. and on the Indianapolis, Cincinnati & La Fayette R. R., 115 mls. W. N. W. of Cincinnati and 195 mls. S. E. of Chicago. It is the eastern terminus of the Indianapolis & St. Louis R. R., 261 mls. E. of East St. Louis, and of the St. Louis, Vandalia, Terre Haute & Indianapolis R. R.; the north-eastern terminus of the Indianapolis & Vincennes R. R., the northern terminus of the Jeffersonville, Madison & Indianapolis R. R.; the north-western terminus of the Cincinnati & Indianapolis Junction R. R.; the western terminus of the Pittsburgh, Cincinnati & St. Louis R. R.; the south-western terminus of the Cleveland, Columbus, Cincinnati & Indianapolis R. R., the southern terminus of the Indianapolis, Peru & Chicago R. R., and the south-eastern terminus of the Indianapolis, Bloomington & Western R. R.

Indianapolis is situated on an extensive plain, which is very productive and in a high state of cultivation. The first settlement on the spot now occupied by the city was effected in 1819, and the next year the seat of government was located there. In 1824 the state archives were removed thither from Corydon, and in Jan., 1825, the Legislature commenced its first session. It was incorporated as a city in 1836, and is now one of the most beautiful, prosperous and important places W. of the Alleghany Mts.

In 1850 it had 8,091 inhabitants; in 1860, 18,611, and in 1870, 48,244, making it the 27th largest city in the Union. The natives of the United States numbered 37,587, of whom 34,664 were whites and 2,920 colored persons. The foreign-born population was 10,657, including 5,286 Germans, 698 Englishmen, 3,579 Irishmen and 258 Scotchmen. The number of persons engaged in all classes of occupations was 18,615, of whom 210 were engaged in agriculture, 6,706, in personal and professional services, and 6,916 in manufactures and mechanical industries.

Indianapolis is regularly laid out, the streets crossing each other at right angles, excepting four diagonal streets, which diverge from a circular area in the center. There are about 50 churches in the city, many of which are substantial and beautiful structures. The following are the principal public buildings: The State House on Washington st., erected in 1835, and containing the Governor's rooms, the archives, the state library, and the halls of the Assembly; the State Lunatic Asylum, founded in 1848, but greatly enlarged since; the State Institution for the Blind, founded in 1847; the State Institute for the Deaf and Dumb, founded in 1848; the Reformatory for Women and Girls, located east of the city; the United States Arsenal, 1 mle. N. by E. of the city limits; the Northwestern Christian University; Odd Fellows' Hall, Academy of Music, United States Post-office, containing also the chambers for the United States courts; and the Masonic Hall.

The Union R. R. Depot is an immense structure 420 feet long. All trains on the railroads centering at Indianapolis start from or arrive here.

The system of public graded schools is excellent, and the city is justly famous for its superior educational institutions.

The manufacturing interests are very extensive and constantly increasing. The products of industry, as enumerated in the article

on Marion co., were chiefly turned out by the establishments of the city.

The number of newspapers published here is 34, of which the following are the most prominent: "Indianapolis Journal," Republican, two daily editions (morning and evening) and one weekly; "Indianapolis Daily Sentinel," Democratic, daily and weekly; the "Commercial," Republican, daily and weekly; the "Evening News," independent, daily and weekly; the "Telegraph," daily and weekly; the "Indianapolis Little Sower," monthly; and the "Indianapolis Northwestern Farmer," monthly.

Indian Stream, a small tributary of the Connecticut R. in the N. part of Coos co., N. H.

Indian Territory is bounded on the N. by Kans. and Colo.; on the W. by Tex. and Colo.; on the S. by Tex., and on the E. by Mo. and Ark. The Red R. forms part of its southern boundary. The area is 68,991 sq. mls., or 44,154,240 acres.

Surface.—The territory forms part of that vast inclined plain which slopes gradually down from the base of the Rocky Mts. to the Mississippi R. Several groups and chains of mountains rise in the region between the Red R. and the Canadian R., as the Washita Mts., the Poteau Mts., and the Sans Bois Mts. The valleys of the rivers in the eastern part have broad and fertile bottom-lands, which are generally bordered by more or less abrupt bluffs, separating them from the rolling or undulating uplands. The western part of the territory is on the whole an arid region, and belongs to what was formerly called the "Great American Desert."

Rivers.—The Arkansas R. enters the territory from the N., intersects it in a south-easterly direction, and leaves it near the middle of the eastern boundary. Its northern tributaries are the Verdigris and Little Verdigris Rs., the Neosho R. and Flint Cr. The western tributaries are the Little Arkansas R., Black Bear R., Cimarron, or Red Fork of the Arkansas, the Canadian R., with Rabbit Ear Cr., or North Fork, and Poteau R. The Red R., which washes the southern border of the territory, receives the North Fork, Cedar Cr., with numerous branches draining the valleys of the Washita Mts.; Muddy Cr.; Walnut Cr.; Ouachita R., Baggy R., and Kianashi R.

The Climate of the territory is warm and on the whole dry. The south-eastern is the hottest part, and has a mean annual temperature of more than 60°. In the north-western part the mean annual temperature is but 55°. The rainfall decreases from 52 inches per annum in the south-eastern extremity of the territory to 35 inches in the central portions, and to less than 20 inches in the north-western corner.

The territory is mostly covered with prairies. The river courses are fringed with a growth of cottonwood and other deciduous trees. The "Cross Timbers," a belt of wood-land varying in width from 5 to 30 mls., extend from the Arkansas R. in a south-westerly direction for more than 500 mls., to the Brazos R., in Tex. They separate the arable region in the E. from the arid and mostly sterile prairies and plains in the W.

Population.—Ind. Ter. was set apart by the federal government as a permanent home for the aboriginal tribes, either indigenous or removed thither from the eastern part of the United States.

According to the ninth census, the aggregate population in 1870 was 68,152, including 2,407 whites, 6,378 colored persons and 59,367 Indians. Less than half of the latter, or 24,967, lived on reservations and at agencies; while 34,400 led a nomadic existence. The following are the principal tribes or nations who are settled on reservations: the Cherokees, Creeks, Chickasaws, Choctaws, Senecas and Quapaws. They have made considerable advances in civilization, carry on agriculture and some branches of manufacturing, and have schools, and newspapers printed in their own language.

IOWA occupies a position between the Mississippi R. on the E. and the Missouri R. on the W., and is unsurpassed for its advantages in commerce and industry. It is bounded on the N. by Minn., on the S. by Mo., on the E. by Ill. and Wis., and on the W. by Dak. and Nebr. Its length from E. to W. is about 300 mls., and its width from N. to S. 208 mls. It lies between 40° 25′ and 43° 30′ N. lat., and 90° 18′ and 96° 53′ W. long. The area is 55,045 sq. mls., or 35,228,800 acres.

Surface.—Iowa forms part of a vast plain, and there are no mountains or ranges of hills within the state. The only slopes and surface diversities are formed by the streams, many of which have cut deep valleys into the general level. The highest portion of the state is the water-shed, dividing the rivers which empty into the Mississippi R. from those which empty into the Missouri R. This broad and gently undulating water-shed is highest in the N., and gradually falls off in elevation toward the S. It is in reality the southern section of the so-called "Coteau des Prairies," the northern section of which extends through Minn.

The lowest point of the state is the S. E. extremity, at Keokuk, where the Des Moines R. empties into the Mississippi R. It is 444 ft. above the level of the ocean. Burlington is but 42 ft. higher, and Davenport 84 ft. The most elevated section of the state is near Spirit Lake, in the N. W. part, which is 1,694 ft. above the sea level. Thus the irregularities of the surface lie within the limits of 444 and 1,694 ft., a difference of but 1,250 ft.

Rivers and Lakes.—All the rivers of Iowa are tributaries of either the Mississippi R. or the Missouri R., and have, in accordance with the general slopes of the state, south-easterly or south-westerly courses. The rivers which join the Mississippi are generally larger than those joining the Missouri R., and drain nearly two-thirds of the area of the state. Foremost amongst these is the Des Moines, which rises a few miles beyond the border in Minn. and intersects Iowa from N. W. to S. E., entering into the Mississippi R. near Keokuk. It is formed by the East and West branches, which unite in Humboldt co. The valley below Fort Dodge has a well-marked flood plain or bottom, through which the river pursues a winding course. The sides are irregular, sloping sometimes abruptly, but mostly blending with the uplands. The principal tributaries of the Des Moines are upon its western side. The valleys of the Des Moines and its branches are destined to become the seat of extensive manufactories, both in consequence of their abundant water-power, and the fact that the main valley traverses the entire length of the Iowa coal field. Skunk R. flows along the border of the lower coal field; its course is S. E. Iowa R. rises in Hancock co. and flows in Hardin co. across the S. E. corner of the Iowa coal field. Below its junction with the Cedar R. its valley is broad and flat. Bluffs of 100 and 150 ft. in height border its southern side. The Cedar R., which should really be regarded as the main stream, is the principal tributary of the Iowa. Wapsipinnicon R. has its sources near those of the Cedar, and flows parallel with it. Compared with its length it drains but a small area. In consequence of this it is not subject to considerable floods, and mill sites do not often occur in its course. Maquoketa R. rises in Fayette co. and has a more easterly direction than the rivers to the S. of it. The depth of its valley is often 200 ft. below the general level of the uplands, and has a more wild and romantic aspect than the valleys of the rivers just named. Turkey R. rises in Howard co. That portion of its valley which lies in Fayette and Clayton cos. is a deep gorge with precipitous sides. Its fall is so great that water-power is abundant. The Upper Iowa R. rises in Minn. just beyond the border of Iowa, and its course is nearly eastward. Its valley is the deepest of any in Iowa, being in its lower portion 400 ft. below the general level of the uplands.

The tributaries of the Missouri R., which form the western drainage system of Iowa, are comparatively small and unimportant; or, if large, belong to this state with their upper courses only. Chariton and Grand Rs. rise in the southern part of Iowa and pass into Mo.

The Platte R. rises in Union co., but belongs mainly to Mo. One Hundred and Two R. is represented in Taylor co. by its East and West Forks. The East, Middle and West Nodaway Rs. traverse drift valleys, with beautifully sloping and undulating sides, and drain one of the finest agricultural districts of the state. The East and West Nishnabotany Rs. have so eroded their valleys that the drift deposit is exposed along their entire length. The main stream joins the Missouri R. a short distance beyond the limits of Iowa. Boyer R., Soldier R. and Little Sioux R. flow between tolerably high and sloping banks. Rock R. is so named from the fact that exposures of quartz rock occur along the main branch in Minn. In Iowa it is essentially a drift stream, with gently sloping banks. The Big Sioux R. rises on the Coteau des Prairies, in Dak. Ter., and then forms the northern portion of the western boundary of Iowa. It joins the Missouri at Sioux City. The Missouri R., as far as it forms the boundary of this state, is bordered by bluffs.

The lakes of Iowa are small. They are either drift lakes, that is, such as had their origin in the depressions left in the surface of the drift at the close of the glacial epoch, or they are alluvial lakes, which were formed by the action of the rivers while cutting out their valleys from the general surface of the country. The drift lakes are mostly located near the head waters of the principal streams. Such are Spirit and Okoboji lakes in Dickinson co., Clear Lake in Cerro Gordo co., and Storm Lake in Buena Vista co. Okoboji Lake has the shape of a horse shoe. It receives the outlet of Spirit Lake, and is itself drained by the Little Sioux R.

Climate.—The climate of Iowa is free from injurious extremes. Its general character is a salubrious dryness. Observations at Iowa City, commenced in 1839 and continued to the present time, give a mean annual temperature of 47.57° Fahrenheit, which was thus distributed through the year: January, 21.75°; February, 24.81°; March, 34.75°; April, 48.50°; May, 59.06°; June, 67.92°; July, 72.51°; August, 70.70°; September, 63.37°; October, 49.58°; November, 35.28°; December, 23.55°. The mean temperature of spring was 47.44°; summer, 70.37°; autumn, 44.52°, and winter, 23.37°. Iowa lies within the zone of variable winds. W. and N. N. W. winds may be considered as predominating, while S. and S. E. winds are least frequent. According to the long-continued observations, above mentioned, the wind blew from the N. N. E. 70 days; from the E. S. E. 76 days; from the S. S. W. 105 days, and from the W. and N. N. W. 114 days; or easterly winds prevailed 146 days and westerly winds 219 days.

The mean annual fall of rain and snow, reduced to water, is 44.27 inches, which is more than might be expected from the inland posi-

tion of the state. In 1851 there was the extraordinary fall of 74.49 inches: the least fall was in 1854, viz.: 23.35 inches. August is the month in which usually the greatest amount of rain falls. January is the dryest month.

Vegetation.—Iowa has throughout a very fertile soil. Geologists estimate the productive area of the state at 95 per cent. of the whole. Three-fourths of the surface, including the uplands, are open prairies; the river courses are skirted by woodland belts, consisting generally of maple, birch, buckeye, hickory, walnut, locust, sycamore, cottonwood, oak, basswood and elm. The quantity of timber is sufficient for all economical purposes, in the present state of settlement. Attempts to raise forest trees on the prairies have been eminently successful, and it is asserted that by this means timber is now growing faster in Iowa than the consumption demands. If the annual burning of the prairies were prohibited, forests would probably soon spontaneously spring up and grow thriftily on most of the prairie region.

Population.—Iowa is rapidly increasing in population and wealth. In 1840 it had 43,112 inhabitants; in 1850, 192,214; in 1860, 674,963, and in 1870, 1,194,020. The whites numbered in the latter year, 1,188,207; the colored people, 5,762, and the Indians, 348, of whom about 300 sustained tribal relations. The natives of the United States largely exceed the foreign population, numbering 989,328, of whom 428,620 were natives of the state; 64,083 of Ind.; 14,186 of Ky.; 5,943 of Me.; 5,972 of Md.; 8,929 of Mass.; 8,918 of Mich.; 2,683 of Minn.; 13,831 of Mo.; 5,057 of N. H.; 5,688 of N. J.; 79,143 of N. Y.; 3,612 of N. C.; 73 435 of Pa.; 6,015 of Tenn.; 12,204 of Vt.; 19,558 of Va. and W. Va., and 24,319 of Wis. The foreign-born population numbered 204,692; of whom 17,907 were natives of British America; 2,827 of Denmark; 3,130 of France; 66,160 of Germany; 16,660 of England; 40,124 of Ireland; 5,248 of Scotland; 1,967 of Wales; 17 566 of Norway; 10,796 of Sweden, and 3,937 of Switzerland. Thus is the population of this state in the true sense of the word cosmopolitan.

Occupations.—Of the 837,959 inhabitants of Iowa of 10 years of age and over, 344,276, or nearly one-half, were engaged in all classes of useful occupations, to wit: 210,263 in farming; 58,484 in professional and personal services; 28,210 in trade and transportation, and 47,319 in manufacturing, mining and the mechanical trades.

Agriculture.—No state in the Union offers greater advantages to the farmer and stock-breeder. The soil of the prairies, whether level or rolling, possesses the greatest fertility; and the bottom-lands along the water-courses are truly inexhaustible. The cereals yield most abundant crops; vegetables of every description thrive well, and fruit or forest trees are successfully cultivated, and grow with remarkable rapidity.

The yield per acre, in 1871, was 42½ bush. of corn, 10 4-5 bush. of wheat, 20 bush. of rye, 41 bush. of oats, 29½ bush. of barley, 131 bush. of pot's, 750 lbs. of tobacco and 1 3-5 tons of hay. According to the census of 1870 there were produced 28,708,312 bush. spring wheat, 727,380 bush. winter wheat, 505,807 bush. rye, 68,935,065 bush. Indian-corn, 21,005,142 bush. oats, 1,960,779 bush. barley, 5,914,620 bush. Irish pot'ş, 34,292 bush. sweet pot's, 71,792 lbs. tobacco, 2,967,043 lbs. wool, 27,512,179 lbs. butter, 1,087,741 lbs. cheese, 1,777,339 tons hay and 37,518 gallons wine.

The number of acres in farms was 15,541,793, of which 9,396,467 were improved (or 26 per cent. of the area of the state), and 2,524,793 were woodland. The cash value of farms was $392,662,441, and of farming implements and machinery, $20,509,582; and the estimated value of all farm productions, including betterments and additions to stock, was $114,386,441; of orchard products, $1,075,169.

Iowa had 433,642 horses, 25,485 mules and asses, 369,811 milch cows, 22,058 working oxen, 614,366 other cattle, 855,493 sheep and 1,353,908 swine. The total value of all live stock was $82,987,133, and of animals slaughtered or sold for slaughter, $25,781,223.

Minerals and Mining.—The mineral resources of Iowa are extensive and important, including coal, iron, lead, copper, zinc, and various kinds of lime and free stones, well adapted for building purposes. The coal fields are situated in the central and southern portions of the state, and belong to the great Missouri and Iowa coal region, which covers in this state an area estimated at 25,000 sq. mls. The most productive coal mines are in the valley of the Des Moines R. and its tributaries, extending from Lee co. to the northern boundary of Webster co. Five mls. S. of Fort Dodge a coal vein of 7 feet in thickness was recently discovered. The coal of Iowa is exclusively bituminous, and noted for its purity, leaving but a small residuum of ashes. The product mined was, in 1865, 1,666,582 bush.; in 1866, 2,483,010 bush.; in 1870 upward of 3,000,000 bush., or 120,000 tons, and at present nearly approaches 200,000 tons.

The lead-bearing veins are in the limestone formation of the Turkey River Valley, and extend to Dubuque, on the Mississippi R., which is the center of the lead-mining industry, and owes to it its rapid growth and importance. The value of the product exceeds $300,000 per annum. Some silver is occasionally found with the copper ores. Extensive deposits of peat are found in Franklin, Wright, Cerro Gordo, Hancock, Winnebago, Worth, Kossuth, Muscatine, Linn and Clinton cos., and are of considerable importance, as they lie beyond the coal region, and yield excellent fuel. Marble quarries are in Tama and Marshall cos., and building stones crop out in nearly all the river valleys E. of the Des Moines. In Madison and Cass cos. are the most extensive quarries. Plastic clay, fit for pottery, is found in nearly all parts of the state.

The Manufacturing Industry progresses rapidly. In 1860 the value of the products was $13,971,325; in 1870, $46,534,322, showing an increase of 233 per cent. In the former year there were 1,939 industrial establishments, with an invested capital of $7,247,130; in the latter, 6,566 establishments, with a capital of $22,420,183, and the raw materials consumed amounted to $27,682,096; the wages paid to $6,893,292, and the 899 steam-engines had 25,298 horse-power. The principal products, as reported in the last census, are as follows: Flour and meal, $15,635,345; sawed lumber, $5,794,285; planed lumber, $867,415; boots and shoes, $1,218,480; agricultural implements, $829,965; carriages and wagons, $1,952,143; iron castings, $432,780; stoves and hollow ware, $100,000; furniture, $975,566; men's clothing, $905,136; malt liquor, $902,848; packed pork, $1,190,400; saddlery and harness, $1,110,852, and woollen goods, $1,561,341.

Commerce and Railroads.—With its two magnificent border-streams, the Missouri and Mississippi, and other navigable rivers, and a nearly perfect railroad system, Iowa has commercial facilities of the first order, readily effecting an exchange of its surplus products of grain, meat, etc., for clothing, groceries, and luxuries which are not produced within its borders. The goods moved on her commercial highway may be estimated at $500,000,000 in value. In 1862 the railroad mileage was 731; and ten years later, 3,160; while the network of iron roads is being rapidly extended. The principal railroads are: Burlington, Cedar Rapids & Minnesota R. R., connecting Burlington with Plymouth (229 mls.) and Plymouth with Austin (32 mls.); Burlington & Missouri River R. R. (349 mls.); Cedar Falls & Minnesota R. R., running from Waterloo to the Minn. state-line (75½ mls.); Cedar

Rapids & Missouri R. R., connecting Cedar Rapids with Omaha, Nebr. (271¼ mls.), and Clinton with Lyons (2¼ mls.); Central Iowa R. R., connecting St. Paul, Minn., with St. Louis, Mo., running from the northern to the southern state line (203 mls.); Chicago, Iowa & Nebraska R. R., connecting Clinton with Cedar Rapids, Mo. (81¼ mls.); Chicago & Southwestern R. R., from Washington to Leavenworth, Kans. (271 mls.); Des Moines Valley R. R., from Keokuk to Des Moines (248½ mls.); Dubuque & Sioux City R. R. (143 mls.); Dubuque & Southwestern R. R., from Farley to Cedar Rapids (54¾ mls.); Iowa Falls & Sioux City R. R. (184 mls.); and Sioux City & Pacific R. R., from Sioux City to Fremont, Nebr. (107 mls.).

Wealth, Taxation and Debt.—The assessed value of real estate in 1870 was $226,610,638, and of personal property, $75,904,780; or both together, $302,518,418. The true value of both was $717,644,750, against $247,338,265 in 1860, and $23,714,638 in 1850. The not national taxation was $9,055,614, of which $832,918 were state taxes, $3,052,931 county taxes, and $5,169,765 town and city taxes. The indebtedness included $3,775,606 incurred by towns and cities, $3,732,929 by counties, and only $534,498 by the state ($300,000 in war and defense bonds, and the remainder in not transferable bonds issued to the school-fund).

During the year ended Nov. 1, 1871, the total amount of receipts by the State Treasurer was $2,509,065, and of expenditures, $2,413,096, leaving a balance of $95,969 in the treasury.

Education.—The number of school districts was, in 1871, 1,594, an increase of 132 in the two preceding years. There were 7,841 public schools, against 7,009 two years before. The number of youth within the school ages was 461,258 of whom 342,440 or 74¼ per cent. were enrolled during the year, and the average attendance was 241,726, or nearly 46 per cent. The Governor, in his message of Jan., 1872, "regards the constant increase of the number of those enjoying school-privileges as a strong evidence that the common schools are continually enlarging their usefulness, and will gradually bring all the youth of the state within the scope of their inestimable privileges." The value of school-houses and apparatus was $6,916,490, an increase during two years of $1,541,947. A system of normal schools at convenient points throughout the state, for the thorough training of teachers, was urgently recommended. The last census reports public schools as numbering 7,322 with 8,866 teachers and 205,923 pupils. There were 21 colleges, 34 academies, 6 professional and 10 technical schools in the state.

The State University at Iowa City has an endowment in land and other property of $195,582, and worthily occupies its place at the head of the school system of the state. It had, in 1870, 25 teachers and 405 students, including 178 females, and embraced academical, law, medical and normal departments. The Agricultural College at Ames, Storey co., has an imposing building, located on a fine farm of 648 acres, and contains a library, museum, cabinet of minerals, etc.

Charitable and Penal Institutions.—The State Reform School, in Lee co., near Salem, Henry co., had 7 officers and teachers, and 86 inmates. The Institution for the Blind at Council Bluffs is in a flourishing condition, and offers every facility afforded by similar institutions in the country. The institution for the education of the blind at Vinton has magnificent buildings and a farm of 40 acres. The number of teachers and officers in 1870 was 25, and of pupils, 101. Hospitals for the insane are located at Mount Pleasant and Independence. The state has three homes for soldiers' orphans, one at Glenwood, another at Cedar Falls, and the last at Davenport.

The State Penitentiary, located at Fort Madison, is almost self-sustaining; and had, in 1871, 263 convicts, an increase of 61 in two years.

The State Historical Society enjoys an appropriation of $500 per annum, and collects, preserves and publishes the records of the settlements of Iowa, and the deeds of its pioneers. The "Annals of Iowa," an excellent quarterly, is issued by the society.

Government.—The Governor, Lieutenant-Governor and Superintendent of Public Instruction are elected in each odd year for a term of two years. The Register of the Land Office, Secretary of State, Auditor and Treasurer are elected in each even year, for the same length of service. The Senators, 49 in number, are chosen for four years; one-half being elected biennially. The House of Representatives consists of 200 members, who are elected for two years. Every male citizen who has been a resident of the state for six months, and of the county, in which he offers to vote, sixty days, is a legal elector.

The judicial power is vested in a supreme court, 12 district courts, "and such courts as the general assembly may establish." The Supreme Court has appellate jurisdiction only, and consists of four judges, elected by the people for six years. It exercises supervisory control over the inferior judicial tribunals. The district courts have original jurisdiction in civil and criminal cases, in chancery and at common law. In 1868 the assembly established 24 circuits, in each of which a circuit judge is elected for four years.

Iowa is divided into the following 100 counties: Adair, Adams, Allamakee, Appanoose, Audubon, Benton, Black Hawk, Boone, Bremer, Buchanan, Buena Vista, Butler, Calhoun, Carroll, Cass, Cedar, Cerro Gordo, Cherokee, Chickasaw, Clarke, Clay, Clayton, Clinton, Crawford, Dallas, Davis, Decatur, Delaware, Des Moines, Dickinson, Dubuque, Emmett, Fayette, Floyd, Franklin, Fremont, Greene, Grundy, Guthrie, Hamilton, Hancock, Hardin, Harrison, Henry, Howard, Humboldt, Ida, Iowa, Jackson, Jasper, Jefferson, Johnson, Jones, Keokuk, Kossuth, Lee, Linn, Louisa, Lucas, Lyon, Madison, Mahaska, Marion, Marshall, Mills, Mitchell, Monona, Monroe, Montgomery, Muscatine, O'Brien, Osceola, Page, Palo Alto, Plymouth, Pocahontas, Polk, Pottawattamie, Poweshiek, Ringgold, Sac, Scott, Shelby, Sioux, Story, Tama, Taylor, Union, Van Buren, Wapello, Warren, Washington, Wayne, Webster, Winnebago, Winneshiek, Woodbury, Worth, Wright.

Des Moines, on the river of the same name, is the capital of the state. The last census reports the following incorporated cities: Davenport, Keokuk, Dubuque, Cedar Falls, Waterloo, Waverly, Independence, McGregor, Clinton, Lyons, Burlington, Maquoketa, Fairfield, Iowa City, Fort Madison, Cedar Rapids, Winterset, Oskaloosa, Marshalltown, Glenwood, Muscatine, Council Bluffs, Ottumwa, Fort Dodge and Sioux City.

Iowa, co. in Iowa, E. central part. Area, 580 sq. mls. Pop., 16,644; in 1860, 8,029. The surface is moderately level and the soil very fertile. The Iowa R. flows through the N. E. part, and the co. is also drained by the North Fork of English R. The Mississippi & Missouri R. R. passes through the N. part from E. to W. Marengo is the co. seat. Agr. productions in 1870: Wheat, 531,148 bush.; rye, 1,521 bush.; Indian-corn, 1,281,123 bush.; oats, 267,049 bush.; Irish pot's, 111,882 bush.; sweet pot's, 88 bush.; wool, 31,877 lbs.; butter, 499,379 lbs.; hay, 30,703 tons. Cash value of farms, $5,422,071. Total, estimated, value of all farm productions, including additions to stock, etc., $1,526,481. Value of manufactures, $358,293.

James River, in Va., is formed by the confluence of the Cow Pasture R. and Jackson R., 15 mls. below Covington, Alleghany co. It flows through a gap between the Rich Patch Mts. and Mill Mts., and thus traverses a wide and fertile valley in Botetourt co. In Rockbridge co. it breaks through the Blue Ridge about 15 mls. N. E. of the Peaks of Otter. It then flows S. E. beyond Lynchburg, and turns N. W. to the southern boundary of Amherst co. From this point its general direction is S. E. Above Richmond the river passes over rocky ledges, forming a series of rapids 6 mls. long. Below Richmond it expands and enters the southern extremity of the Chesapeake B. in a wide estuary between Old Point Comfort and Willoughby Point. It is navigable to Richmond, to which point the tide ascends, a distance of 105 mls. The James River & Kanawha Canal has been constructed from Richmond to Buchanan. The Chesapeake & Ohio R. R. follows its course from below Lynchburgh to Covington and thence extends to the Kanawha. In connection with these works the James R. forms the most important inland route of Virginia from the seaboard to the Ohio R.

Jefferson, co. in Mont., W. central part. Pop., 1,531. It is bounded on the E. by the Missouri R. and on the S. by the Jefferson R. and its tributary, Fish Cr. It is drained by the North Bowlder, South Bowlder and Willow Crs. Although the greatest portion of this co. is covered with the Rocky Mts. and their spurs, it contains a large amount of arable land and has a climate remarkably mild for its high latitude. The valley of the Missouri is here narrow but very fertile. Radersburgh is the co. seat. Agr. productions in 1870: Wheat, 4,194 bush.; rye, 266 bush.; oats, 11,584 bush.; Irish pot's, 11,693 bush.; butter, 70,165 lbs.; hay, 2,422 tons. Cash value of farms, $108,090. Total, estimated, value of all farm productions, including additions to stock, etc., $138,462. Value of manufactures, $120,242.

Jefferson, co. in Nebr., S. E. part. Area, 576 sq. mls. Pop., 2,440. The surface is gently rolling and consists mostly of prairies. The Big Blue R. flows through the co. from N. W. to S. E., and receives Big Sandy Cr. and Muddy Cr. The co. is well adapted to stock raising. Fairbury and Meridian are the co. seats. Agr. productions in 1870: Wheat, 24,847 bush.; Indian-corn, 72,230 bush.; oats, 4,070 bush.; Irish pot's, 15,199 bush.; sweet pot's, 60 bush.; butter, 19,850 lbs.; hay, 2,182 tons. Cash value of farms, $355,490. Total, estimated, value of all farm productions, including additions to stock, etc., $79,774. Value of manufactures, $19,405.

Jefferson, co. in N. Y., N. part. Area about 1,050 sq. mls. Pop., 65,415; in 1860, 69,825. It is bounded on the W. by Lake Ontario and on the N. W. by the St. Lawrence R. The largest stream draining the co. is Black R., which empties into Henderson B. of Lake Ontario. Indian R., a tributary of the St. Lawrence, intersects the north-eastern part. Along the lake extends an extensive low plain, which has a fertile soil and is well cultivated throughout. Toward the E. the surface becomes broken and rolling. The Watertown, Jefferson & Cape Vincent R. R. and the Rome, Watertown & Ogdensburg R. R. pass through the co. Watertown is the co. seat. Agr. productions in 1870: Wheat, 228,772 bush.; rye, 36,809 bush.; Indian-corn, 221,551 bush.; oats, 1,058,227 bush.; Irish pot's, 507,349 bush.; wool, 104,459 lbs.; maple sugar, 529,109 lbs.; cheese, 2,545,654 lbs.; butter, 4,883,508 lbs.; hay, 223,343 tons. Cash value of farms, $33,432,152. Total, estimated, value of all farm productions, including additions to stock, etc., $8,276,348. Principal products of industry: Cheese, $939,906; flour and meal, $1,259,324, and tanned leather, $685,921. Total value of manufactures, $7,241,009.

***Jersey City,** city and the co. seat of Hudson co., N. J., on the Hudson R., opposite New York, with which it is connected by several lines of steam ferries. It is the terminus of the Erie R. R., the Northern R. R. of New

Jersey, the New York & Oswego Midland R. R., the Central R. R. of New Jersey, the Morris & Essex Division of the Delaware, Lackawanna & Western R. R., the Camden & Amboy R. R., the New York & Philadelphia R. R. and the New Jersey Southern R. R.; in short, of all the railroads which connect New York with the north-western, western and southern parts of the country. Practically, it is a portion of New York, many of its residents having their places of business in that city.

The growth of the city has been very rapid. In 1850 it had a population of 6,855; in 1860 of 29,226, and in 1870, of 82,546; of whom 50,711 were natives, and 31,835 foreigners; including 7,151 Germans and 17,665 Irishmen. The number of whites was 81,840, and of colored persons, 705.

In all classes of occupations 26,412 persons were engaged viz.: In agriculture, 311; in professional and personal services, 9,580; including 2,666 domestic servants; 4,811 laborers; 115 lawyers; 90 physicians and surgeons; 215 teachers; 37 journalists and 60 clergymen; in trade and transportation, 7,172, and in manufactures and mechanical industries, 9,349.

It is handsomely laid out with wide streets, intersecting at right angles. It has many elegant private residences, fine churches and substantial public buildings. The schools are excellent and well attended. In 1869 the number of children between the ages of 5 and 18 years was 11,822, of whom 6,954 attended the public schools, and 4,258 the private schools.

Five papers are published in the city, viz.: "The Journal," daily evening; "The Times," daily evening; "Gazette," weekly; "Herald," weekly; and "Wacht am Hudson," German weekly.

Kane, co. in Utah Ter., S. E. part. Pop., 1,513. The Colorado of the West intersects the eastern portion of the co. and here receives the San Juan R. The surface consists of lofty table-lands, which are intersected by deep canyons. The N. W. corner of the co. includes a part of the Wahsatch Range. Toquerville is the co. seat. Agr. productions in 1870: Wheat, 1,663 bush.; rye, 20 bush.; Indian-corn, 5,188 bush.; Irish pot's, 6,225 bush.; butter, 3,500 lbs.; hay, 106 tons. Cash value of farms, $48,845. Total, estimated, value of all farm productions, including additions to stock, etc., $48,516. Value of manufactures, $11,780.

Kane City, p. v. in Venango co., Pa., on the Philadelphia & Erie R. R., 118 mls. from Lock Haven. Is largely engaged in lumber trade. Pop. about 400.

Kanesville, tn. in Kane co., Ill. Pop., 999.

Kaneville, p. v. in Kane co., Ill., 5 mls. S. of Blackberry Station on the Chicago & Northwestern R. R.

Kankakee, co. in Ill., E. N. E. part, bordering on Ind. Area, 590 sq. mls. Pop., 24,352; in 1850, 15,412. The surface is level; the soil fertile. It is drained by the Kankakee R. and its tributaries. It is traversed from N. to S. by the Illinois Central R. R. and the Chicago, Danville & Vincennes R. R. Kankakee is the co. seat. Agr. productions in 1870: Wheat, 103,946 bush.; rye, 12,935 bush.; Indian-corn, 637,399 bush.; oats, 772,408 bush.; Irish pot's, 118,451 bush.; sweet pot's, 39 bush.; butter, 714,666 lbs.; hay, 73,585 tons. Cash value of farms, $12,522,509. Total, estimated, value of all farm productions, including additions to stock, etc., $1,970,196. Value of manufactures, $735,639.

Kankakee, tn. in the above co. Pop., 5,189.

***Kankakee,** city in the above tn. and the co. seat, on the Illinois Central R. R., 56 mls. S. of Chicago; in a highly productive farming district. It enjoys a large trade, has several manufactories and possesses the finest water-power in the state. Pop. about 4,000; in 1860, 2,984. Four newspapers.

Kankakee, tn. in Jasper co., Ind. Pop., 215.

Kankakee, tn. in La Porte co., Ind. Pop., 1,185.

Kankakee River rises in St Joseph co., Ind.; flows S. W. through La Porte and Stark cos., where it expands into the English Lake; then it flows W. through Jasper co., and intersecting Kankakee co., Ill., joins the Des Plaines R. near Dresden to form the Illinois R.

Kanona, p. v. in Steuben co., N. Y., on the Conhocton R. and the Rochester Branch of the Erie R. R., 4 mls. N. W. of Bath. Pop., 190.

Kanosh, p. v. in Millard co., Utah Ter., 13½ mls. S. of Fillmore City.

KANSAS, one of the western states; is bounded on the N. by Nebr., on the W. by Colo. Ter., on the S. by Ind. Ter. and on the E. by Mo., from which it is partly separated by the Missouri R. It extends from 94° 38′ to 102° W. long., and from 37° to 40° N. lat., and has an area of 81,318 sq. mls., or 52,043,520 acres.

Surface.—Kansas occupies a portion of that extensive region which gently slopes down from the base of the Rocky Mts. to the banks of the Mississippi R. It has no mountains, yet its surface is far from being a monotonous level. Almost everywhere we meet gentle undulations, or low hills, divided by depressed valleys, which the water-courses have dug into the yielding soil; and there is a great difference in the elevation above the sea between the eastern and western portions of the state. The following table exhibits this gradual but steady rise of the ground from E. to W., along the line of the Kansas Pacific R. R., which intersects the state in this direction:

State line	— miles		648 feet.
Lawrence	38	"	230 "
Topeka	67	"	788 "
Wamego	103	"	902 "
Fort Riley	135	"	974 "
Abilene	162	"	1,057 "
Brookville	200	"	1,250 "
Fort Harker	218	"	1,484 "
Fort Hays	288	"	1,893 "
Ellis	302	"	2,019 "
Buffalo	351	"	2,678 "
Gopher	397	"	3,220 "
Sheridan	404	"	3,014 "
Pond Creek	422	"	3,175 "

This table indicates a range in height between the extremes of nearly 3,000 feet, and a general fall of the ground from W. to E. of nearly 8 feet per mile, the length of the state being 391⅓ mls.

Rivers.—The rivers of Kans., without exception, discharge their waters into the Mississippi, either directly or indirectly, and in conformity with the slope of the land have courses of a general easterly direction. The Missouri R. washes the north-eastern boundary, and has in this short course some broad and very productive bottoms. Near the Mo. state line it receives the Kansas R., which rises on the "Plains" of Colo. Ter., and intersects the state to which it has given its name, through its entire length. The principal tributaries join the Kansas on the N., as the Saline R., which empties near Salina; the Solomon R.; the Republican Fork, which rises in Colo. Ter., flows through southern Nebr., and turning S. E. joins the Kansas near Fort Riley, and the Big Blue R., which rises in Nebr. The Arkansas R., coming from Colo. Ter., crosses the western limit of Kans., turns to the N. in Kiowa co., and, describing a wide curve, leaves Kans. in Cowley co. Its tributary, the Neosho R., intersects the south-eastern cos., flowing from N. to S., and the Cimarron R. traverses the south-western part of the state.

Climate and Vegetation.—Kans. has a mild and salubrious climate. At Burlingame, Osage co., the observations made during the year 1859 indicated a mean annual temperature of 52.90°, and a range between extremes of 106°, the mercury rising on the hottest day to 100° and falling on the coldest to—6°. The monthly means were as follows: January, 32.75°; February, 33.08°; March, 45.25°; April, 49.12°; May, 64.90°; June, 72.45°; July, 77.68°; August, 74°; September, 66°; October, 53.75; November, 44.85°, and December, 20.95°. The rain-fall was about 31 inches at Burlingame and 36 1-5 at Neosho Falls. The eastern part of the state has a much larger quantity of moisture than the western, and hence its vegetation is more rank and varied. The forests cover the rich bottom-lands of the streams, and consist of the deciduous trees common in these latitudes. The uplands in the E. are rich prairies, composed of tall grasses and herbs. In the W. they are covered with grama and buffalo grasses, which have a short curly growth, with dense fibrous roots, deeply penetrating into the dry but fertile soil. Near the western state line the valleys are often covered with the white saline efflorescence, so characteristic of arid regions. On the upper alluvial portions of the valleys are found dense growths of the "Sarcolatis," the wild sage ("Artemisia"), and the greasewood ("Obione").

Population.—Kans. had, in 1860, 107,206 inhabitants, and in 1870, 364,399, an increase during the last census decade of 147 per cent. The population in 1870 comprised 346,377 whites, 17,108 colored persons and 9,814 Indians, of whom 914 were out of tribal relations, about 5,900 were living on reservations and agencies, and about 3,000 led a nomadic life. The great majority of the inhabitants, viz.: 316,007, were natives of the United States, including 63,351 natives of the state, 1,402 natives of Conn., 35,558 of Ill.,

30,953 of Ind., 13,073 of Iowa, 15,918 of Ky., 1,887 of Me., 2,067 of Md., 2,894 of Mass., 4,466 of Mich., 29,775 of Mo., 1,158 of N. H., 1,845 of N. J., 18,558 of N. Y., 3,602 of N. C., 38,205 of Ohio, 19,287 of Pa., 6,209 of Tenn., 2,370 of Vt., 9,906 of Va. and W. Va., and 4,128 of Wis. The foreign population was 48,392, of whom 5,324 were natives of British America, 1,274 of France, 12,775 of Germany, 6,161 of England, 10,950 of Ireland, 1,531 of Scotland, 1,021 of Wales and 588 of Sweden and Norway.

The total population of 10 years and more of age numbered 258,051, of whom 73,228 were engaged in agriculture, 20,736 in professional and personal services, 11,762 in trade and transportation, and 18,126 in manufacturing, mining and mechanical trades, making an aggregate of persons pursuing useful occupations of 123,852.

Mines and Minerals.—Kans. has no precious metals, nor are its mineral treasures as great as those of some other divisions of the country. But coal is found in quantities sufficient for all demands, one field being situated at Leavenworth and another occupying the cos. of Linn, Bourbon and Cherokee.

Extensive beds of salt occur in the valleys of the Republican, Solomon and Saline Rs., in the northern part of the state, and in the southern part, near the state line, there exists a bed 30 mls. wide and 60 mls. long. Iron, gypsum, alum and petroleum are among the other minerals of large promise. The building materials of Kans. are famous throughout the west. "Leavenworth marble," "Junction City marble," "Peruvian limestone," and a brown ferruginous sandstone are the most valuable.

Agriculture.—Agriculture is by far the most important source of wealth in Kans. The eastern half of the state is well adapted to farming, the western to grazing. The soil of the former is deep and rich, in the forest-covered bottoms as well as on the upland prairies. The culture of cotton has been successfully tried on a small scale in the south-eastern portion of the state, and promises handsome returns to those who will engage in it. Mulberry trees are indigenous throughout the state, and although but little has yet been done to test the success of silk-growing, this important branch of industry will probably succeed here if anywhere in the country. It is also believed that the climate and soil of Kans. are favorable to the culture of tea.

No portion of the United States is better fitted for wool-growing than central and western Kans., which will probably be settled by persons making this and stock raising their sole business.

According to the census there were, in 1870, 1,971,003 acres of improved land, 635,419 of woodland, and 3,050,457 of unimproved land in the farms of Kans. The total value of farms was $90,327,040; of agricultural implements, $4,053,312, and of farm productions, including additions to stock, $27,630,651. The value of orchard products was $158,046, and of market gardens $129,013. The products were: Spring wheat, 1,314,522 bush.; winter wheat, 1,076,676 bush.; rye, 85,207 bush.; Indian-corn, 17,025,525 bush.; oats, 4,097,925 bush.; barley, 98,405 bush.; Irish pot's, 2,342,988 bush.; sweet pot's, 49,533 bush.; cotton, 7 bales; tobacco, 33,241 lbs.; wool, 335,005 lbs.; butter, 5,022,758 lbs.; wine, 14,889 gallons; sorgum molasses, 449,409 gallons, and hay, 490,289 tons. The value of live stock was $23,173,185, and of slaughtered animals, $4,156,386. Kans. had 117,786 horses, 11,786 mules and asses, 123,440 milch cows, 20,774 working oxen, 229,753 other cattle, 109,088 sheep and 206,587 swine.

Manufactures.—Kans. possesses abundant facilities for manufacturing in the ample water-power of its streams and its vast coal beds. There were in the state, according to the census report, 1,477 establishments, employing 254 steam-engines with 6,300 horse-power, 6,844 hands and a capital of $4,319,060. The value of products was $11,775,833, and of raw materials consumed, $6,112,163. The wages paid amounted to $2,377,511. The principal articles manufactured, with their value, were as follows: Flour and meal, $2,938,215; malt liquors, $236,190; boots and shoes, $303,187; carriages and wagons, $236,956; furniture, $285,181; iron castings, $326,420; saddlery and harness, $425,928; tin, copper and sheet-iron ware, $356,003; tobacco and cigars, $223,800, and woollen goods, $141,750.

A French colony in Franklin, 16 mls. S. W. of Ottawa, have commenced to manufacture silk velvet. They are reported to have one loom in operation, turning out 280 yards of fine velvet per day.

Commerce.—The total commerce of Kans. is, in round numbers, $114,000,000; $30,000,000 of which is represented by the transactions of Leavenworth. The trade in Texas cattle has become a very important branch of business. Large herds are annually brought by Texas drovers to points along the Pacific R. R. Abiline is the principal cattle depot, and in 1870 50,000 head were sent east from this place, while in 1871 the number of cattle sold or remaining on hand amounted to about 150,000 head. Junction City, Salina, Ellsworth and some places in the southern portion of the state are also engaged in this business. The natural commercial facilities of the state are limited, as the Missouri, washing the N. E. border, is the only navigable stream, but railroads have been built very extensively, and the construction of new lines is being pushed with great vigor.

In 1864 Kans. had but 40 mls. of railroad; in 1866, 240 mls.; in 1868, 648 mls.; in 1870, 1,501 mls., and in 1872, 1,760 mls. The following are the principal lines: Kansas Pacific R. R., from Kansas City, Mo., to Denver, Colo., intersecting the state from E. to W. (638¼ mls.); a branch from Lawrence to Leavenworth is 34 mls. long; Atchison, Topeka & Santa Fe R. R., from Atchison to State Line, 450 mls. of which are in operation, 385 mls. from Atchison to Dodge City, and a branch from Newton to Wichita (27 mls.); Leavenworth, Atchison & Northwestern R. R., (21¼ mls.); Leavenworth, Lawrence & Galveston, from Leavenworth to Parker, on the southern state line (143½ mls.); Missouri, Kansas & Texas R. R., from Junction City to Preston, Tex. (432 mls.), and a line from Sedalia, Mo., to Parsons (160 mls.); Missouri River, Fort Scott & Gulf R. R., from Kansas City, Mo., to Baxter on the state line (161 mls.).

Wealth, Taxation and Debt.—The total estimated value of real and personal estate in 1870 was $188,892,014; the assessed value of the same $92,125,861, of which sum $65,499,364 were for real estate, and $26,626,496 for personal property. The state taxes were $809,608; the co. taxes, $1,160,138, and the city and town taxes, $704,246. The indebtedness of the state was $1,593,306; of the cos., $3,736,901, and of the cities and towns, $1,112,075.

At the close of the year 1872 the total liabilities of Kans. amounted to $1,547,248, and the resources of all kinds $1,259,503; while the receipts amounted to $1,089,249, and the disbursements to $954,193, leaving a balance in the treasury of $138,327.

Education, etc.— Kans. has five universities. The State University at Lawrence was organized in 1864, and embraces a collegiate and a preparatory course. It has a splendid building, on a hill called Mt. Oread, and is admirably provided with all the appliances required by the most advanced methods of instruction. Professorships of drawing and practical chemistry have lately been added to the faculty. The library and the collection of apparatus are increasing rapidly. In 1870 it had 9 professors and 213 students. The Ottawa University was organized in 1860 by the Baptist church of the state; Lane University, at Lecompton, in 1859

Baker University, at Baldwin City, in 1858, and Highland University, at Highland, in 1859. The census reports 11 classical institutions, with 63 teachers and 904 pupils, and 4 technical schools, inclusive of the State Agricultural School at Manhattan, which has an endowment of 90,000 acres, has 10 instructors, 194 pupils, and a library of 3,000 volumes.

Kans. had, according to the census, 2,068 organized school districts, with 1,663 public schools, having 1,864 teachers and 58,030 pupils. The number of persons between 5 and 21 years of age was 109,242.

The charitable institutions already established are in successful operation. The Asylum for the Insane is at Osawatomie, the Asylum for the Blind at Wyandotte City, and the Asylum for the Deaf and Dumb at Olathe.

The press of Kans. comprised, in 1870, 97 newspapers, with a circulation of 96,803. Twelve of these, with a circulation of 17,570, were dailies. The circulation of the following papers exceeded 5,000 in 1871: "Kansas Tribune," published at Lawrence; "Times," at Leavenworth; "The Kansas Farmer," semi-monthly, at Leavenworth, and the "Kansas Magazine," monthly, at Topeka.

Government.—The Governor, Lieutenant Governor, Secretary of State, Auditor, Treasurer, Superintendent of Public Instruction, and Attorney General, are elected for a term of two years. The Senate is composed of 25 members, elected for two years, and the House of Representatives of 75 members, elected for one year. The Legislature meets annually on the second Tuesday in January.

Male citizens of the United States, or persons of foreign birth, who shall have declared their intention to become citizens, are entitled to vote after having resided six months in the state and 30 days in the township.

The Supreme Court consists of a Chief Justice and two Associate Justices, who are elected for six years. The state is divided into nine judicial districts, in each of which a District Court is held, the judges of which are elected for four years.

Kans. is divided into the following 63 counties: Allen, Anderson, Arrapahoe, Atchison, Barbour, Barton, Bourbon, Brown, Buffalo, Butler, Chase, Cherokee, Cheyenne, Clay, Clark, Cloud, Coffee, Cowley, Crawford, Davis, Decatur, Dickinson, Doniphan, Douglas, Ellis, Ellsworth, Ford, Foote, Franklin, Grant, Greenwood, Hamilton, Harvey, Hodgeman, Howard, Jackson, Jefferson, Jewell, Johnson, Kansas, Kearney, Kingman, Labette, Lane, Leavenworth, Lincoln, Linn, Lyon, Marion, Marshall, McPherson, Meade, Miami, Mitchell, Montgomery, Morris, Nemaha, Neosho, Ness, Norton, Osage, Osborn, Ottawa, Pawnee, Phillips, Pottawattamie, Rawlins, Reno, Republic, Rice, Riley, Rooks, Rush, Russell, Saline, Scott, Sedgwick, Sequoyah, Seward, Shawnee, Sheridan, Sherman, Smith, Stafford, Staunton, Stevens, Sumner, Thomas, Wabaunsee, Wallace, Washington, Wichita, Wilson, Woodson and Wyandotte.

The capital of the state is Topeka, in Shawnee co. The other incorporated cities are: Atchison, Fort Scott, Baxter Springs, Lawrence, Ottawa, Leavenworth, Emporia, Paola and Wyandotte.

Kansas, new co. in Kans., forming the S. W. extremity of the state; has a rolling surface and a productive soil and is intersected by the Cimarron R.

***Kansas City,** in Jackson co., Mo., on the Missouri R., where it enters the state, and on the Missouri Pacific R. R., the Missouri River, Fort Scott & Gulf R. R., the St. Joseph & Council Bluffs R. R., and on branches of the North Missouri R. R., and of the Hannibal & St. Joseph R. R., 157 mls. W. of Jefferson City. It contains the machine shops of the railroad company, several iron foundries, wagon factories, etc. The city has a very extensive commerce and is surrounded by a highly productive and populous region. As a beef-packing mart it surpasses any other western city. Few cities in our country have grown as rapidly. It was laid out in 1830; in 1860 had a pop. of 4,418; and in 1870 of 32,296; so that it is now the second city in the state in size. Seventeen newspapers.

Kansas River, the principal river of Kansas; is formed by the confluence of the Republican and Smoky Hill Forks, which rise on the plains of eastern Colorado, and unite near Junction City, about 120 mls. from its mouth. Its course is easterly, and it flows through a gently sloping plain, which is mostly fertile. The principal tributary is the Big Blue R., which rises in southern Nebraska and intersects northern Kans. The river empties into the Missouri above Kansas City. In time of high water it is navigable.

Kents Mills, p. o. in Wythe co., Va.

Kents Store, p. o. in East Feliciana parish, La.

Kentuck, p. o. in Pittsylvania co., Va.

KENTUCKY is bounded on the N. by Ohio, Ind. and Ill., on the W. by Mo., on the S. by Tenn., and on the E. by Va. and W. Va. The Ohio washes its northern border, the Big Sandy R. its eastern and the Mississippi its western, while the crest of the Cumberland Mts. marks its south-eastern limit, separating it from Va. The area is 37,480 sq. mls., or 23,987,200 acres.

Surface.—The eastern is the highest portion of Ky., and is occupied by the western slopes and outlying ridges of the Cumberland Mts. These ridges either trend parallel with the principal chain, like the Pine Mts., the Kentucky Ridge and others, or they branch off from the Cumberlands at right angles, trending N. W. and, like the Owsley Mts., separating the head waters of several important tributaries of the Ohio R. Neither the Cumberlands or their branches attain fully the height of 3,000 feet above the level of the sea, yet the entire region occupied by them is extremely broken, and the streams traverse narrow and deeply depressed valleys between precipitous and densely timbered heights. A line from the point where the Big Fork of the Cumberland R. crosses the southern line of the state to the junction of the Tug Fork and the West Fork of the Sandy R. marks the western limit of the mountain region.

That portion of the state which extends westward from this line to another line drawn from the S. E. corner of Trigg co. to the Ohio R., near the mouth of Salt R., is an undulating table-land, and may be considered as the continuation of the Highland Rim of Tenn. (See Tenn.) It has an elevation above the seaof 600 to 900feet, and its surface is considerably diversified. In the center of the state the undulations attain, in Muldraughs Hill, to a considerable height, and along the banks of the Ohio extends a range known as the Ohio hills. The extensive district in the midst of which lie the cities of Frankford and Lexington is a plain, much lower than the general surface of the plateau, and famous, as the "blue grass region," for its extraordinary fertility of soil. It is the garden of the state, and has a soil of deep black mould, almost without sand. Much of the country between the Cumberland and Green Rs. is occupied by the so-called "Barrens," treeless plains of poor soil, with isolated wooded hills, or "oak knobs." A striking feature of the state is the sinkholes and limestone caverns, large numbers of which occur in the portion lying S. W. of the center. The famous Mammouth Cave in Edmonston co. has, with its branches, an extent of probably more than 40 mls., and consists of a series of connected chambers, from the vaults of which hang immense stalactites, while stalagmites, equally gigantic, rise from the floors in the form of pointed pillars and columns. The sinkholes are cone-shaped depressions or cavities, from 60 to 70 feet deep, and from 60 to 300 feet in circumference at the top. In some cases the bottom is open and discloses a subterranean stream.

The western part of Ky. is a gently rolling plain.

Rivers.—Nearly all the streams draining this state are affluents of the Ohio R., which washes the entire northern boundary, a distance of over 600 mls. The Sandy R. is formed by the Tug Fork and the West Fork, both of which rise in Virginia and burst through depressed gaps of the Cumberland Mts. The Tug Fork and the main stream form the north-western state line. Licking R. rises in Magoffin co., flows N. W. and empties into the Ohio R. opposite Cincinnati, between the cities of Covington and Newport. It is not navigable. The Kentucky R. is formed by the North, Middle and South Forks, which rise in the Cumberland Mts. and unite in Owsley co. It joins the Ohio near Trestonville, and is navigable for 65 mls. Salt R. intersects the center of the state and empties near West Point. Steamboats ascend it 25 mls. above its mouth. Green R., the largest stream belonging exclusively to the state, rises in Lincoln co., flows W. as far as Muhlenburg co., and turning N, N. W. empties a few mls. above Evansville, Ind. For a distance of 200 mls. it is navigated by steamboats, and smaller craft ascend still farther. The Big Barren R., Pond R., Saline Cr. and Rough Cr. are its principal tributaries. The Cumberland R. rises in the mountain chain bearing the same name, bursts through several of the lower ridges, and after describing a very tortuous course makes a bend into Tenn. It re-enters the state in Trigg co., and joins the Ohio near Smithland, in Livingston co. It is navigable to Nashville, Tenn. Of the Tennessee R. the lower course only belongs to Ky., and it joins the Ohio a few mls. above Paducah. It is navigable far beyond the limits of the state. The Mississippi R. washes the western border and receives in Ky. but a few small tributaries, as Mayfield Cr., Obion R. and Bayou de Chien.

Climate.—The climate of Ky. is mild. The winters usually last from December to the end of March, and on the whole are not severe, though the thermometer occasionally falls as low as 15° Fahr. In the southern cos. cattle rarely require shelter. The summers are long and warm, with rise of temperature to 95° and even 100°. The mean annual temperature in the middle portions of the state is about 55°. South-westerly winds prevail in the spring and summer, and rain falls most abundantly in the winter and early spring, while the summer and fall are often distinguished by long droughts. Ky. when first settled was well timbered, and the mountainous or hilly portions are even now covered with extensive forests of deciduous trees. The "Barrens" resemble the more northern prairies and afford good pasturage.

Population.— Ky. had, in 1790, 73,677 inhabitants; in 1800, 220,955; in 1810, 406,511; in 1820, 564,135; in 1830, 687,917; in 1840, 779,828; in 1850, 982,405; in 1860, 1,155,684, and in 1870, 1,321,011. Of

the last number there were 1,098,692 whites and 222,210 colored persons. The largest part of the population was native of the United States, viz.: 1,257,613, including 1,080,998 natives of the state. The foreign-born population numbered but 63,398 inhabitants, or 4 4-5 per cent. of the whole. It comprised 1,082 natives of British America, 30,318 of Germany, 4,173 of England, 21,642 of Ireland, 1,019 of Scotland, and 1,147 of Switzerland.

The number of persons above 10 years of age was 930,136, of whom 414,593 were engaged in useful occupations, viz.: 261,080 in agriculture, 84,024 in professional and personal services, 25,292 in trade and transportation, and 44,197 in manufactures and mechanical and mining industries.

Mining and Minerals.—Kentucky is abundantly supplied with productive coal beds and iron deposits. The coal crops out on the river banks and hill sides in the eastern portions of the state and on the Ohio. Although not yet extensively mined, it will in future supply the domestic requirements and support an extensive manufacturing industry. The principal coal mines are in the north-eastern portion of the state, and yield a very superior coal.

Agriculture.—Kentucky has a productive soil, and, with the exception of the highest ridges or a few limited areas and sandy knobs in the "Barrens," is everywhere well adapted to the purposes of the farmer and stock raiser. The region of the Licking and Kentucky Rs., from their sources to the banks of the Ohio R., and measuring a hundred mls. square, is one of the richest in the United States, and possesses in its deep black mould an inexhaustible source of wealth. Indian-corn and tobacco are the great staples of the state. In 1870 there were produced 50,091,066 bushels of the former, and 105,305,869 lbs. of the latter, mostly grown in the Ohio valley. The other productions were: Spring wheat, 38,532 bush.; winter wheat, 5,690,172 bush.; rye, 1,108,933 bush.; oats, 6,620,103 bush.; cotton, 1,080 bales; wool, 2,234,450 lbs.; Irish pot's, 2,391,062 bush.; sweet pot's, 802,114 bush.; wine, 62,360 gallons; butter, 611,874,978 lbs.; hay, 204,399 tons, and sorghum molasses, 1,740,453 gallons.

The live stock had a value of $66,287,343, and comprised 317,034 horses, 90,230 mules and asses, 247,615 milch cows, 69,719 working oxen, 382,993 other cattle, 936,765 sheep, and 1,838,227 swine. The slaughtered animals had a value of $24,121,861.

The improved land measured 8,103,850 acres; woodland, 9,134,658 acres, and other unimproved land, 1,421,598. The cash value of farms was $311,238,896; of farm implements, $8,572,896; and of all farm productions, including additions to stock, $87,477,374. The amount of wages paid during the year, including value of board, was $10,709,382.

Manufactures.—In 1870 there were in Ky. 5,390 manufacturing establishments against 3,450 in 1860. The number of steam-engines was 1,147, with 31,928 horse-power, and the number of hands employed was 30,636, who received $9,444,524 in wages. The capital invested was $29,277,809 against $20,256,579 in 1860, and the value of productions $54,625,809 against $37,931,240. The principal industries were as follows: Agricultural implements; (value of goods in 44 establishments), $1,384,917; the 420 boot and shoe shops produced goods of $1,144,684 in value; the carriages and wagons had a value of $1,339,909; men's clothing, $1,068,258; flour and meal, $7,886,734; furniture, $1,361,149; forged and rolled iron, $2,464,928; pig iron, $2,182,482; iron-castings, not specified, $2,363,473; leather, tanned and curried, $1,693,574; distilled liquors, $4,532,730; sawed lumber, $3,662,086; saddles and harness, $1,013,852; tin, copper and sheet-iron ware, $1,051,026; chewing, smoking and snuffing tobacco, $1,647,669; cigars, $449,335, and woollen goods, $897,057.

Commerce and Railroads.—The great border streams of Ky., and the navigable rivers intersecting it, afford excellent commercial facilities, and the surplus products of the state, as salt, beef, pork, bacon, cotton bags, etc., are shipped in steam and flat boats to New Orleans. Large numbers of horses and mules are annually driven to the Atlantic States, and command a good price.

As regards the construction of railroads, Ky. has not kept pace with the states north of it. In 1841 the railroad mileage was 28, and remained so for the next 7 years. In 1851 it had increased to 94; in 1862 to 567, and in 1872 to 1,123. The principal lines are: The Eastern Kentucky R. R., from Riverton to Grayson (23 mls.), with two short branches to the coal mines of 5 mls.; the Elizabethtown & Paducah R. R. (185 mls.), of which 160 mls. W. of Elizabethtown are in operation; the Kentucky Central R. R., from Covington, opposite Cincinnati, to Lexington (99 mls.); the Louisville, Cincinnati & Lexington R. R., from Louisville to Lexington (93¼ mls.), with a branch from La Grange to Covington (77¼ mls.); the Louisville & Nashville R. R. (185 mls.), with a branch to Bardstown (17 mls.), another to Livingston (110 mls.), another to Richmond (33¼ mls.), and another to Tenn. state line (46¼ mls.), and the Paducah & Memphis R. R. (165 mls.), of which 63¼ mls., from Paducah to Troy, Tenn., are in operation.

Education, etc.—According to the report of the Superintendent of Public Instruction for the year ended June 30, 1871, there were 405,427 children of the school age in the state, of whom but 120,866 attended the public schools. The number of school districts was 5,117, and of schools 5,068. A new school law, providing a system of free schools on the New England model, was passed in 1870, but has not thus far been successfully carried into effect. The Superintendent says: "The neglect hitherto of our school interests, and the inadequacy of means in the poorer sections for generations, have left a large percentage of the adult population utterly destitute of the barest elements of education, while the balance have only enough to say that they are one degree better off. The result is, that the ideas of the people as to what education is, and what the schools need, are of the crudest and most imperfect kind." The most important of the higher institutions of learning is the Kentucky University, with which is connected the Agricultural College. The university has funds to the amount of $400,000, and real estate to the value of $250,000. There are 25 academies, with 20,000 pupils, in the state, and 20 colleges, with 2,500 pupils.

The charitable institutions are the State House of Reform for Juvenile Delinquents, established in 1872; the Western Lunatic Asylum at Hopkinsville, the Eastern Lunatic Asylum at Lexington, the Kentucky Institution for the Education and Training of Feeble Minded Children at Frankfort, and the Kentucky Institution for the Education of Deaf Mutes at Danville.

The Kentucky Penitentiary is located at Frankfort.

The Press.—In 1870 Kentucky had 89 newspapers, with a circulation of 197,130, including 6 dailies, 4 tri-weeklies, 4 semi-weeklies, 68 weeklies and 7 monthlies. The following papers had the largest circulation: "Louisville Courier-Journal," daily edition, 12,600, and weekly edition, 22,300 circulation; the "Louisville Commercial," daily edition, 7,800; weekly edition, 10,000; "Louisville Christian Observer, 8,500; "Lexington Apostolic Times," weekly, 6,000.

Wealth, Taxation and Debt.—The true value of personal and real estate was $604,318,552; the assessed value of the same, $409,544,294; of which $98,064,600 were for personal and $311,479,694 for real estate. The state taxation in the same year was $2,254,413; county taxation, $1,307,883, and town, city, etc., taxation, $2,167,872; making the total taxation, not national, $5,730,118.

The Governor, in his message to the Legisla-

ture in January, 1873, says that the finances of the state are in a most healthy and prosperous condition. At the close of the fiscal year, ended October 10, 1871, the bonded debt (exclusive of the school debt, which is a permanent loan, and not therefore redeemable) was $1,069,394. Since that period there has been redeemed and canceled up to October 10, 1872, bonds amounting in the aggregate to $303,000; leaving unpaid, due and not due, $766,394. To this amount must be added $200,000 of bonds, issued under the provisions of the act approved January 18, 1872, to provide for the deficit in the treasury on account of the revenue proper.

The means at command of the commissioners of the sinking fund for the redemption of the foregoing amount of indebtedness ($966,394) and the interest thereon, were $2,420,392. The receipts for the fiscal year ended October, 1873, were estimated at $1,024,460, and the expenditures at $1,476,469, leaving a deficit of $452,009. To this must be added the deficit of the preceding year, amounting to $365,366, making the total deficit $717,375. To provide for this and to prevent any future deficit, the Governor recommends that a very large portion of the receipts, which now go into the sinking fund, be diverted into the revenue proper. Not only are there in the treasury $544,623 to the credit of the sinking fund, but the state has loaned to the Bank of Kentucky and the Farmers' Bank the sum of $1,147,368, making an aggregate of $1,691,991 in cash and available assets with which to redeem the bonded debt of the state.

Government.—The Governor, Lieutenant-Governor, Auditor, Attorney-General and Superintendent of Public Instruction are elected by the people for a term of four years. The Governor is ineligible for the four years succeeding the expiration of his term. If a vacancy occur in the office of governor during the first two years of the term, it is filled by a new election; and if it occur during the last two years, the Lieutenant-Governor, and after him the Speaker of the House, becomes acting governor. The Treasurer is elected for a term of two years. The Secretary of State is appointed by the Governor by and with the advice of the Senate. The Senate comprises 38 members, who are chosen for four years, one-half biennially. The members of the House of Representatives, numbering 100, are elected for two years. The sessions of the legislature are biennial and cannot continue longer than 60 days, without a two-thirds vote of the members of each branch. Every male citizen who has resided two years in the state, one year in the county and sixty days in the precinct in which he offers his vote, is a legal elector.

The highest judicial tribunal of the state is the Court of Appeals, which has appellate jurisdiction over the final orders and judgments of all other courts in civil cases, where the amount in controversy exceeds $50; or in cases of judgment granting divorce, or on a judgment of an inferior court from which an appeal is given to the Circuit Court.

The circuit courts have original jurisdiction in cases where the amount in controversy exceeds $50; appellate jurisdiction in certain specified cases, and criminal jurisdiction for the trial of all offenses which may be prosecuted by indictment, and all prosecutions and final actions, except where exclusive jurisdiction is given to other courts. There are also county courts and justices of the peace. Judges of the Court of Appeals are elected for terms of 8 years, one every second year, and the judge having the shortest term to serve is chief justice. The judges of the circuit courts are elected for 6 years, and the justices of the peace for 4 years.

Ky. is divided into the following 117 counties: Adair, Allen, Anderson, Ballard, Barren, Bath, Boone, Bourbon, Boyd, Boyle, Bracken, Breathitt, Breckinridge, Bullitt, Butler, Caldwell, Callaway, Campbell, Carroll, Carter, Casey, Christian, Clarke, Clay, Clinton, Crittenden, Cumberland, Daviess, Edmondson, Elliott, Estill, Fayette, Fleming, Floyd, Franklin, Fulton, Gallatin, Garrard, Grant, Graves, Grayson, Green, Greenup, Hancock, Hardin, Harlan, Harrison, Hart, Henderson, Henry, Hickman, Hopkins, Jackson, Jefferson, Jessamine, Josh Bell, Johnson, Kenton, Knox, La Rue, Laurel, Lawrence, Lee, Letcher, Lewis, Lincoln, Livingston, Logan, Lyon, Madison, Magoffin, Marion, Marshall, Martin, Mason, McCracken, McLean, Meade, Menifee, Mercer, Metcalfe, Monroe, Montgomery, Morgan, Muhlenburgh, Nelson, Nicholas, Ohio, Oldham, Owen, Owsley, Pendleton, Perry, Pike, Powell, Pulaski, Robertson, Rock Castle, Rowan, Russell, Scott, Shelby, Simpson, Spencer, Taylor, Todd, Trigg, Trimble, Union, Warren, Washington, Wayne, Webster, Whitley, Wolfe, Woodford.

The state capital is Frankfort; the largest city, Louisville. The other incorporated cities are: Paris, Covington, Newport, Lexington, Hopkinsville, Owensborough, Henderson, Mayville and Paducah.

Kentucky, tn. in Jefferson co., Kans. Pop., 1,976.

Kentucky, tn. in Nicholas co., W. Va. Pop., 615.

Kentucky River, a tributary of the Ohio R. in Ky.; is formed by the confluence of the North Fork, Middle Fork and South Fork, which unite near Proctor, in Owsley co. It flows N.W., separating Fayette, Jessamine and Woodford cos. on the E. from Madison, Garrard, Mercer and Anderson cos. on the W.; then intersects Franklin co., separates Owen from Henry co., and joins the Ohio near Carrollton. It is navigable for steamboats as far as Frankfort. The upper part of its course lies in an elevated and hilly country, where it has eroded a deep valley between picturesque rocks of limestone.

Keokuk, co. in Iowa, S. E. part. Area, 578 sq. mls. Pop., 19,434; in 1860, 13,271. The co. contains much prairie land. It is drained by Skunk R. and its branches. Sigourney is the co. seat. Agr. productions in 1870: Wheat, 342,876 bush.; rye, 14,869 bush.; Indian-corn, 1,297,469 bush.; oats, 23,410 bush.; Irish pot's, 97,943 bush.; sweet pot's, 3,049 bush.; wool, 91,713 lbs.; butter, 517,665 lbs.; hay, 35,833 tons. Cash value of farms, $8,170,684. Total, estimated, value of all farm productions, including additions to stock, etc., $2,287,488. Value of manufactures, $539,021.

***Keokuk,** city in Lee co., Iowa, on the Mississippi R., above the mouth of the Des Moines R., 208 mls. above St. Louis and on the Mississippi Valley & Western R. R., the Des Moines Valley R. R. and the Chicago, Burlington & Quincy R. R., 1,185 mls. from New York and 117 mls. W. of Peoria, Ill. It lies at the head of navigation for the largest class of steamboats and at the foot of the lower rapids, which are 11 mls. long, the river falling 24 ft. in this distance. It contains the Medical Department of the Iowa State University, iron foundries, steam flouring mills, etc. Pop., 12,766; in 1860, 8,136. Six newspapers.

Kern, co. in Cal., central part. Area about 23,500 sq. mls. Pop., 2,925. It is bounded on the W. by the Monte Diablo Range, and on the N. E. by the principal crest of the Sierra Nevada, the spurs and foot-hills of which occupy a large portion of its surface. The southern part of Tulare Lake lies in this co. and receives its largest affluent, the Kern R. A series of mountains extends through the center and connects the Coast Ranges with the Sierra Nevada, thus inclosing the most southern section of the great low plain of Cal., the so-called San Jacinto Valley. The Tejon Pass, 5,285 ft. high, leads across the mountain from this valley to the barren and sandy desert of the Mohave R., which is comprised in the eastern part of the co. The Canyada de las Uvas and the San Emidio Canyon are noted gorges in the mountains near the southern boundary, where considerable quantities of salt are obtained from the numerous springs. Many of the valleys are very fertile and yield excellent crops of wheat, corn and barley. Gold mining is an important source of wealth. Havilah is the co. seat. Agr. productions in 1870: Wheat, 13,700 bush.; Indian-corn, 3,575 bush.; oats, 590 bush.; Irish pot's, 6,050 bush.; sweet pot's, 420 bush.; wool, 281,100 lbs.; butter, 3,150 lbs.; hay, 1,643 tons. Cash value of farms, $339,650. Total, estimated, value of all farm productions, including additions to stock, etc., $192,925. Value of manufactures, $104,894.

Kernersville, p. v. in Forsyth co., N. C., 18 mls. from Greensborough.

Kerneysville, p. v. in Jefferson co., W. Va., on the Baltimore & Ohio R. R., 11 mls. W. of Harper's Ferry.

Kern Lake, a small body of water; lies in Kern co., Cal., measuring about 8 mls. in length and 3½ mls. in width. It receives the southern branch of the Kern R. and is connected by a channel with the Buena Vista Lake.

Kern River, in southern Cal.; rises in the highest part of the Sierra Nevada, near Mt. Tyndall and Mt. Brewer, on the northern confines of Tulare co., and near the sources of the South Fork of Kings R. It flows S., parallel with the main crest of the Sierra. In Kern co. it assumes a south-westerly course. Near the 109th meridian W. of Greenwich it divides into two branches. The northern empties into Tulare Lake., the southern into Kern Lake.

Kernville, p. v. in Kern co., Cal., on the Kern R. and in a valley of the Sierra Nevada, 18 mls. N. N. E. of Havilah.

Kerr, tn. in Champaign co., Ill. Pop., 361.

Kerr, co. in Tex., W. central part. Area, 550 sq. mls. Pop., 1,042; in 1860, 634. The surface is hilly; the soil rocky and poor. The central part is intersected from N. to E. by the Guadalupe R. Kerrville is the co. seat. Agr. productions in 1870: Wheat, 3,196 bush.; rye, 841 bush.; Indian-corn, 45,871 bush.; oats, 40 bush.; Irish pot's, 24 bush.; sweet pot's, 2,001 bush.; butter, 19,095 lbs.; hay, 236 tons. Cash value of farms, $99,052. Total, estimated, value of all farm productions, including additions to stock, etc., $74,827. Value of manufactures, $34,651.

Kershaw, district in S. C., N. central part. Area, 620 sq. mls. Pop., 11,754; in 1860, 13,086. The surface is hilly; the soil is generally fertile. Wateree R. forms the N. W. boundary and intersects the S. W. part. Little Lynch's Cr. intersects the N.-E. part and flows into Lynch's Cr., which forms the E. boundary of the co. Camden is the co. seat. Agr. productions in 1870: Wheat, 6,389 bush.; rye, 524 bush.; Indian-corn, 108,420 bush.; oats, 3,875 bush.; Irish pot's, 295 bush.; sweet pot's, 16,595 bush.; cotton, 4,161 bales; rice, 30,530 lbs; butter, 2,200 lbs. Cash value of farms, $761,831. Total, estimated, value of all farm productions, including additions to stock, etc., $540,604. Value of manufactures, $11,122.

***Key West,** city and the co. seat of Monroe co., Fla.; is situated on the most westerly of the islands known as the "Florida Keys." The name is a corruption of the Spanish *Cayo Huesco*, Bone Key, or Bone Island. It has a good harbor and is a port of entry. The principal industries are "sponging" and "turtling." The sponges are obtained on the reef and along the shores of Fla. Extensive salt works have been long in operation. Cigars are manufactured. Some of the inhabitants are engaged in the perilous business of "wrecking," which is quite remunerative. The wreckers are usually content with a just and equitable salvage. It is a United States station for supplying vessels with provisions, coal, etc. Fort Taylor has been erected at the entrance of the harbor and will mount 200 heavy guns. The climate is equable and healthy, and many consumptives resort to the city on this account. The mean winter temperature varies from 69 to 70 degrees. The steamboats of the New York, New Orleans & Galveston line, the Baltimore, Havana & New Orleans line and others touch at Key West. Pop., 5 016. Two newspapers.

Klamath, co. in Cal., N. W. part. Pop., 1,686; in 1860, 1,803. Almost the whole area consists of lofty mountain chains, separated from each other by deep ravines, whose sides are eroded by innumerable gulches and cañons. There is but little arable land in the co., chiefly found in the narrow river valleys. Klamath R. and its tributary, Trinity R. are the principal streams. Redwood Cr. flows west of the latter and empties into the Pacific Ocean, which forms the western boundary of the co. Many portions of the mountains are covered with spruce, fir, pine and redwood forests, yielding large quantites of valuable timber. Gold mining in placer diggings constitutes the main pursuit of the inhabitants. Orleans is the co. seat. Agr. productions in 1870: Wheat, 2,360 bush.; rye, 527 bush.; Indian-corn, 1,505 bush.; oats, 2,375 bush.; Irish pot's, 9,548 bush.; sweet pot's, 10 bush.; butter, 6,275 lbs.; hay, 693 tons. Cash value of farms, $69,850. Total, estimated, value of all farm productions, including additions to stock, etc., $117,949 Value of manufactures, $251,419.

Lake, co. in Cal., W. central part. Pop., 2,969. It consists of the valley of Clear Lake, with the surrounding mountains. The range which forms the western boundary is locally known as the Mayacannas Mts., and that which forms the eastern as the Bear Mts. Numerous small creeks empty into Clear Lake, flowing either through deep canons or broad valleys. There is much arable land of excellent quality in these valleys and near the shores of the lake. Farming and stock raising are the chief pursuits. Large quantities of butter and cheese are exported. An important source of wealth consists in the borax and sulphur deposits which abound in great profusion near Clear Lake. The bottom of Borax Lake, a small sheet of water near Clear Lake, contains enormous quantities of biborate of soda. The co. seat is Lakeport. Agr. productions in 1870: Wheat, 87,016 bush.; rye, 850 bush.; Indian-corn, 11,615 bush.; oats, 3,894 bush.; Irish pot's, 5,154 bush.; wool, 58,046 lbs.; butter, 84,268 lbs.; hay, 5,296 tons. Cash value of farms, $713,100. Total, estimated, value of all farm productions, including additions to stock, etc., $316,928. Value of manufactures, $260,290.

Lake, co. in Colo. Ter., W. part. Pop., 522. This large co. extends from the border chain of the South Park to the western boundary of the territory. The eastern extremity includes the valley of the sources of the Arkansas R., and is inclosed between the loftiest chains of the Rocky Mts., bearing Mt. Harward, Mt. Yale and other peaks. Grand R., a branch of the Colorado, flows through the co. from E to W., and receives Bunkara B. from the N. and the Uncompahgre R., Rio Los Dolores, and other affluents, from the S. Uncompahgre Mts., Pine Mts., Elk Mts. and other branches of the great Rocky Mt. system occupy the larger portion of the co. Agr. productions in 1870: Wheat, 2,173 bush.; rye, 90 bush.; oats, 5,383 bush.; Irish pot's, 6,530 bush.; butter, 3,721 lbs.; hay, 111 tons. Cash value of farms, $19,375. Total, estimated, value of all farm productions, including additions to stock, etc., $35,495. Value of manufactures, $35,550.

Lake, new co. in Dak. Ter., S. E. part. Has an uneven surface, mostly consisting of prairies. It is intersected by the Big Sioux R., and includes numerous small lakes.

Lake, co. in Ill., N. E. part. Area, 390 sq. mls. Pop., 21,014; in 1860, 18,257. The surface is level; soil clayey and remarkably fertile. The co. is bounded N. by Wis. and on the E. by Lake Michigan. It contains a large number of small lakes, which are well stocked with fish. The Des Plaines R. flows through it from N. to S.; Fox R. drains the W. part. The Chicago & Milwaukee R. R. passes along the lake shore, and the Chicago & Northwestern R. R. touches the S. W. border. Waukegan is the co. seat. Agr. productions in 1870: Wheat, 169,135 bush.; rye, 5,870 bush.; Indian-corn, 517,353 bush.; oats, 699,069 bush.; Irish pot's, 222,234 bush.; sweet pot's, 200 bush.; butter, 927,533 lbs.; hay, 76,337 tons. Cash value of farms, $10,698,599. Total, estimated, value of all farm productions, including additions to stock, etc., $2,265,727. Value of manufactures, $692,928.

Lake, tn. in Cook co., Ill. Pop., 3,360.

Lake, co. in Ind., N. W. part. Area, 480 sq. mls. Pop., 12,352; in 1860, 9,145. The northern part of the co., bordering on Lake Michigan, consists of an unproductive sand-plain, covered with dwarf pine and cedar. S. of Turkey Cr. the soil is a rich alluvium. Along the Kankakee R., which borders the co. on the S., extend swamps and marshes. The co. is intersected by the different railroads connecting Chicago with the eastern part of the country. Crown Point is the co. seat. Agr. productions in 1870: Wheat, 63,397 bush.; rye, 6,242 bush.; Indian-corn, 189,947 bush.; oats, 364,008 bush.; Irish pot's, 73,516 bush.; butter, 557,820 lbs.; hay, 40,994 tons. Cash value of farms, $5,132,015. Total, estimated, value of all farm productions, including additions to stock, etc., $968,925. Value of manufactures, $337,373.

Lake, tn. Allen co., Ind. Pop., 1,309.

Lancaster, co. in Nebr. Area, 864 sq. mls. Pop., 7,074; in 1860, 153. It consists chiefly of level or undulating prairies, and is drained by Salt Cr., an affluent of the Platte R. In the center of the co., around Lincoln, is the famous salt basin, which yields immense quantities of this article. The Burlington & Missouri River R. R. and the Midland Pacific R. R. pass through the co. Lincoln is the co. seat. Agr. productions in 1870: Wheat, 133,187 bush.; rye, 455 bush.; Indian-corn, 134,400 bush.; oats, 73,239 bush.; Irish pot's, 32,118 bush.; sweet pot's, 25 bush.; butter, 94,018 lbs.; hay, 7,974 tons. Cash value of farms, $2,136,053. Total, estimated, value of all farm productions, including additions to stock, etc., $578,414. Value of manufactures, $57,727.

Lancaster, tn. in Coos co., N. H. Pop., 2,248.

***Lancaster,** p. v. in the above tn. and the co. seat, at the junction of Israels R. with the Connecticut R. and on the Boston, Concord & Montreal R. R., 45¾ mls. N. E. of Wells River, Vt. It is the center of a thriving trade. Two newspapers.

Lancaster, tn. in Erie co., N. Y. Pop., 4,336.

Lancaster, p. v. in the above tn., on Cayuga Cr. and the Buffalo Branch of the Erie R. R., 10½ mls. E. of Buffalo. Pop., 1,697.

***Lancaster,** city and the co. seat of Fairfield co., Ohio, on the Hocking R. and at the intersection of the Hocking Valley R. R. with the Cincinnati & Zanesville R. R., 21 mls. N. E. of Circleville and 43 mls. S. W. of Zanesville. Is a thriving place, with a large local commerce. Pop., 4,725; in 1860, 4,303. Two newspapers.

Lancaster, co. in Pa., S. E. part. Area, 920 sq. mls. Pop., 121,340; in 1860, 116,314. The surface is generally rolling, with some low ranges of hills, as the Martic, or Mine Ridge, in the southern, and the Forest Hills in the northern, part. The Conewago Hills separate this co. from Dauphin co. The streams intersecting and draining it are tributaries of the Susquehanna, which separates it from York co., as Chiques Cr., Conestoga Cr., Pequea Cr., Fishing Cr., Conowingo Cr. and Octorara Cr., which forms in part its S. E. boundary. No co. in the state is more productive than this, so thoroughly cultivated, or possesses a better class of farm buildings. The soil in the northern part is a rich limestone, in the southern a talcose slate, which yields readily to cultivation. It is intersected by the Pennsylvania Central R. R., Reading & Columbia R. R. and their branches. Lancaster is the co. seat. Agr. productions in 1870: Wheat, 2,077,413 bush.; rye, 88,245 bush.; oats, 1,943,577 bush.; Indian-corn, 2,820,825 bush.; Irish pot's, 419,755 bush.; sweet pot's, 33,821 bush.; butter, 2,462,376 lbs.; hay, 124,185 tons. The tobacco crop for 1872 was estimated at 26,000 cases of 350 lbs. each, or over 9,000,000 of lbs., making it the largest tobacco-growing co. in the country. Cash value of farms, $70,724,908. Total, estimated, value of all farm productions, including additions to stock, etc., $11,845,208. Principal products of industry: Cotton goods, $1,757,321; flour, $3,041,928, and pig iron, $2,024,551. Total value of manufactures, $14,034,180.

Lancaster, tn. in Lancaster co., Pa. Pop., 1,062.

***Lancaster,** city and the co. seat of Lancaster co., Pa., near Conestoga Cr. and on the Pennsylvania Central R. R., 69 mls. W. of Philadelphia and 37 mls. E. S. E. of Harrisburg. It is connected with the Reading & Columbia R. R., and a narrow gauge railroad connects it with Quarryville. The city is surrounded by the richest agricultural district of the state, and has many fine public and private buildings: as the Court House, County Prison, Home for Friendless Children, a new opera house, the buildings of Franklin and Marshall College, and of the Theological Seminary of the Reformed Church, all of which latter are situated upon an eminence commanding a view of the city, and of the surrounding country for many miles. These, and a classical academy, are prosperous institutions. L. has important manufacturing establishments, as the large locomotive works, extensive cotton factories, and factories of rifles, carriages, agricultural implements, etc., several large tobacco packing houses and numerous banking institutions. Pop., 20,233; in 1860, 17,603; in 1850, 12,369, and in 1840, 8,417. It has sixteen newspapers, three of which are issued daily.

Lancaster, tn. in Butler co., Pa. Pop., 1,053.

Lancaster, district in S. C., N. part. Area, 600 sq. mls. Pop., 12,087; in 1860, 11,797. The surface is uneven and the soil moderately productive. N. C. bounds it on the N., Catawba and Wateree Rs. on the W., and Lynch's Cr. on the E. Lancaster Court House is the co. seat. Agr. productions in 1870: Wheat, 15,872 bush.; rye, 8,722 bush.; Indian-corn, 100,173 bush.; oats, 16,135 bush.; Irish pot's, 1,676 bush.; sweet pot's, 7,932 bush.; cotton, 3,414 bales; butter, 30,292 lbs. Cash value of farms, $615,726. Total, estimated, value of all farm productions, including additions to stock, etc., $837,966. Value of manufactures, $114,160.

Lancaster, p. v. in Dallas co., Tex., 15 mls. from Dallas, the co. seat.

Lancaster, co. in Va., E. part. Area about 175 sq. mls. Pop., 5,355; in 1860, 5,151. It borders in the S. on the Rappahannock R. and in the E. on Chesapeake B. Moratico Cr. in the W. separates it from Richmond co. The surface is low and level; the soil moderately productive. Lancaster Court House is the co. seat. Agr. productions in 1870: Wheat, 12,978 bush.; rye, 190 bush.; Indian-corn, 22,544 bush.; Irish pot's, 908 bush.; sweet pot's, 722 bush.; butter, 50 lbs. Cash value of farms, $849,895. Total, estimated, value of all farm productions, including additions to stock, etc., $112,316. Value of manufactures, $44,673.

Lancaster, tn. in Grant co., Wis. Pop., 2,716.

Long Island, forming a portion of the state of N. Y., and extending from 72° to 74° 2′ W. long. a distance of 116 mls.; has an average breadth of 15 mls. It is separated from the state of Conn. by the Long Island Sound, and from N. Y. by the narrow strait known as the East R. Along the northern shore of the island there extends a chain of low and generally well-wooded hills; the southern part is low, level and sandy. The soil is mostly fertile and farming and fruit growing are largely carried on. The island is divided into Kings, Queens and Suffolk counties.
Long Island, p. o. in Jackson co., Ala.
Long Island, p. o. in Phillips co., Kans.
Long Island City, p. v. in Queens co., N. Y., N. of Brooklyn, on the East R. and at the terminus of Long Island, Flushing & North Side R. Rs. Engaged in manufactures. Pop., 3,867. Four newspapers.
Long Island Sound separates L. I. from the states of Conn. and N. Y. It is about 115 mls. long and from 2 to 25 mls. wide. Its western end, called the East R., forms a narrow strait, separating the cities of New York and Brooklyn and joining New York B. Some rocky ledges in the East R. produce a whirlpool, called Hell or Hurl-Gate, which prevents the passage of large ships. The work of removing the rocks and thereby deepening the channel has been commenced. When this improvement is finished, the largest ships may go to N. Y. through the Sound.

Los Angeles, co. in Cal., S. W. part. Area about 2,125 sq. mls. Pop., 15,309. Its southern boundary is formed by the Pacific Ocean. The northern part is a barren, hot and sandy desert; the southern part is traversed by the Coast Ranges, as the Sierra Santa Monita, Sierra San Fernando, San Gabriel Range and others. These inclose beautiful valleys and plains, which comprise the best farm lands. The principal streams are the San Gabriel R. and its tributary, the Los Angeles; the Coyote R. and the lower course of the Santa Anna R. The warm but equable temperature and the rich soil render the southern part of the co. one of the most attractive sections of the state. Here the grape-vine of all varieties thrives luxuriantly. The orange, lemon, fig and other semi-tropical fruits grow to perfection, while the facilities for irrigation enable the farmer to raise heavy crops of wheat, barley, corn and all the vegetables. A railroad connects the co. seat, Los Angeles, with the sea-port of Wilmington on San Pedro B. Agr. productions in 1870: Wheat, 12,210 bush.; rye, 7,408 bush.; Indian-corn, 454,896 bush.; oats, 253 bush.; Irish pot's, 20,407 bush.; sweet pot's, 3,310 bush.; wool, 962,603 lbs.; butter, 25,-896 lbs.; hay, 11,249 tons. Cash value of farms, $4,245,885. Total, estimated, value of all farm productions, including additions to stock, etc., $939,859. Value of manufactures, $725,036.

LOUISIANA is bounded on the S. by the Gulf of Mexico; on the N. by Ark. and Miss.; on the W. by Tex., and on the E. by Miss. Its total area is 41,346 sq. mls., or 26,461,440 acres. It includes the extensive delta of the Mississippi.

Surface.—The state throughout is a low, alluvial plain, in no part rising more than 200 feet above the sea level. The north-western and western counties are hilly, and better drained than the southern and eastern. These latter include extensive swamps and cane-brakes, often overflowed by the tides. Along the Mississippi R. much of the soil is below the level of the stream during high water, and is protected from inundation by levees or dykes of earth. The occasional yielding of one of these levees causes what is called a "crevasse," through which the water pours with great force, causing a widespread destruction of property.

Rivers and Lakes.—The chief river of La. is the Mississippi. This magnificent stream is navigable throughout its whole length in the state for the largest steamboats at all seasons of the year. It brings down vast quantities of earth in solution, which it deposits at its mouth, forming a delta of rich soil. (See Mississippi R.) The Red R., also a large and navigable stream, extends through the central and north-western part of the state, and forms an important avenue of inland commerce. The Washita, in the N., and the Calcasieu, in the S. are also rivers of considerable magnitude. Numerous lakes and lagoons are scattered over the state. The largest is Lake Ponchartrain, N. of the city of New Orleans, which has a navigable connection with the Gulf of Mexico, through Lake Borgne, and with Lake Maurepas on the W. These lakes are but expansions of the Amite R., which rises in Miss. and empties into Lake Maurepas. The Mississippi Delta also includes a number of lakes, which are fed by the branches of the great river. Such are Grand Lake, an expansion of the Atchafalaya Bayou, Lake Washa, Lake Quitman and others. The Mermenteau, Calcasieu and Sabine Rs. form each an extensive lake at no great distance from their mouths. The bed of the Red R. is obstructed by the "Great Raft," an accumulation of drift-wood, which causes the formation by the back-water of extensive lakes, as Lake Caddo and others. Lakes Bodeau, Bistineau, Black, Spanish, Jatt, and Catahoula are drained by tributaries of Red R.

Climate.—The climate of La. is warm, but with colder winters and more variable than the regions in the same latitude on the Atlantic coast. The mean annual temperature of New Orleans is about 69° Fah.; the mean annual rain fall is 50 inches. The greater part of the rain is in the spring and summer months. Owing to the dampness, the variability of the temperature, and the extent of low, undrained lands, the climate is an unhealthy one, especially for strangers. Yellow fever and miasmatic fevers are yearly visitors in many sections.

The vegetation is luxuriant, oranges, sugar-cane, bananas, and other tropical productions being raised. The cypress, cedar and yellow pine are among the principal trees. The lagoons abound in alligators, turtles and fish, while serpents, and insects are numerous in the swamps.

The Population of the state was, in 1810, 76,556; in 1820, 152,923; in 1830, 215,739; in 1840, 352,411; in 1850, 517,762; in 1860, 708,002 and in 1870, 726,915. As La. was originally colonized by France, the inhabitants largely consist of descendants of the early French settlers, who have preserved their language and customs. Spaniards and descendants of Spaniards are also numerous. The race division of the population, according to the last census reports, is as follows: Whites 362,065; colored persons, 364,210; chinese, 71, and Indians 569. The latter are out of tribal relations.

According to their nativity, the inhabitants are thus divided: Born in the United States, 665,088; inclusive of 501,864 natives of the state; born in foreign countries, 61,827. The latter, in 1870, comprised 714 British Americans, 18,933 Germans, 792 Englishmen, 17,068 Irishmen and 814 Scotchmen.

The total population in 1870 included 526,392 persons of ten years and more of age, and of these 256,452 were engaged in the various classes of useful occupations, viz.: 141,467 in agriculture, 65,347 in professional and personal services, 23,831 in trade and transportation, and 25,807 in manufactures and mechanical industries.

Minerals.—The tertiary formation, which occupies two-fifths of the state N. of a line from the junction of the Sabine and Neches Rs. to Harrisonburgh, in Catahoula parish, contains iron, ochre, gypsum, marl and coal. The latter is however not of the best quality. The southern part of the state, including the Mississippi Delta, is composed of alluvium, brought down and deposited by the Mississippi and its tributaries. Beds of pure sulphur have been found below these deposits.

Agriculture.—The best soil of La. is that of the river bottoms, and may be considered inexhaustible. The higher portions consist of open prairies, which are but moderately productive. Sugar and cotton are the great agricultural staples of the state. Of the former were produced, in 1870, 80,706 hogsheads against 221,726 hogsheads in 1860; and of the latter 350,832, bales against 777,738 bales in 1860; thus showing a deplorable decrease in the chief industry, due to the disastrous effects of the civil war and the consequent disorganization of society and the state. The other products, according to the census, were: 4,585,150 gallons of cane molasses;

9,906 bush. of wheat; 7,596,628 bush. of Indian-corn; 15,854,012 lbs. of rice; 15,541 lbs. of tobacco; 140,428 lbs. of wool; 67,695 bush. of Irish pot's; 1,023,706 bush. of sweet pot's; 322,405 lbs. of butter, and 8,776 tons of hay.

The live stock had a value of $15,929,188, and comprised 59,738 horses, 61,338 mules and asses, 102,076 milch cows, 32,596 working oxen, 200,589 other cattle, 118,602 sheep and 338,326 hogs.

The cash value of farms was $68,215,421, and of all farm productions, including betterments and additions to stock, $52,006,622. The farms included 2,045,640 acres of improved land, 4,003,170 of woodland, and 977,007 of other unimproved land.

The Manufactures of La. are unimportant and comprise but a few articles. In 1870 there were 2,557 manufacturing establishments, with an invested capital of $18,313,974; employing 887 steam-engines of 24,924 horse-power, and 30,071 hands, receiving $4,593,470 wages, and consuming $12,412,023 worth of raw materials. The total value of products was $24,161,905; but of this sum, $10,341,868 was for raw sugar, which in reality is an agricultural product. The sugar refined in the state had a value of but $643,085; the sawed lumber of $1,212,037, and the flour and meal of $726,287.

Commerce.—La. has unequaled facilities for commercial intercourse. Bordering on an accessible branch of the sea, and being traversed in several directions by the most magnificent navigable streams, this state is the natural outlet for the surplus products of the great central plain of the continent—the Mississippi Valley—the most extensive body of rich lands on the face of the globe. In addition to her unequaled water communications, she has a railroad system which will soon connect her principal cities with the states lying to the E. and to the W. In 1862 the mileage of her railroads was 335: in 1872, 539. The New Orleans, Mobile & Texas R. R. intersects the state from E. to W. The division from Mobile to New Orleans (140 mls.) is in working order, and the division from the latter city to Houston, Tex. (335 mls.), in rapid progress of construction. Two branches of this road connect Vermillionville with Shreveport and Brashear City. The New Orleans, Jackson & Great Northern R. R. is completed from New Orleans to Canton, Miss. (206 mls.), and the New Orleans, Baton Rouge & Vicksburg R. R. has been projected.

La. has two ports of entry: New Orleans and Teche, whose combined registered, enrolled and licensed vessels in 1871 numbered 255, with 51,365 tons. Forty-one of these vessels, with 20,718 tons, were steamers. The value of imports was $19,427,238, and of domestic exports, $93,953,081.

Wealth, Taxation and Debt.—The assessed value of real estate, in 1870, was $191,343,376; and of personal property, $62,028,514; but the true value of both was estimated at $323,125,666. The total, not national, taxation was $7,060,722, of which $2,671,693 were state taxes, $4,109,999 county taxes, and $279,030 city and town taxes. The total public debt had reached the enormous amount of $53,087,441, which included $25,021,734 state indebtedness; $1,326,635 of county indebtedness, and $26,739,072 of city and town indebtedness. In 1871 the state debt was estimated at $30,244,752, being exceeded only by the debt of the wealthy state of N. Y.

Education.—The number of school children in the state, in 1870, was 253,353, according to the report of the State Superintendent of Public Education; but only 23,223 (less than 10 per. cent.) of these were enrolled pupils. There were 230 public schools with 524 teachers, and 132 private schools with 203 teachers and 6,170 pupils. There were also 48 classical, technical and professional schools with 440 teachers and over 5,000 pupils. The Louisiana State University, located at Baton Rouge, was organized in 1860, and had, in 1870, 185 students (here called cadets). Straight University, at New Orleans, is making steady progress and gives promise of extended usefulness in the future. Union Normal School, also at New Orleans, is sustained by the Methodists.

The number of papers published in 1870, in La., was 92, which had a circulation of 84,165. Seven of these were dailies and 75 weeklies. The "New Orleans Picayune," of New Orleans, has the largest influence and a circulation of 12,200. The "New Orleans Times," the "Bee," and the "Deutsche Zeitung" were the only other papers whose circulation exceeded 5,000.

Government.—La Salle, a French navigator, first ascended the Mississippi in 1682, and took possession of both banks under the name of Louisiana. The first permanent colonies were established in 1699 and 1700, and New Orleans was founded in 1718. In 1803 the territory of which La. forms a part was sold to the United States for the sum of $12,000,000, and in 1812 it was admitted as a state into the Union. The Governor, Lieutenant-Governor, Secretary of State, Auditor, Treasurer, Superintendent of Education and Attorney-General are chosen for the term of four years. The Senate is composed of 36 members, who are elected for four years (one-half biennially). The House of Representatives consists of 101 members. The constitution provides that it shall not exceed 120 members and not be less than 90. Every male person of the age of 21 years and upward, born or naturalized in the United States, and a resident of the state one year next preceding an election and the last ten days within the parish in which he offers to vote, shall be deemed an elector.

The judicial power is vested in a Supreme Court, Districts Courts, Parish Courts and Justices of the Peace. The Supreme Court has appellate jurisdiction only, and is composed of a Chief Justice and four Associate Justices. The justices of this court are appointed by the Governor, with the advice and consent of the Senate, for eight years. The Supreme Court holds its sessions at New Orleans from the first Monday of November to the end of May. The state is divided into twelve districts, in each of which is one district court, except the district of New Orleans, which has seven. These courts have unlimited jurisdiction in criminal cases; original jurisdiction in all cases in which the amount in dispute exceeds $500, and appellate jurisdiction in cases in which the amount in dispute exceeds $100.

La. is divided into the following 55 parishes: Ascension, Assumption, Avoyelles, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Cameron, Carroll, Catahoula, Claiborne, Concordia, De Soto, East Baton Rouge, East Feliciana, Franklin, Grant, Iberia, Iberville, Jackson, Jefferson, La Fayette, La Fourche, Livingston, Madison, Morehouse, Natchitoches, Orleans, Ouachita, Plaquemines, Point Coupee, Rapides, Red River, Richland, Sabine, St. Bernard, St. Charles, St. Helena, St. James, St. John Baptist, St. Landry, St. Martin, St. Mary, St. Tammany, Tangipahoa, Tensas, Terre Bonne, Union, Vermillion, Washington, Webster, West Baton Rouge, West Feliciana and Winn.

New Orleans is the state capital, and the other incorporated cities are Donaldsonville, Shreveport and Baton Rouge.

Louisville, p. v. in the above tn. and the co. seat, 3¼ mls. N. of Wamego on the Kansas Pacific R. R. It employs the water-power of Rock Cr. in manufacturing. Pop., 344. One newspaper.

***Louisville,** city, a port of entry and the co. seat of Jefferson co., Ky.; is situated on the Ohio R. above the falls, 142 mls. below Cincinnati, 618 mls. below Pittsburgh, and 387 mls. above Cairo. It is the terminus of the Louisville, Cincinnati & Lexington R. R.; the Louisville & Nashville R. R.; the Jeffersonville, Madison & Indianapolis R. R.; the Louisville Branch of the Ohio & Mississippi R. R.; the Memphis & Louisville Line, and the Louisville, New Albany & Chicago R. R.

The great prosperity of the city is chiefly due to its advantageous commercial position in the centre of the Ohio Valley and the highly productive country surrounding it. As a market for tobacco, whisky, horses, cattle and pork, it holds a foremost rank among the cities W. of the Alleghanies. Tobacco is stored in several immense warehouses, and then sold at auction, either for home consumption or for direct exportation to Europe. In 1860 there were thus sold 17,573 hhds.; in 1868, 29,509 hhds.; in 1870, 40,047 hhds., and in 1871, 48,008 hhds., exclusive of the large quantities changing hands at private sales. A Tobacco Exchange and Depot, of the largest dimensions is being erected by a chartered company, with a capital of $5,000,000. The tobacco factories produced, in 1871, 3,352,334 lbs. of chewing tobacco, against 2,332,752 lbs. in 1870, and 526,321 lbs. of smoking tobacco, against 146,507 lbs. in 1870.

The sales of whisky, mostly the famous "Bourbon," amounted in 1870 to 9,853,173 gallons. The horses and cattle of Ky., especially those raised in the Blue Grass region, are celebrated throughout the Union. In 1870 there were sold in L. 24,000 horses and mules; 110,000 cattle; 600,000 hogs, and 100,000 sheep. In the seven pork houses of the city, 264,826 hogs were killed and packed. L. has 519 manufacturing establishments, employing 11,000 hands and a capital of nearly $17,000,000, and producing goods to the value of $46,845,000. The largest manufactories are: 10 iron foundries, 3 brass foundries, 4 plow factories, 4 distilleries, 5 breweries, 4 furniture factories, 2 stove foundries, 2 paper mills, 9 planing mills, 2 hub and spoke factories, 10 tanneries, 5 woollen factories, 3 cotton factories, 3 oil mills, 3 agricultural implement works, 6 flouring mills, 7 tobacco factories, 2 white lead works, a chemical factory, an edge tool factory, a bolt factory, 2 glass factories and a steel factory.

In 1871 there were built on the wharves of L. 23 steamboats and 10 barges, having an aggregate capacity of 13,146 tons.

The first permanent settlement on the spot now occupied by L. was made in 1778, and in 1828 it was incorporated as a city. Two years later it had a population of about 10,000; in 1860, 75,085, and in 1870, 100,753, making it the fourteenth largest city in the Union. The natives of the United States numbered 75,085, and of foreign countries 25,668, including 856 Frenchmen, 14,380 Germans, 930 Englishmen and 7,216 Irishmen.

In all classes of occupations were engaged 35,800 persons, viz.: 331 in agriculture, 15,329 in professional and personal services, including 119 clergymen, 31 journalists, 214 lawyers, 241 physicians and surgeons, 377 teachers, 5,824 domestic servants and 5,612 laborers; 7,652 in trade and transportation, and 12,488 in manufactures and mechanical occupations.

The city lies on a beautiful and productive plain, which extends 30 mls. along the S. bank of the Ohio R. The wide streets, running nearly parallel with the stream, are intersected by others at right angles. Except the principal business avenues (Jefferson, Market and Main), the streets are lined with shade trees, and the residences stand in garden plats and lawns.

The chief public work of L. is the Louisville & Portland Canal, which was constructed around the falls in the river, and is about 2½ mls. long. The magnificent railroad bridge which spans the Ohio R. is 2½ mls. long, and rests upon 16 massive stone piers. Another similar bridge has been projected and will soon be built.

The city is divided into 14 wards, each of which is represented in the general council by 2 councilmen and 1 alderman. The mayor is elected for two years. The City Hall, Court House and House of Refuge are among the most prominent public buildings. The University of Louisville was organized in 1837, and comprises two faculties (of law and of medicine). It possesses a fine library and a collection of philosophical apparatus. There is also a medical college, with 15 professors. The city has two high schools for boys and one high school for girls, several intermediate schools and district schools. The attendance of the public schools in 1870 was 9,705, and the total expenditure for the same amounted to $188,883. The school-houses had a value of $598,000. An excellent German-American academy was founded in 1857, and reorganized 1865. The Mercantile Library contains more than 20,000 volumes, and the Historical Society has many important and rare works, illustrating the early history of the state.

The city has 76 churches, many of which are magnificent structures, as the Cathedral, St. Paul's Episcopal Church, the First Presbyterian Church and others.

The leading newspapers are: The "Louisville Courier-Journal," daily and weekly; the "Louisville Commercial," daily and weekly; the "Louisville Ledger," evening daily and weekly; "Lousville Volksblatt" and "Louisville Angeiger," both German dailies and weeklies. The total number published is twenty-seven.

***Lowell,** city in Middlesex co., Mass., on the Boston, Lowell & Nashua R. R., 26 mls. N. N. W. of Boston, and the terminus of the Lowell & Lawrence Branch, the Salem & Lowell Branch and the Lowell Division of the Boston, Clinton & Fitchburg R. R. It is situated at the confluence of the Merrimac and Concord Rs. A descent of 33 feet in the Merrimac, known as the Pawtucket Falls, furnishes about 12,000 horse-power, and additional power is afforded by a canal built from the outlet of Winnepisaukee Lake.

It is now one of the first manufacturing cities of the country. In 1871 it had 69 mills with a capital of $14,000,000; employing 9,404 women and 5,413 men, and running 570,586 spindles and 13,466 looms. The principal products were: 2,539,000 yards of woollen goods; 1,924,000 yards of carpeting; 130,000 shawls; 9,000,000 pair of hose; 51,691,200 yards of dyed and printed cloth, and 122,096,000 yards of cotton fabrics.

The population was, in 1850, 33,383; in 1860, 36,827, and in 1870, 40,928; of whom 26,493 were natives of the United States, and 14,435 foreigners; including 3,037 natives of British America (mostly French Canadians), 9,103 of Ireland, 1,697 of England and 469 of Scotland. Eight newspapers are published in the city.

Luzerne, co. in Pa., N. E. part. Pop., 160,755; in 1860, 90,244. The Alleghany Mts. occupy the northern part and the Nescopeck Mts., with many subordinate ranges, the southern. Through the center of the co. there extends a system of parallel ridges, which include the Valley of Wyoming, famous for its charming scenery and its immense wealth in anthracite coal deposits. The most south-easterly of these ridges is called in the W. the Wyoming Mts., on the N. E. the Moosic Mts., and the most northerly bear the local names of Knob Mts., Shickshinny Mt., Shawney Range, Capous Range and Lackawanna Range. The Wyoming Valley, with its continuation, the Lackawanna Valley, forms an elliptical basin of about 60 mls. in length, and bordered all around by picturesque mountains 1,000 feet above its bottom. Wilkesbarre is the co. seat. Agr. productions in 1870: Wheat, 104,297 bush.; rye, 115,339 bush.; oats, 475,988 bush.; Indian-corn, 368,537 bush.; Irish pot's, 573,322 bush.; sweet pot's, 12 bush.; butter, 1,068,565 lbs.; hay, 58,145 tons. Cash value of farms, $21,565,724. Total, estimated, value of all farm productions, including additions to stock, etc., $3,224,040. Principal products of industry: Freight and passenger cars, $799,060; flour, $1,350,438; gunpowder, $642,907; forged and rolled iron, $2,258,500; pig iron, $1,302,000; tanned leather, $1,105,424; sawed lumber, $1,460,987, and machinery, $1,307,320. Total value of manufactures, $17,493,463. The coal mines yielded, in 1870, 9,519,298 tons of anthracite coal, of $22,325,591 in value.

Luzerne, tn. in Fayette co., Pa. Pop., 1,807.

MAINE, the most north-eastern state of the Union; is bounded on the S. by the Atlantic Ocean, on the N. by Canada, on the W. by N. H. and on the E. by New Brunswick. It has an area of 35,000 sq. mls., or 22,400,000 acres. It extends from 43° 5′ to 47° 30′ N. lat. and from 66° 50′ to 71° W. long., being about 250 mls. long from N. to S. and 190 mls. wide from E. to W.

The sea-coast, though in a straight line, contained within about 4½° of long., extends with all its bays, indentations and peninsulas over more than 3,000 mls., and is without exception the most broken and irregular of any state of the Union bordering on the ocean. It has a general N. E. and S. W. trend, conforming to the direction of the rock strata found throughout the state, is steep and rocky, and presents innumerable picturesque promontories, magnificent island scenery and valuable harbors.

At its eastern extremity is Passamaquoddy B., which receives the St. Croix R., separating Me. from New Brunswick, and projects Lubec B. far into the land. Leaving Passamaquoddy B. we double Quoddy Head, and after a sail of 23 mls. reach Mathias B. Then follows Englishman's B., with Rogue and Mistake islands; Narraguagas B., Frenchman's B., with the lofty peaks of Mt. Desert Island, so famous for its grandeur; Isle Haute B., forming, with Penobscot B. and Belfast B., the magnificent estuary of the Penobscot R., and washing the shores of Fox Island, Deer Island and Long Island; Muscongus B., Damariscotta B., Sheepscott B., the romantic estuary of Kennebec R., Quohog B., Casco B. (with its numberless small islands), Saco B., and, lastly, the wide mouth of the Piscataqua R.

Surface.—A broad belt of mountain country enters Me. on its western boundary, and trending in a north-easterly direction far into New Brunswick, occupies the central portions of the state. This belt is a part of the Appalachian System, and more especially of the White Mts. of N. H. It bears numerous peaks of great height, which do not, however, form continuous ranges, but rather separate groups, often very irregularly arranged. In Oxford co. there are many summits but little less elevated than Mt. Washington and others of the adjacent state. Farther E. they gradually diminish in height until they approach the western bank of the Kennebec R., in Somerset co., where the continuity of the belt is broken by the valley of this stream. On its eastern banks the highlands reappear, first in broad swells and hills, and then again assume, in Piscataquis co., the impressive mountain size, especially on the northern tributaries of the Piscataquis R., as in Ebeme and Spencer mountains. From Mt. Katahdin (5,720 feet), the culminating height of this part of the highlands, there is again a gradual falling off, and another break is formed by the valley of the East Branch of the Penobscot. Beyond this river the highlands trend off to the state line of New Brunswick, where Mars Hill (about 2,000 feet high) forms the culminating point. Among the numerous peaks of this last section may be mentioned the "Sugar Loaf," Chase's Mt., Speckled Mt., or Mt. Mattaluck, near Grafton; Mt. Puzzle, in Hanover; Mt. Blue, in Avon; Mt. Abram, in Salem, and Saddleback and Bigelow in New Vineyard.

North of this highland belt the country gradually slopes down to the broad valley of the R. St. John, while the north-western boundary of Me. is formed by the range which divides the waters of the St. Lawrence from the Atlantic Ocean, and which is one of the prolongations of the Green Mts. of Vt. Toward the S. the highland belt sinks down to the sea-coast.

Rivers and Lakes.—Me. is exceedingly well supplied with streams, lakes and ponds. Five principal lake systems may be distinguished; that is, chains of lakes, connected by rivers and thoroughfares and drained by main channels, which convey their surplus waters to the ocean. The Umbagog chain, consisting of the lakes Umbagog, Wallakenabagog, Argwassuck and Musilla Maguntic, is drained by the Androscoggin R. This stream rises in the N. W. corner of the state, near Saddle Hill, flows S., makes a bend into N. H., where it cuts through the highland belt, then turns E., flowing along the southern base of its highest mountain groups, and turning near Jay, in Franklin co., pursues a southerly course to the ocean.

The Moosehead chain is drained by the Kennebec R., which flows in a southerly direction through the state and empties into the sea, having an estuary in common with the Androscoggin. The principal affluents of the Kennebec are Dead, Moose, Sandy and Sabasticook Rs.

The Penobscot R. drains a larger portion of Me. than any other stream. It is formed by the confluence of the W. and E. branches, which join in Penobscot co. The Western Branch rises in the Laurentian water-shed near the N. W. state line, and has in the main an easterly course, draining Chesuncook Lake, Pemadumcook Lake, and Millinoket Lake. Into the northern extremity of Chesuncook Lake empties the Caucomgomac R., which is the outlet of a lake of the same name. The East Fork rises in the highland belt and has a general course to the S. S. E., draining Mattagomon Lake, and receiving the Sebois R., the outlet of Sebois Lake. The tributaries of the Penobscot R., S. of the junction of the two branches, are the Mattawamkeag R. (which receives the Baskahegan R. and other outlets of lakes); the Piscataquis R., draining Sebec Lake, Otter Pond and Endless Lake; the Passadumkeag R. and others.

Grand R. forms in part the eastern boundary of Me., is the outlet of the Schoodic or Grand Lake series, and empties into Passamaquoddy B.

The fifth and last great lake series is that of the R. St. John, in the northern portion of the state. This large stream rises near the 46th parallel in Somerset co., and pursues a N. N. E. course under the name of Woolastook R. On striking the state line it receives the St. Francis R., flows to the E. along the boundary, and turning S. intersects New Brunswick. Its largest affluent in north-western Me. is the Alleguash, which drains Telos Lake, Chamberlain Lake, Huron Lake, Umsaskis Lake and many other smaller sheets of water. Fish R., which drains Madawaska Lake, Cross Lake, Square Lake, Eagle Lake and Long Lake, joins the St. John near Fort Kent, and the Aroostook R., flowing along the northern base of the highland belt, joins it in New Brunswick.

The south-western part of the state is drained by the Saco R., which rises on the slope of Mt. Washington, the highest peak of the White Mts. Its general course through the gorges of the mountains is first southerly, then easterly. At Fryeburg it assumes a S. E. direction.

The shorter rivers emptying into the Atlantic Ocean are the following: Tresumpscut R., the outlet of Sebago Pond, in Cumberland co.; Sheepscot R., Union R., draining Hancock co.; Narraguagus R., Pleasant R. and Machias R., which is formed by the East and West branches.

The Superintendent of the Hydrographic Survey of Maine, Mr. Walter Wells, in his excellent report of 1869, estimates the inland waters—rivers and lakes—to cover a total area of 3,200 sq. mls., and the lakes alone 2,300 sq. mls., or about 1-15 part of the state.

Climate and Vegetation.—The climate of Me. is salubrious. The winters are long and often severe, but free from sudden changes. The summers are pleasant and short. At Biddeford, frosts have been observed as early as the 15th of September and as late as the 12th of June. Rarely does the season of plant growth last over four months.

Observations made during the year ending on December 1, 1861, at Belfast, in 44° 26′ N. lat., gave the following results: Mean annual temperature, 42.8°; highest temperature, 85°; lowest, −32°; greatest monthly range of the thermometer, 78°. Northerly winds and south-westerly winds were most frequent; southerly and easterly winds least frequent.

The mean annual temperature at Fort Kent on the R. St. John is about 37°; at Fort Fairfield, 38°; at Eastport, 43°; at Castine, 43½°; at Portland, 43 3-20°; at Brunswick and Bath, 44½°, and at Gardiner nearly 44°.

Me. is one of the best timbered states of the Union, and notwithstanding immense tracts of forest have been cut down, enough is left to support the lumber business for many years to come. The total forest area has been estimated at upward of 21,000 sq. mls. In the northern part of the state the forests consist chiefly of pine, hemlock and spruce. Deciduous trees, as maple, beech, birch, poplar, elm, etc., occur, but are less abundant than the coniferous trees.

Wild animals are not rare in the thinly inhabited parts of the state. The moose, caribou, wild-cat and panther are sometimes met with in the northern forests. The other animals are the deer, bear, mink, sable, martin, beaver, woodchuck, raccoon and squirrel. Wild geese and ducks inhabit the lakes and ponds; passenger pigeons, humming birds and other migratory birds make their homes here during the warm season, and eagles, hawks, owls, etc., are found in all parts of the state.

Population.—In 1790 Maine had 96,540 inhabitants; in 1800, 151,719, in 1810, 228,507; in 1820, 298,269; in 1830, 399,455; in 1840, 501,719; in 1850, 583,169; in 1860, 628,279, and in 1870, 626,915. During the last decade the decrease of population was 1,364 or somewhat over 1-5 per cent. The population is almost entirely white. In 1870 there were but 1,606 colored persons and 499 Indians in Maine. Of the grand total, 578,034 were natives of the United States, and of these, 549,650 natives of the state. The total foreign-born population was 48,881, including 26,661 natives of British America, 508 of Germany, 3,645 of England, 15,745 of Ireland, and 998 of Scotland.

The persons of 10 years of age and over numbered 493,847; of these were engaged in all classes of useful occupations, 208,225, viz.: 80,011 in agricultural, 36,092 in professional and personal services, 28,115 in trade and transportation, 62,007 in manufactures and mechanical industries.

Minerals.—Maine is not a mining state. Fine granite and marble are the chief mineral resources. Slate for roofing and school purposes is found in the northern part.

Agriculture.—The amount of land in farms was, in 1870, 5,838,058 acres, or 25¼ per cent. of the total area of the state. The number of acres of improved land was 2,917,793; of woodland, 2,224,740 acres, and of unimproved farm lands, 695,525. The total number of farms was 59,804, of which 22 889 had from 20 to 50 acres and 19,781 from 50 to 100 acres. The cash value of farms was $102,961,951; of farm implements, $4,809,113; of farm productions, including additions to stock, $33,470,044; of orchard products, $874,569; and of forest products, $1,531,741.

The principal products were: Spring wheat, 274,593 bush.; winter wheat, 4,200 bush.; rye, 34,115 bush.; Indian-corn, 1,089,888 bush.; oats, 2,351,354 bush.; buckwheat, 466,635 bush.; Irish pot's, 7,771,009 bush.; wool, 1,774,168 lbs.; butter, 11,636,482 lbs.; cheese, 1,152,590 lbs.; wine, 7,047 galls.; maple sugar, 160,805 lbs.; hay, 1,053,415 tons.

The total value of live stock was $23,357,129, and of slaughtered animals, $4,939,071. The live stock included 71,514 horses, 336 mules and asses, 139,259 milch cows, 60,530 working oxen, 143,272 other cattle, 434,666 sheep and 45,760 swine.

Manufactures.—The immense amount of water-power afforded by the great fall of the rivers over long distances and the numerous cascades and rapids, gives this state great natural advantages for manufacturing. Walter Wells, the Superintendent of the Hydrographic Survey, already quoted, estimates that 1,229,200,000,000 cubic feet of water is annually delivered by the rivers into the sea; and that their fall in the passage through the state averages 600 feet. Allowing for the amount of water 4,429 horse-power for each foot of fall, he concludes that the gross horse-power afforded to the state in its streams amounts to 2,657,400, which is equivalent to the working force of over 34,000,000 men, laboring throughout the year.

In 1870 only 70,108 horse-power of water-wheels was utilized, or 1-38 part of the whole amount in the state. The 354 steam-engines had 9,465 horse-power. The number of manufacturing establishments was 5,550 against 3,810 in 1860, employing 49,180 horse-power, or nearly twice as many as in 1860.

The total value of products was $79,497,521; the capital invested, $39,796,190, and the wages paid, $14,282,205. The raw materials consumed had a value of $49,379,757. Manufacturing is mostly carried on in the southern part of the state, and the counties producing the largest amounts of goods were: Androscoggin, $14,016,816; Cumberland, $16,557,581; Kennebec, $7,006,204; Penobscot, $10,556,944, and York, $10,350,982.

The value of sawed lumber in 1870 was $11,395,747, and of planed lumber, $322,375. The cutting of the trees in the forests and the rafting of the timber to the saw mills, which convert it into boards, shingles, etc., is one of the principal industries of Me., and is mostly done in the winter, when the felled trees may be drawn over the snow to the rivers, which float it down to the mills on the breaking up of the ice. The manufacture of cotton goods has also assumed of late large dimensions and produced the value of $11 739,781. The value of woollen goods was $6,150,620; of boots and shoes, $3,749,710; of carriages and wagons, $1,051,488; of men's clothing, $2,881,863; of flour and meal, $4,415,998; of forged and rolled iron, $1,591,196; of tanned leather, $3,779,227; of curried leather, $1,082,554; of refined sugar and molasses, $3,142,132; of oil floor-cloth, $1,314,000; and of ship building, repairing and ship materials, $2,358,445.

Commerce and Railroads.—The numerous harbors and inlets along the broken coast give to Me. commercial facilities of the first order. The larger streams are navigable from 10 to 50 mls. inland. The imports and exports of the custom districts, in 1871, were as follows:

	Value of imports.	Value of domestic exports.	Value of foreign exports.
Aroostook	$ 95,878	$	$ .....
Bangor	51,094	162,935	450
Bath	182,512	24,934	51
Belfast	21,073	10,200	.....
Castine	1,996	.....	.....
Machias	6,627	135,360	.....
Passamaquoddy	772,006	694,199	4,450
Portland and Falmouth	2,130,138	2,972,401	274,855
Waldoborough	15,858	.....	.....
Wiscasset	8,714	13,504	.....
Aggregates	$3,285,796	$4,013,533	$279,806

The number of sailing vessels was 2,694, which had a tonnage of 379,454¾, and the 53 steam vessels had a tonnage of 17,568.

Me. had, in 1841, 11 mls. of railroads; in 1850, 245 mls.; in 1856, 429 mls.; in 1862, 505 mls., and in 1872, 871 mls. The following are the principal lines: Atlantic & St. Lawrence R. R., from Portland to Island Pond, Vt., (149½ mls.); Bangor & Piscataquis R. R., (48 mls.); Maine Central R. R., main line from Bangor to Danville and from Danville to Cumberland (129 mls.), and leased branches (228 mls.), making a total of 355 mls. operated by the company; European & North American R. R., from Bangor to Vanceborough (114 mls.); Knox & Lincoln R. R. (49 mls.); Portland & Ogdensburg R. R. (60 mls.); Portland & Oxford Central R. R. (27½ mls.); Portland, Saco & Portsmouth R. R. (51 mls.); Portland & Rochester R. R. (52 mls.), and St. Croix & Penobscot R. R. (22 mls.).

Wealth, Taxation and Indebtedness.—The true value of real and personal estate in 1870 was $348,155,671; the assessed valuation of same, $134,580,157. The financial condition of the state is highly satisfactory. The receipts for the year 1872 were $1,334,860, and the disbursements $1,147,544. On the first day of January, 1873, the public debt was $7,187,900; and as the sinking fund in the Treasury amounted to $1,020,247, the real indebtedness was but $6,167,653. The sinking funds are rapidly accumulating and will be amply sufficient to meet the debt as it matures.

Exclusive of the mill tax, the state tax of 1872 was reduced $50,000 or $60,000 from the previous year; and could be reduced to five mills on the dollar.

The county taxes in 1870 amounted to $315,199, and the co. debt $274,153. The taxes of the towns and cities were $3,683,141, and the debts of the same $6,108,344, which were mostly incurred for the purposes of the civil war.

Education.—The whole number of scholars between 4 and 21 years of age in 1871 was 228,167; and of these 121,125, or less than half, were registered in the public schools. The average school attendance was 94,429. The number of schoolhouses was 4,004, inclusive of 158 built during the year. It is a singular and not fully explained fact, that during the last 10 years the number of persons of school age had decreased 15,753, while for the same time there had been an increase in the whole population, of 440. The established school tax is $1 for each inhabitant of the state. In 1871 the amount of school money voted was $740,321, which exceeded the amount required by law by $136,804.

There are two normal schools for the training of teachers. The Eastern, at Castine, was opened in 1867; the Western, at Farmington, in 1864. The number of academies and private seminaries is nearly seventy. The four colleges of Maine had, in 1871, 281 students. Bowdoin College, the oldest of these institutions, was organized in 1802, and is located at Brunswick. The State College of Agriculture and the Mechanic Arts was established in 1868, and had, in 1871, 71 students.

Maine had, in 1870, 65 newspapers, with a circulation of 170,690. The number of daily papers was 7, of weekly 47, of monthly 8, and of quarterly, tri-weekly and semi-weekly, 1 each. None of the dailies had a circulation of over 5,000 copies. The semi-monthly "Our Young Folks," published in Augusta, has reached the enormous circulation of 330,000; and the "People's Literary Companion," Augusta, of 200,000. The weekly "Transcript," of Portland, has a circulation of 18,800.

Charitable and Penal Institutions.—The hospital for the insane, at Augusta, was opened in 1840; and the State Reform School, at Cape Elizabeth, has been in operation since 1853. The boys confined in the school are employed on the farm and in shops.

The State Prison is located at Thomaston, and on December, 1872, 164 convicts were confined therein. During that year it had paid the sum of $7,847 over and above its expenses.

Government.—Me. was a part of Mass. until 1820. By an act of Congress, approved on the 3d of March, 1820, it was declared that on and after the 15th of March, of the same year, the state of Me. should be admitted into the Union on equal terms with the original states.

The constitution provides that every male citizen of the United States, of the age of 21 years and upward, excepting paupers, persons under guardianship, and Indians not taxed, having his residence established in the state for the term of three months next preceding an election, shall be an elector for Governor, Senators and Representatives in the town or plantation where his residence is established.

The legislative power is vested in a House of Representatives and a Senate. The House of Representatives shall consist of not less than 100, nor more than 200, members, to be elected for one year. The Senate shall consist of not less than 20, nor more than 31, members, to be elected also for one year. The Legislature shall convene on the first Wednesday of January, annually.

The Governor shall be elected by the qualified electors, and shall hold his office one year, from the first Wednesday of January. He shall be not less than 30 years of age, a born citizen of the United States, and have been five years a resident of the state. He shall nominate and, with the advice and consent of the Council, appoint all judicial officers, the attorney general, the sheriffs, coroners, registers of probate, notaries public, and all other civil and military officers whose appointment is not otherwise provided for.

The Council shall consist of seven persons, citizens of the United States, and residents of the state, to advise the Governor in the Executive part of the government. The Councilors shall be chosen annually by joint ballot of the Senators and Representatives in convention. The Secretary of State and the Treasurer shall be chosen annually, at the first session of the Legislature, by the Senators and Representatives in convention.

The judicial power is vested in a Supreme Judical Court, and such other courts as the Legislature shall, from time to time, establish. All judicial officers hold their offices for the term of seven years. Judges and registers of probate shall be elected by the people of their respective cos., and hold their offices for four years. Judges of municipal and police courts shall be elected by the people of their respective cities or towns, and hold their offices for four years.

Me. is divided into the following 16 cos.: Androscoggin, Aroostook, Cumberland, Franklin, Hancock, Kennebec, Knox, Lincoln, Oxford, Penobscot, Piscataquis, Sagadahoc, Somerset, Waldo, Washington, York.

The state capital is Augusta. The other incorporated cities are Auburn, Lewistown, Portland, Hallowell, Rockland, Bath, Bangor, Belfast, Calais, Biddeford and Gardiner.

Mariposa, co. in Cal., E. part. Pop., 4,572; in 1860, 6,243. It is bounded on the E. by the principal crest of the Sierra Nevada, and thence slopes gradually down to the low plain of the San Joaquin R. on the W. Mt. Hoffmann and Cathedral Pk. rise on the range, or spur, of the high Sierra, which separates it from Tuolumne co. The principal stream is the Merced R., which traverses the co. from E. to W. Bear Cr., Mariposa Cr. and Chowchilla R. drain the southern part. The upper course of the Merced R. flows through the Yo Semite Valley, justly celebrated for the gradeur of its scenery. (See Yo Semite Valley.) Near Crane's Flat, 30 mls. S. E. of Mariposa, is a grove of mammoth trees (Sequoia gigantea), about 427 in number and from 275 to 325 ft. in height. There is but a limited amount of arable land in Mariposa, and gold mining is still the chief occupation. But as the mines yielded formerly a much larger amount of the precious metals, the majority of the towns have considerably declined in size and population, and the mining camps, once busy and populous, are now nearly deserted. Mariposa is the co. seat. Agr. productions in 1870: Wheat, 4,275 bush.; rye, 90 bush.; Indian-corn, 455 bush.; oats, 350 bush.; Irish pot's, 1,712 bush.; sweet pot's, 100 bush.; wool, 87,816 lbs.; butter, 8,290 lbs.; hay, 2,499 tons. Cash value of farms, $346,500. Total, estimated, value of all farm productions, including additions to stock, etc., $695,330. Value of manufactures, $294,226.
***Mariposa,** p. v. and the co. seat of Mariposa co., Cal., on Mariposa R., 90 mls. S. E. of Stockton and 135 mls. S. E. of San Francisco, on the route to the Yo Semite Valley and in the midst of a rich mining region. Pop. about 1,000. One newspaper.

Mary Esther, p. o. in Santa Rosa co., Fla.

MARYLAND, one of the thirteen original states of the Union; is bounded on the N. by Pa., on the E. by Del. and the Atlantic Ocean, and on the S. and W. by Va. and W. Va. It extends from 37° 43′ to 39° 44′ N. lat., and from 75° 10′ to 79° 30′ W. long. The area is 11,124 sq. mls., or 7,119,360 acres, exclusive of the part of Chesapeake B. which belongs to the state. Chesapeake B. and the Susquehanna R. intersect Md. from N. to S. and divide it into two unequal portions. The Potomac R. sweeps along the southern boundary of the western part, and as its course is irregular and curving, the width of the state from N. to S. varies between 3 mls. and 120 mls.

Surface.—That portion of the state which lies S. E. of a line drawn from the Susquehanna R., where it intersects the northern boundary, to the Potomac R., 10 mls. above Washington, is, on the whole, undulating or level, and but little elevated above the sea. This is the "tidal country," and embraces the region on both sides of Chesapeake B., measuring somewhat over one-half of the area of the state. It belongs to the great tertiary plains of the Atlantic. Its soil is sandy and contains large deposits of marl and clay. Deep tidal creeks penetrate far into the country, and they, as well as the larger streams which empty into the Chesapeake B., have generally wide estuaries.

Beyond the line above indicated, and extending as far as the South Mt., which may be considered as a prolongation of the Blue Ridge of Va., the country is hilly and broken, and includes picturesque and fertile valleys. Parr's Mt. and other low ranges traverse it from N. E. to S. W.

From the South Mt., which abuts on the Potomac R. at Harper's Ferry, to the western boundary, Md. is traversed by the mountain ranges which enter it from Pa., and have a N. N. E. and S. S. W. trend. Washington co., lying between South Mt. and Tuscarora Mt., is a part of the Cumberland Valley, rich in agricultural resources and charming scenery. Beyond the Tuscarora the mountains are higher and the valleys narrower. The western section of the state is intersected by several ranges of the Alleghany Mts., attaining an altitude of more than 2,500 feet.

Rivers.—With the exception of the eastern extremity, which includes a few small creeks emptying into the Atlantic, and the western extremity, where the Youghiogheny flows through a valley of the Alleghany Mts., Md. belongs to the drainage system of Chesapeake B. This bay extends into the state for 120 mls., varies in breadth from 7 to 25 mls., and is navigable throughout for the largest vessels. The rivers which enter into it from the E. are the Pokomoke, Wicomico, Nanticoke, Choptank, Chester and Elk. The Susquehanna R. intersects the northern part of the state for a distance of about 12 mls. The Gunpowder, Patapsco, Severn and Patuxent Rs. enter into Chesapeake B. from the W.

The Potomac R. forms the southern boundary of the state, from the source of its North Branch to the mouth, and receives numerous affluents, as Savage R., Wells Cr., Evitts Cr., Town Cr., Sideling Cr., Licking R., Conecocheague R., Antietam Cr., Monocacy R., Seneca Cr., Piscataway Cr., Mattawaman Cr. and Nicomico R.

Climate and Vegetation.—The climate of Md., tempered by the vicinity of the ocean and Chesapeake B., is on the whole mild and salubrious. The mean annual temperature of the middle portion of the state is 56°, of the northern 54°, and of the highest portions in the W. about 50°. The rain-fall is abundant throughout the state and is largest on the western coasts of Chesapeake B., where it averages about 50 inches.

The state was originally covered with deciduous forests, consisting of several varieties of oak, chestnut, cedar, poplar, maple, hickory, ash, beech, persimmon, sycamore, walnut, sassafras, magnolia, elm, etc. Cypress trees abound in the central portions and pines in the eastern.

Population.—Md. had, in 1790, a population of 319,728; in 1800, 341,548; in 1810, 380,546; in 1820, 407,350; in 1830, 447,040; in 1840, 470,019; in 1850, 583,034; in 1860, 687,049, and in 1870, 780,894.

This number comprised 605,497 whites, 175,391 colored persons, 2 Chinese, and 4 Indians. Regarding nativity, the population was distributed as follows: Natives of the United States, 697,482; of the state, 629,882; of Mass., 1,212; of N. J., 1,853; of N. Y., 3,890; of Ohio, 1,165; of Pa., 22,846; of Va. and W. Va., 20,237, and of the D. C., 3 211. The foreign-born population numbered 83,412, of whom 644 were born in British America, 47,045 in Germany, 4,855 in England, 23,630 in Ireland; 2,432 in Scotland; 994 in Wales, and 297 in Switzerland.

The population of 10 years of age and more numbered 575,439, of whom 258,543 were engaged in the useful occupations, viz.: 80,449 in agriculture, 79,226 in professional and personal services, 35,542 in trade and transportation, and 63,326 in manufactures and mechanical and mining industries.

Mining.—The chief mineral wealth of Md. consists in bituminous coal and iron. The

western portion of the state (Alleghany co.) extends into the great Appalachian coal field, and produced, according to the last census, 1,818,424 tons. Smaller quantities of coal are mined in Anne Arundel co.

Iron ore is obtained in Anne Arundel, Alleghany, Baltimore, Frederick, Carroll and Prince George's cos. The entire product in 1870 was 98,354 tons, of $600,246 in value. Copper is mined in Carroll and Frederick cos. Nickel, cobalt and galena are also found in various parts of the state, but not in large quantities. The other minerals are kaoline, or porcelain clay, alum, barytes, marl and traces of gold. Marble and building stones are abundant.

Agriculture.—The soil of Md. is on the whole very productive. The region adjacent to Chesapeake B. consists of sand and loam, and with careful tillage and sufficient manuring yields good crops. The valleys of the higher sections of the state are generally very fertile.

In 1870 the improved land amounted to 2,914,007 acres, the unimproved land 162,584 acres, and the woodland, 1,434,988 acres, making a total comprised in the farms of 4,511,579 acres. The value of farms was $170,369,684, and of farm productions, including additions to stock, etc., $35,343,927.

The principal farm productions were: Wheat, 5,774,503 bush.; rye, 307,089 bush.; Indian-corn, 11,701,817 bush.; oats, 3,221,643 bush.; tobacco, 15,785,339 lbs.; wool, 435,213 lbs.; Irish pot's, 1,632,205 bush.; sweet pot's, 218,705 bush.; butter, 5,014,729 lbs.; flax, 30,760 lbs., and hay, 223,119 tons.

The live stock had a value of $18,433,698, and consisted of 89,696 horses, 9,830 mules and asses, 94,794 milch cows, 22,491 working oxen, 98,074 other cattle, 129,697 sheep, and 257,893 swine.

Manufactures.—In 1850 the value of manufactures was $33,043,892; in 1860, $41,735,157, and in 1870, $76,593,613, thus showing a very great increase in the development of manufactures in Md. during the last decade. The 5,812 establishments employed 531 steam-engines, with 13,961 horse-power; 937 water-wheels, with 18,461 horse-power and 44,860 hands. The capital invested was $36,438,729; the wages paid, $12,682,817, and the value of the raw materials consumed, $46,897,032.

The principal products of industry and their values were: Cotton goods, $4,852,808; flour and meal, $6,786,459; canned fruits and vegetables, $1,587,230; furniture, $1,388,698; forged and rolled iron, $3,573,212; pig iron, $2,143,089; iron castings, $835,024; tanned leather, $1,265,388; curried leather, $623,308; distilled liquors, $889,261; malt liquors, $955,743; sawed lumber, $1,501,471; refined sugar, $7,007,858; canned oysters and fish, $1,418,200; printing and publishing, $1,179,928; tin, copper and sheet-iron ware, $1,634,009; chewing, smoking and snuffing tobacco, $653,760, and cigars, $1,108,988.

Commerce and Railroads.—Md. possesses great facilities for domestic and foreign commerce. Its coast-line on both sides of the Chesapeake B. is indented by numerous bays and harbors, so that the larger part of the state is within easy distance from the sea. The Potomac, navigable to Washington, affords access to the southern extremity, and the Chesapeake & Ohio Canal follows the course of the Potomac from Washington to Cumberland.

In 1871 Md. had 1,416 sailing vessels, 100 steam vessels and 516 canal boats, with a total tonnage of 146,201. The registered vessels numbered 98; the enrolled vessels, 1,474, and the licensed vessels, 460. The total declared value of import entries from foreign countries was $24,690,234, and of domestic exports, $15,037,855. Md. has three custom districts, viz.: Baltimore, Annapolis and the Eastern district.

Md., together with the D.C., had, in 1841, 259 mls. of railroads; in 1851, 274 mls.; in 1861, 386; in 1871, 820, and in 1872, 1,012. The principal line is the Baltimore & Ohio R. R., which has a total length of 617 mls., including a branch to Washington and another to Hagerstown; the Baltimore & Potomac R. R., from Baltimore to Pope's Creek, with a branch to Washington (92 mls.); the Western Maryland R. R., from Relay to Hagerstown (66 mls.); the Cumberland & Pennsylvania R. R. (50¾ mls.); the Dorchester & Delaware R. R. (33 mls.); Eastern Shore R. R. (40 mls.); the Kent County R. R. (36 mls.); the Maryland & Delaware R. R. (54 mls.); the Queen Anne's & Kent R. R. (36 mls.), and the Wicomico & Pocomoke R. R. (23 mls.).

Education.—The report of the Commissioner of Education for 1871 enumerates 11 colleges and collegiate institutions, which are authorized by law to confer degrees. They then had 91 professors and 1,071 students.

The school population was 276,120, of whom 101,367 were pupils of the public schools. The number of schools was 1,475, and of teachers, 2,204. The total expenditure was $1,204,761, of which $808,860 were for teachers' wages.

In 1870 the state had 88 newspapers against 57 in 1860. The number of dailies was 8; of semi-weeklies, 2; of weeklies, 69, and of monthlies, 8.

The Maryland Hospital for the insane and the State Penitentiary are located at Baltimore.

Wealth, Taxation and Indebtedness.—The assessed value of real estate was $286,910,332, and of personal estate, $136,924,586. The true value of both kinds of property was estimated at $643,748,976.

The state taxation, not national, was $1,781,252; county taxation, $1,542,218; and town and city taxation, $3,309,372, making a total taxation of $6,632,842.

The public debt of the state was $13,317,475; of the counties, $1,565,779, and of the cities, towns, etc., $14,149,323.

Government.—Every male citizen of the United States, of the age of 21 years and upward, who has resided in the state one year and in the legislative district or county in which he offers to vote, for six months, is entitled to vote.

The executive power is vested in the Governor, who is chosen by the electors for four years. The Secretary of State, Commissioner of the Land Office, Adjutant-General and State Librarian, are appointed by the Governor by and with the consent of the Senate. The treasury department is administered by a Comptroller chosen by the voters, and a Treasurer appointed by the Legislature. Both hold office for two years.

The Attorney-General and the Superintendent of Labor and Agriculture are chosen in the same manner as the Governor, and hold office for the same term of four years.

The Legislature consists of a Senate of 24 members and a House of Delegates of 80 members. Senators are elected for four years; delegates for two.

The judicial power is vested in a Court of Appeals, Circuit Courts of the counties, the several courts of Baltimore city, Orphans' Courts, and Justices of the Peace. The Court of Appeals is composed of the Chief Judges of first seven of the several judicial circuits of the state, and a judge from the city of Baltimore.

The Chief Judge is designated by the Governor by and with the advice of the Senate.

Md. is divided into the following 23 counties: Alleghany, Anne Arundel, Baltimore, Calvert, Caroline, Carroll, Cecil, Charles, Dorchester, Frederick, Garret, Harford, Howard, Kent, Montgomery, Prince George's, Queen Anne, St. Mary's, Somerset, Talbot, Washington, Wicomico and Worcester

Annapolis, 5,744 inhabitants, is the capital of the State. The other cities are Cumberland, 8,056 inhabitants; Baltimore, 267,354 inhabitants; and Frederick, 8,526 inhabitants.

Massabesic Lake, in Rockingham co., New Hampshire, 4 mls. E. of Manchester; is 4 mls. long, has a very irregular shore-line of 31 mls., and is studded with numerous islets. It is much visited by tourists.

Massac, co. in Ill., S. part. Area, 150 sq. mls. Pop., 9,581; in 1860, 6,213. The surface is uneven and the soil fertile. Some stone-coal and lead are found. The Ohio R. forms its southern boundary, separating it from Ky. Metropolis City is the co. seat. Agr. productions in 1870: Wheat, 72,316 bush.; rye, 544 bush.; Indian-corn, 133,126 bush.; oats, 22,097 bush.; Irish pot's, 13,125 bush.; sweet pot's, 1,715 bush.; butter, 42,505 lbs.; hay, 2,034 tons. Cash value of farms, $726,230. Total, estimated, value of all farm productions, including additions to stock, etc., $345,947. Value of manufactures, $437,582.

MASSACHUSETTS, one of the New England states, and one of the 13 original states of the Union; lies between 41° 15′ and 42° 55′ N. lat., and between 69° 56′ and 73° 31′ W. long. Its length from E. to W. is about 160 mls. Its width in the eastern part is 115 mls.; in the western, 47 mls. It has an area of 7,800 sq. mls. The seashore is very irregular. The south-eastern part of the state forms a narrow peninsula, which projects in an easterly direction and terminates with Cape Cod. It is joined to the main land by an isthmus which separates Cape Cod B. from Buzzard's B. Massachusetts B. forms a large indentation S. of Cape Ann. Martha's Vineyard and Nantucket are two islands which lie south-east of the main-land of the state. The Elizabeth Islands bound Buzzard's B. on the south and are separated from Martha's Vineyard by Vineyard Sound.

Surface.—The surface of Massachusetts is greatly diversified. Two chains of the Green Mts. traverse the western part of the state from N. to S. The western chain, called the Taghkanic, or Taconic, Mts. trend along or near the boundary. The highest peaks are Saddle Mt. 3,505 feet high, and Mt. Washington, 2,624 feet high. The eastern chain, called the Hoosic Mts., is broader than the western, although less elevated, and is noted for its magnificent scenery. Sugarloaf Mt. and Mt. Tom, 1,214 feet, rising on the banks of the Connecticut R., are isolated peaks. Further to the E., and separated from the Hoosic Mt. by the rich valley of the Connecticut R., extends a wide belt of hills and mountains, the highest of which are Mt. Wachusett, (2,018 feet high), and Mt. Holyoke. From this belt, which has a height of about 1,100 feet, the country slopes gradually toward the sea-coast. The south-eastern part of the state is low and sandy.

Rivers and Lakes—The Connecticut is the largest R. in Massachusetts. It traverses the western part of the state from N. to S., and has so great a fall as to render it unnavigable. The largest tributaries from the W. are the Deerfield R., which rises in Vermont, and the Westfield R., which rises in the Hoosic Mt. The Chicopee and Miller's Rs. enter the Connecticut from the E. The Housatonic R. flows through the valley lying between the Taconic and Hoosic Mts. Merrimac R. belongs in its lower course to this state and flows parallel to the N. E. boundary. It receives the Nashua and Concord Rs. from the S. W.. The Blackstone R. flows through the central part of the state from N. to S., and passes through Rhode Island. The Taunton R. in the S. E. part enters Mt. Hope B. in Rhode Island. Charles R. and Mystic R. empty into Boston B., which forms the western extension of Massachusetts B. None of the Rs. of this state are navigable, but they afford a large amount of valuable water-power. Massachusetts abounds in small lakes and ponds, especially the south-eastern and western parts of the state.

Climate.—Massachusetts has a cool climate. The winters are long and severe, the summers short and warm. Snow falls usually during seven months, from October to April. The mean annual temperature in the N. W. part of the state is 45°, in the S. E. part 50°. July is the hottest month in Boston, with a mean temperature of 73°; January the coldest, with a mean temperature of 28°. The mercury occasionally falls to 10° below zero, in winter, and rises in summer to 100°, thus showing a range between extremes in Boston of 110°.

The amount of yearly precipitation (rain and snow) varies from 40 inches in depth in eastern Massachusetts to 43½ inches in western, and is nearly equally distributed through the seasons.

In the eastern part of the state north-westerly winds prevail during 150 days, and southwest-

erly during 70 days. Cold and piercing easterly winds are of frequent occurrence in the spring.

The Population of Mass. has increased steadily, though not as rapidly as some of the western states. In 1790 it was 378,787; in 1800, 422,845; in 1810, 472,040; in 1820, 523,159; in 1830, 610,408; in 1840, 737,699; in 1850, 994,514; in 1860, 1,231,066, and in 1870, 1,457,351. This last number comprises 1,443,156 whites, 13,947 colored persons, 97 Chinese and Japanese, and 151 Indians. As regards nativity, the population of 1870 is distributed as follows: natives of the United States, 1,104,032 (including 806,372 natives of Mass.); natives of foreign countries, 353,319, including 70,045 British Americans, 1,627 Frenchmen, 13,072 Germans, 34,099 Englishmen, 216,120 Irishmen, 9,003 Scotchmen, 302 Norwegians, 1,384 Swedes, and 491 Swiss.

The population of 10 years and over, in 1870, numbered 1,160,666, and of these nearly one-half, or 579,844, are engaged in some of the useful occupations, viz.: 72,810 in agriculture, 131,291 in professional and personal services, 83,078 in trade and transportation, and 292,665 in manufactures and mechanical industries.

Agriculture.—The most fertile sections of Mass. are the valleys of the Connecticut and other rivers; but the greater part of the state is moderately productive. Hence large quantities of grain, flour, pork, beef, etc., are imported from the more favored regions of the west.

Mass. had, in 1870, 26,500 farms, of which 8,381 had from 20 to 50 acres; 8,727 from 50 to 100 acres, and 5,643 from 100 to 500 acres. Only 3 farms had over 1,000 acres, and 40 over 500 acres.

The number of acres of land in farms was 2,730,283 acres, of which 1,736,221 were improved, 706,714 were woodland, and 287,348 were unimproved. The cash value of farms was $116,432,784; of implements, $5,030,879, and of all farm productions, including betterments, etc., $32,192,378.

The principal agricultural products were: 17,547 bush. of spring wheat; 17,074 bush. of winter wheat; 239,227 bush. of rye; 1,397,807 bush. of Indian-corn; 797,664 bush. of oats; 133,071 bush. of barley; 58,049 bush. of buckwheat; 7,312,885 lbs. of tobacco; 306,659 lbs. of wool; 3,025,446 bush. of potatoes; 6,559,161 lbs. of butter; 2,245,873 lbs. of cheese, and 597,455 tons of hay.

Tobacco is raised almost exclusively in Franklin, Hampden and Hampshire cos., in the Connecticut River Valley; Berkshire co. excels in the production of wool, and Berkshire, Worcester and Norfolk cos. in the amount of dairy products.

The live stock had a value of $17,049,228, and comprised 41,039 horses; 114,771 milch cows; 24,430 working oxen; 79,851 other cattle; 78,560 sheep, and 49,178 swine.

Manufactures.—In proportion to area and number of inhabitants, Mass. is the first manufacturing state of the Union. The number of establishments in 1870 was 13,212, employing 78,502 horse-power in 2,396 steam-engines, 105,845 horse-power in 3,157 water-wheels, and 279,380 hands. The capital invested was $231,677,862 (being less than Pa. and N. Y. only); the wages paid amounted to $118,051,886, and the raw materials consumed, to $334,413,982. The value of manufactured products was $553,912,568 (second only to those of N. Y and Pa.).

New London, New Bedford, Nantucket, Martha's Vineyard and other sea-ports are extensively engaged in the fisheries, partly for whales in the South Pacific Ocean, partly for mackerel, cod-fish, etc., in the waters adjacent to our northern coasts. In 1865 the number of vessels employed in the whale fishery was 244, with a tonage of 70,420. They obtained 1,735,488 gallons of sperm oil; 1,682,579 of whale oil; 768,553 lbs. of spermaceti and 469,646 lbs. of whalebone, amounting in all to $6,618,670 in value.

The following table exhibits the principal products of industry:

	No. of estab'mts.	No. of hands emp.	Capital invested.	Cost of raw mat.	Value of products.
Agricultural Implements	37	477	$ 499,400	$ 487,460	$ 1,033,590
Bleaching and dying	33	1,387	1,063,650	20,623,653	22,252,429
Boots and shoes	2,302	54,831	19,550,538	51,363,496	88,399,583
Carpets	8	2,205	3,250,400	3,257,728	4,490,725
Carriages and wagons	326	2,914	1,720,091	1,326,968	4,038,556
Men's clothing	446	9,878	5,090,764	11,918,317	20,212,407
Cotton goods	194	43,586	44,834,375	37,485,686	59,579,153
Flour and meal	316	855	8,171,314	9,720,374	9,720,374
Furniture	243	4,044	3,372,225	3,146,828	7,397,696
Hats and caps	50	3,290	855,600	1,846,566	3,416,191
Hosiery	32	2,415	1,570,800	1,515,326	3,213,481
India-rubber goods	16	1,405	1,920,600	1,554,006	3,183,218
Forged and rolled iron	29	2,530	2,760,125	4,538,866	6,699,907
Nails and spikes	49	2,458	2,600,850	4,082,775	5,986,144
Iron castings	101	2,749	2,496,900	2,574,320	5,265,154
Leather, tanned and curried	334	5,618	6,293,926	22,995,498	29,105,827
Lumber	705	3,414	3,717,879	5,806,989	9,655,690

Worsted goods	35	5,275	2,839,500	5,663,048	8,290,541

The steady and rapid progress of the state in the development of manufactures is shown by comparing the annual values of products for different years. In 1838 this was about $86,000,000; in 1845, $124,000,000; in 1855, $295,000,000, and in 1865, $517,000,000. The last decade exhibits an increase of 72 per cent., while the population during the same period increased but 3 per cent.

Commerce and Railroads.—Mass. has, next to N. Y., the most extensive foreign commerce of any state in the Union. In 1871 the foreign goods imported had a value of $54,329,107, and the domestic goods exported, $13,234,993. It has ten ports of entry, or custom districts, of which Boston is by far the most important. The number of vessels entering into the ports of the state was 4,019, and of vessels cleared from the ports, 3,735. On the 30th of June, 1871, Mass. had 702 registered vessels with 353,042 tons; 1,822 enrolled vessels with 158,452 tons, and 323 licensed vessels with 2,847 tons. The number of sailing vessels was 2,768 with 486,836 tons, and of steam vessels, 79 with 27,345 tons.

Mass. has the most complete railroad network of any of the states, which is being rapidly enlarged. In 1841 the total railroad mileage was 373 mls.; in 1851, 1,038 mls.; in 1861, 1,264 mls.; in 1872, 1,612 mls. The principal lines are: The Boston & Albany R. R. (249½ mls.); the Boston,

Clinton & Fitchburgh R. R. (43 mls.); the Boston, Hartford & Erie R. R. (112½ mls.); the Boston & Lowell R. R. (40¼ mls.); the Boston & Maine R. R., (82½ mls.); the Boston & Providence R. R. (58½ mls.); the Cape Cod R. R. (76½ mls.); the Connecticut River R. R. (54 mls.); the Eastern R. R., connecting Boston with Portland (108 mls.), 98 mls. of which are within Mass.; the Fitchburgh R. R., connecting Boston with Fitchburgh, (50 mls.); the Nashua & Lowell R. R. (14½ mls.); the New Bedford & Taunton R. R. (36 mls.); the Old Colony & Newport R. R. (146 mls.); the Providence & Worcester R. R. (44¼ mls.); the Worcester & Nashua R. R. (45½ mls.); and the Vermont & Mass. R. R., connecting Boston with the Hoosac Tunnel in Berkshire co. (86 mls.). The construction of this tunnel was commenced in 1855. Next to the Mt. Cenis Tunnel, under the Alps, it will be the longest in the world. By means of it Boston will be brought into shorter and more direct communication with Chicago than New York city. The entire work will be completed in 1874.

Education.—Mass. has established educational institutions of all grades and for all classes, and maintains them with great liberality. The Board of Education consists of the Governor, Lieutenant-Governor, and 8 members appointed by the Governor and Council. It has the general oversight of the public schools and educational statistics, and receives the reports which the persons in charge of every institution of learning in the state are required by law to make.

The Number of Public Schools in 1872 was 5,193 (an increase for the year of 117); and of persons in the state between 5 and 15 years, 282,485; of whom 276,602 were scholars in the public schools. The number of teachers was 8,443, including 1,024 males and 7,419 females. The average wages for male teachers per month was $35.09; and of female teachers $32.39. The total amount of taxes paid to maintain the public schools was $5,476,927, or $3.76 for every inhabitant of the state, and $19.39 for each person between the ages of 5 and 15 years.

The aggregate amount of money from all sources expended for popular education in private schools, academies and public schools, was $6,350,000.

The 4 normal schools in the state are located at Bridgewater, Framingham, Salem and Westfield; and besides, there are several Training Schools, designed to assist in the preparation of teachers for their calling.

The number of incorporated academies is 50, and of private schools about 500. The six colleges had, in 1870, 137 teachers and 1,290 pupils. Harvard University, at Cambridge, the oldest college in the country, has 76 professors and nearly 1,200 students.

The number of newspapers and periodicals of all classes published in Mass. in 1870 was 259, which had a circulation of 1,692,124. Of these, 21 were dailies, 16 semi-weeklies, 153 weeklies, 11 semi-monthlies, 48 monthlies, 9 quarterlies and 1 annual. One-half of the papers of the state (129) were devoted to politics, 54 to literature, 31 to religion, and 13 to technical and professional subjects.

The Charitable and Penal Institutions of Mass. are numerous and well managed. The State Alms House is located at Tewksbury, and since the abolition of the alms houses at Monson and Bridgewater, maintains about 800 paupers, of whom nearly two-fifths are insane or imbecile persons. At Worcester, Taunton and Northampton are State Lunatic Hospitals, and at Westborough is a state Reform School, where youthful delinquents are kept and instructed in trades, so that, when released, they may earn an honest livelihood. At Lancaster is the State Industrial School for Girls. The school for idiotic and feeble-minded youth at Boston, under the superintendence of Dr. S. G. Howe, is open for the beneficiaries of the state, and all others who will pay the cost.

The state has 38 institutions for the confinement of criminals, viz.: 1 state prison, 20 jails, 16 houses of correction and 1 house of industry.

In the State Prison at Charleston there were confined, on September 30, 1872, 562 convicts. Of these 160 were received during the year preceding said date, including 108 natives of the United States and 52 foreigners.

Wealth, Taxation and Finance.—According to the last census report the true valuation of real and personal estate in 1870 was $2,132,148,741, and in 1860, $815,237,433. Thus the increase in one decade was $1,316,911,307, or nearly 162 per cent., indicating a most remarkable material prosperity.

The total value of personal estate, as assessed on May 1, 1872, was $565,294,622, and of real estate, $1,131,305,347. The whole amount of tax raised throughout the commonwealth for the year preceding said date, for state, county and town purposes, was $22,911,883. Nahant had the lowest rate per cent., assessing only $3.50 on the $1,000, while in Monroe, Franklin co., it was more than ten times as large, being $37.30 on the $1,000. The average rate for the state was $13.15 for $1,000. The aggregate of receipts and payments for the year 1872 were as follows:

The receipts for the year 1872 were $20,544,791, of which $6,227,084 were on account of revenue, and $14,317,707 on account of funds. The expenditures amounted to $18,401,672, leaving in the treasury a balance of $2,143,119.

The debt on January 1st, 1871, was $30,867,904, and on January 1st, 1872, $27,692,704, showing a total reduction of $3,175,200.

Government.—The state includes the original colonies of Plymouth (settled in 1620), and Massachusetts Bay (settled at Salem in 1628). In 1688 the colonies were united under one government. Mass. adopted a constitution in 1780, and ratified the Constitution of the United States in 1788.

The Governor, Lieutenant-Governor, Secretary of State, Treasurer, Auditor and Attorney-General are chosen annually in November, and hold office one year from the first Wednesday in January. A council, consisting of nine persons besides the Lieutenant-Governor, has the function to advise the Governor in the performance of his executive duties.

The Senate consists of 40 members, no less than 16 of whom form a quorum. and the House of Representatives consists of 240 members, no less than 100 of whom form a quorum.

Every male citizen 21 years of age, able to read the Constitution and to write his name, who has resided in the state one year, and in his election district six months, and has paid a tax within two years, is entitled to vote.

The Supreme Judicial Court consists of one Chief Justice and five Associate Justices. It has exclusive cognizance of all capital crimes, and exclusive chancery jurisdiction, and concurrent original jurisdiction of all civil cases, where the amount in dispute exceeds $4,000 in Suffolk co., and $1,000 in the other cos.

The Superior Court consists of a Chief Justice and nine Associate Justices. It has civil jurisdiction in all cases where the amount in controversy exceeds $20, and criminal jurisdiction in all except capital crimes. The judges of both courts are appointed by the Governor, by and with the advice of the Senate, and hold their offices during good behavior.

Boston, 250,526 inhabitants, is the capital of the State. Mass. is divided into the following 14 counties: Barnstable, Berkshire, Bristol, Dukes, Essex, Franklin, Hampden, Hampshire, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk and Worcester.

The principal cities, with their population, are Fall River, 26,766; New Bedford, 21,320; Taunton, 18,629; Haverhill, 13,092; Lawrence,

28,921; Lynn, 28,233; Newburyport, 12,595; Salem, 24,117; Springfield, 26,703; Charlestown, 28,323; Lowell, 40,928, and Worcester, 41,105.

***Memphis,** city, port of entry and the co. seat of Shelby co., Tenn.; lies on the Mississippi R., 460 mls. below St. Louis, and is the W. terminus of the Memphis & Charleston R. R.; the S. W. terminus of the Memphis & Louisville R. R. (377 mls. S. W. of Louisville); the N. terminus of the Mississippi & Tennessee R. R. and the E. terminus of the Memphis & Little Rock R. R. It is pleasantly situated on the Chickasaw Bluff, about 60 feet above high-water mark, and has fine private residences and large warehouses. The public schools are good and the higher institutions of learning, as the State Female College, the Memphis Female College and the St. Agnes Female Academy, are in a flourishing condition. It is the most important commercial city between New Orleans and St. Louis, and enjoys daily steamboat connections with all the principal places on the Mississippi and Ohio Rs. In 1871 it had 42 steam vessels, with 9,298 tons of burden. The number of inhabitants was, in 1850, 8,841; in 1860, 21,621, and in 1870, 40,226; including 18,004 white and 15,442 colored natives of the United States, and 6,780 natives of foreign countries. There were, in 1873, 22 newspapers published in the city.
Memphis Junction, p. o. in Warren co., Ky.
Memphramagog, Lake, partly in Orleans co., Vt., and partly in Canada; is about 20 mls. long and from 2 to 4 mls. wide, has cold and clear water, abounding in trout and muscallonge. Becoming quite a resort for summer tourists.

Mendocino, co. in Cal., N. W. part. Area, 3,125 sq. mls. Pop., 7,545; in 1860, 3,967. It borders in the W. on the Pacific Ocean. The principal surface features are two chains of the Coast Ranges, which trend through the co. from N. to S. and inclose a beautiful valley, traversed by the upper courses of the Eel R. and the Russian R. The numerous tributaries of these streams rise in the mountains and flow through the lateral valleys, thus greatly diversifying the surface. In the range bordering the coast there are upward of 20 streams, many of them of considerable volume, though but a few miles in length. The largest of these is the Navarro R., flowing through Anderson Valley and emptying into the Pacific. From Shelter Cove on the N. to Haven's Anchorage

on the S., the outer Coast Range is covered with unbroken and nearly impenetrable forests of redwood and pine, which yield large quantities of valuable timber, supporting numerous saw mills of great capacity. In the eastern range there are many bald pks., from 5,000 to more than 6,000 feet in elevation. The valleys comprise good farming lands. Fruit is also extensively raised. Ukiah City is the co. seat. Agr. productions in 1870: Wheat, 95,639 bush.; rye, 1,338 bush.; Indian-corn, 6,878 bush.; oats, 129,971 bush.; Irish pot's, 83,473 bush.; wool, 178,493 lbs.; butter, 62,692 lbs.; hay, 10,116 tons. Cash value of farms, $1,364,643. Total, estimated, value of all farm productions, including additions to stock, etc., $616,373. Value of manufactures, $1,006,464.

***Mendocino,** p. v. in Mendocino co., Cal., on the Pacific coast, 130 mls. N. of San Francisco, at the mouth of Big R. It commands considerable inland and coast trade, its wharves being able to accommodate the largest vessels. Pop. about 1,600. One newspaper.

Merced, co. in Cal., central part. Area, 1,680 sq. mls. Pop., 2,807; in 1860, 1,141. It extends from the coast range, on the S. W., to the foothills of the Sierra Nevada on the N. E., and is traversed by the San Joaquin R. from S. E. to N. W. This stream receives the following tributaries within the limits of the co.: Merced R., Black Cr., Owens Cr., Mariposa R., Deadmen's Cr., Chowchilla R., which forms part of the S. boundary, St. Louis Cr., Arroyo de los Baños and Sausalitos Cr. The surface is mostly low and level and the soil very fertile. Along the San Joaquin extends a belt of table-lands. Agriculture is the principal pursuit. The grape vine is extensively cultivated. Snelling is the co. seat. Agr. productions in 1870: Wheat, 218,162 bush.; Indian-corn, 14,456 bush.; oats, 750 bush.; Irish pot's, 13,830 bush.; sweet pot's, 11,330 bush.; wool, 231,072 lbs.; butter, 232,530 lbs.; hay, 8,195 tons. Cash value of farms, $2,324,112. Total, estimated, value of all farm productions, includ-

ing additions to stock, etc., $754,769. Value of manufactures, $66,437.

Merced, p. v. in the above co., on the Visalia Division of the Central Pacific R. R., 57 mls. from Stockton. It is a new and growing place with two newspapers.

Merced Falls, p. v. in Merced co., Cal., on the Merced R. and 40 mls. W. of Turlock.

Merced River, a tributary of the San Joaquin R. in Cal.; is formed by the North and South Forks, which rise in the Sierra Nevada of Mariposa co., and flows through Merced co. in a westerly direction. The North Fork of the Merced R. traverses the famous Yosemite Valley. (See Yosemite Valley.)

Mercer, co. in Ill., N. W. part. Area, 510 sq. mls. Pop., 18,769; in 1860, 15,042. It borders in the W. on the Mississippi R., which separates it from Iowa. Edward R. and Pope Cr. intersect it from W. to E. The surface is rolling and the soil excellent. The Rockford, Rock Island & St. Louis R. R. and the Chicago, Burlington & Quincy R. R. pass through the co. Aledo is the co. seat. Agr. productions in 1870: Wheat, 302,494 bush.; rye, 40,778 bush.; Indian-corn, 2,054,962 bush.; oats, 452,889 bush.; Irish pot's, 94,241 bush.; sweet pot's, 420 bush.; butter, 376,727 lbs.; hay, 28,180 tons. Cash value of farms, $10,788,303. Total, estimated, value of all farm productions, including additions to stock, etc., $2,848,387. Value of manufactures, $250,527.

Mercer, tn. in Mercer co., Ill. Pop., 1,949.

Mercer, tn. in Adams co., Iowa. Pop., 138.

Mercer, co. in Ky., central part. Area, 308 sq. mls. Pop., 13,144; in 1860, 13,701. The surface is undulating and the soil rich. The Kentucky R. and Dicks R. form the eastern boundary. The East Fork of Salt R. intersects the co. from S. to N. Harrodsburgh is the co. seat. Agr. productions in 1870: Wheat, 146,534 bush.; rye, 23,949 bush.; Indian-corn, 495,775 bush.; oats, 66,001 bush.; Irish pot's, 14,551 bush.; sweet pot's, 2,145 bush.; butter, 123,042 lbs.; hay, 2,992 tons. Cash value of farms, $4,022,762. Total, estimated, value of all farm productions, including additions to stock, etc., $949,552. Value of manufactures, $237,915.

Mercer, tn. in Somerset co., Me. Pop., 846.

Mercer, p. v. in the above tn., 14 mls. from North Belgrade.

Mercer, co. in Mo., N. part, bordering on Iowa. Pop., 11,557; in 1860, 9,300. The surface is level or undulating, and about equally divided between timber land and prairies. Coal, iron and copper have been discovered. The co. is drained by Weldon R. and Crooked Fork of Grand R. The Southern Division of the Chicago, Rock Island & Pacific R. R. passes through it. Princeton is the co. seat. Agr. productions in 1870: Wheat, 69,068 bush.; rye, 9,669 bush.; Indian-corn, 472,730 bush.; oats, 160,081 bush.; Irish pot's, 42,969 bush.; sweet pot's, 1,046 bush.; tobacco, 17,550 lbs.; butter, 234,074 lbs.; hay, 11,662 tons. Cash value of farms, $2,822,948. Total, estimated, value of all farm productions, including additions to stock, etc., $907,586. Value of manufactures, $79,035.

Mercer, co. in N. J., W. central part. Area, 221½ sq. mls. Pop., 46,386; in 1860, 37,419. The Delaware R. forms the south-western boundary, and Millstone R. the south-eastern. Stony and Assunpink Crs. drain it. The surface is generally level. The soil is fertile and well cultivated. The New Jersey R. R. and the Camden & Amboy R. R. intersect the co. Trenton is the co. seat. Agr. productions in 1870: Wheat, 149,238 bush.; rye, 16,505 bush.; oats, 428,143 bush.; Indian-corn, 545,547 bush.; Irish pot's, 222,207 bush.; sweet pot's, 9,724 bush.; butter, 509,342 lbs.; hay, 28,767 tons. Cash value of farms, $14,102,100. Total, estimated, value of all farm productions, including additions to stock, etc., $2,332,203. Principal products of industry: Forged and rolled iron, $1,914,728; flour and meal, $526,513; stone and earthen ware, $853,585, and woollen goods, $436,337. Total value of manufactures, $8,881,074.

Mercer, co. in Ohio, W. part. Area, 470 sq. mls. Pop., 17,254; in 1860, 14,104. The surface is level and the soil fertile. It is drained by the head waters of the Wabash R.; St. Mary's R. flows through the N. E. part. In the E. part is Reservoir Lake, one of the largest in the state. Celina is the co. seat. Agr. productions in 1870: Wheat, 338,289 bush.; rye, 14,659 bush.; Indian-corn, 341,775 bush.; oats, 244,289 bush.; Irish pot's, 34,298 bush.; sweet pot's, 370 bush.; butter, 373,956 lbs.; hay, 16,527 tons. Cash value of farms, $5,229,599. Total, estimated, value of all farm productions, including additions to stock, etc., $1,090,590. Value of manufactures, $382,559.

Mercer, p. o. in the above co.

Mercer, co. in Pa., W. N. W. part. Area about 780 sq. mls. Pop., 49,977; in 1860, 36,856. It is bounded on the W. by Ohio and traversed by the Shenango R. from N. to S. The other streams which drain it are Neshannock Cr., Sandy Cr. and Pymatuning Cr. The surface is undulating and the soil very productive. The Erie & Pittsburgh R. R. and the Atlantic & Great Western R. R. intersect the co. Mercer is the co. seat. Agr. productions in 1870: Wheat, 341,922 bush.; rye, 24,850 bush.; oats, 883,965 bush.; Indian-corn, 639,743 bush.; Irish pot's, 149,124 bush.; sweet pot's, 113 bush.; butter, 1,516,067 lbs.; hay, 58,422 tons. Cash value of farms, $22,048,299. Total, estimated, value of all farm productions, including additions to stock, etc., $3,358,557. Total value of manufactures, $6,544,277, including $1,125,000 for forged and rolled iron, and $2,439,311 for pig iron.

Merrick, co. in Nebr., E. central part. Area, 395 sq. mls. Pop., 557; in 1860, 109. The Platte R. forms the S. E. boundary of the co. and the Union Pacific R. R. intersects it, following the valley of this stream. Prairie Cr. flows through the co. from S. W. to N. E. The surface is gently rolling and consists of fertile prairies. Lone Tree is the co. seat. Agr. productions in 1870: Wheat, 9,999 bush.; Indian-corn, 13,024 bush.; oats, 31,579 bush.; Irish pot's, 5,029 bush.; butter, 13,205 lbs.; hay, 1,548 tons. Cash value of farms, $131,670. Total, estimated, value of all farm productions, including additions to stock, etc., $53,845.

Merrimack, co. in N. H., S. central part. Area about 700 sq. mls. Pop., 42,151; in 1860, 41,408. It is traversed from N. to S. by the Merrimac R., which receives Suncook R. from the E. and Warner R. with the Contoocook R. from the W. The surface is broken and in many parts hilly. The Concord, Montreal & Boston R. R., and the Manchester & North Weare R. R. intersect the co. Concord is the co. seat. Agr. productions in 1870: Wheat, 31,403 bush.; rye, 5,068 bush.; oats, 103,525 bush.; Indian-corn, 189,788 bush.; Irish pot's, 472,131 bush.; butter, 745,386 lbs.; hay, 78,278 tons. Cash value of farms, $12,096,577. Total, estimated, value of all farm productions, including additions to stock, etc., $3,120,292. Principal products of industry: Cotton goods, $1,516,209; woollen goods, $1,240,217, and carriages and wagons, $478,130. Value of manufactures, $7,627,676.

Merrimac River is formed by the confluence of the Winnipisseogee and Pemigewasset Rs., which unite near the boundary of Belknap and Merrimack cos., N. H. It then flows S. through Merrimack and Hillsborough cos., and enters Middlesex co., Mass., where it assumes a north-easterly course through Essex co., and then empties into the Atlantic Ocean. It is navigable for small vessels as far as Haverhill, but vessels may ascend to Concord, N. H. by the canals constructed around the falls. It affords immense water-power, which is extensively employed in the prosperous manufacturing cities situated upon its banks.

Michigamme, p. o. in Marquette co., Mich.

MICHIGAN, one of the N. central states; consists of two large, irregular peninsulas. The northern or upper peninsula is bounded on the S. W. by Wis., on the N. by Lake Superior, on the E. by St. Mary's R., and on the S. by Lake Michigan, the Strait of Mackinaw and Lake Huron. The southern or lower peninsula is bounded on the S. by Ohio and Ind., on the W. by Lake Michigan, and on the E. by Lake Erie, the Detroit R., Lake St. Clair, St. Clair R. and Lake Huron. The state extends from 41° 30′ to 47° 31′ N. lat., and from 82° 24′ to 90° 33′ W. long., and includes the Isle Royale in Lake Superior, which is intersected by the 48th parallel. The area is 56,451 sq. mls., or 36,128,640 acres.

Surface.—The upper peninsula has a broken and often rocky surface. The part which lies E. of a line drawn from Marquette to the mouth of the Menomonee R. has no elevations of more than 400 feet in height above the level of Lake Superior. The part lying W. of said line includes several irregular mountain ranges, which attain a height of 800 and in a few cases of 1,400 feet above the lake level. The water-shed of the peninsula lies much nearer to the northern shore than to the southern, thus indicating the fact that the descent is gradual toward Lake Michigan and more rapidly falling off toward Lake Superior. The shores of this lake abound in bold and picturesque scenery. Sixty mls. E. of Sault St. Mary are the famous "Pictured Rocks," masses of variegated sandstone resembling ruined castles and temples.

The lower peninsula is more level and offers greater attractions to the farmer and settler than the upper. The northern in the highest portion rarely exceeds 500 feet above the lakes, and gives rise to numerous streams flowing from it in all directions. The southern portion is lower, and is either slightly undulating or nearly level.

Rivers and Lakes.—The rivers of the upper peninsula take their rise from numerous lakes and marshes dispersed over the plateau. None of them are navigable for anything larger than a canoe. Those entering into Lake Superior especially have numerous rapids and cascades. Yet in the spring, when the waters are high, these rivers are of great economical value, as they afford facilities for floating the logs from the interior to the saw-mills sprung up at the mouth of almost every larger water-course, whose branches reach back into the pine lands. The following empty into Lake Superior: Montreal R., separating Mich. from Wis., Presque' Isle R., Ontonagon R., Sturgeon R., emptying into Kewaunee B., and Tequamenon R. The following empty into Green B. and Lake Michigan: Menomonee R., flowing along the Wis. boundary, Escanaba R., White Fish R., Sturgeon R., Manistique R., Carp R. and Pine R.

The streams of the lower peninsula are larger than the preceding, and several of them are navigable. The following empty into Lake Michigan: Manistee R., Pere Marquette R., White R., Muskegon R., Grand R., which receives Thornapple R.; Kalamazoo R. and St. Joseph R. Into Lake Huron empty Cheboygan R., Thunder Bay R., Au Sable R., Rifle R., Saginaw R., which empties into Saginaw B., receives Chippewa R. with Tittibawasse and Pine Rs., and is formed by the confluence of the Flint and Shiawassee Rs.; Black R. and Belle R. empty into R. St. Clair; Huron R. and Raisin R. into Lake Erie, and Clinton R. into Lake St. Clair.

Climate and Vegetation.—The climate of Mich. is milder than in the same latitudes farther E., owing to the proximity of the great lakes. The upper peninsula, however, has very rigorous winters. At Ontonagon the mean annual temperature in 1870 was 44° 33′; the highest temperature, 90°, the lowest, —24°, showing a range between extremes of 114°. At Grand Rapids the mean annual temperature was 50.7°; the highest temperature 102°, and the lowest—10°, showing a range of 112°. Southerly and westerly winds greatly prevailed at both places.

The upper peninsula is almost wholly covered with unbroken pine forests. The lower peninsula also has extensive forests, consisting of pines in the northern part and of deciduous trees in the southern; but they are diversified by those beautiful prairie lawns, known as "oak openings."

Population.—Mich. is rapidly increasing in population and wealth. In 1810 it had 4,762 inhabitants; in 1820, 8,765; in 1830, 31,639; in 1840, 212,267; in 1850, 397,654; in 1860, 749,113 and in 1870, 1,184,059, besides 3,175 Indians living on reservations and sustaining tribal relations. The whites numbered 1,167,282; the colored persons 11,849 and the Indians out of tribal relations, 4,926.

In regard to nativities the following numbers are given in the last census report: Born in the United States, 916,049; of whom 507,268 were born in Mich.; 7,412 in Conn.; 692 in Del.; 6,055 in Ill.; 12,140 in Ind.; 1,486 in Iowa; 1,719 in Ky.; 3,932 in Me.; 1,265 in Md.; 10,839 in Mass.; 666 in Mo.; 3,633 in N. H.; 8,023 in N. J.; 231,509 in N. Y.; 62,207 in Ohio; 28,507 in Pa.; 1,137 in R. I.; 687 in Tenn.; 14,445 in Vt.; 2,984 in Va. and W. Va., and 5,986 in Wis. The foreign-born population was 268,010; of whom 88,590 are natives of British America, 4,354 of France, 64,143 of Germany, 35,051 of England; 42,013 of Ireland, 8,552 of Scotland,

12,559 of Holland, 3,922 of Sweden and Norway, and 2,116 of Switzerland.

The population of 10 years and over numbered 873,763, of whom 404,164 were engaged in the useful occupations, viz.: 187,211 in agriculture, 104,728 in personal and professional services, 29,588 in trade and transportation, and 82,637 in manufactures, mechanical and mining industries.

Mining.—Mich. is one of the most favored states of the Union with regard to mineral treasures, and it is the western part of the upper peninsula which is especially rich in them. The copper deposits which abundantly occur in the belt of country from Keweenaw Point to the western borders of the state are the richest in the world. During the 20 years closing with 1865, 76,107 tons of copper were shipped from the three ports of Ontonagon, Keweenaw and Portage Lake, and in the year 1868 alone, 7,500 tons.

In Marquette co. are found large deposits of iron. The yield for the 7 years closing with 1862 was 414,136 tons, and during 1866, 296,872 tons of ore and 18,437 of pig iron. In quality the iron of this state ranks with the finest in the world. The northern part of the lower peninsula contains productive coal measures of great extent. Near Saginaw a very fine salt is obtained. The product was 530,000 barrels in 1865, 407,997 barrels in 1866, 474,721 barrels in 1867, and 577,569 barrels in 1869.

Lumbering is one of the principal sources of wealth in the state, and has been steadily increasing for years past. In 1866 the yield was 1,125,000,000 feet; in 1867, 1,400,000,000, and in 1868, 2,000,000,000.

Agriculture.—The upper peninsula is too rugged, and has too sterile a soil for the purposes of the farmer or stock raiser; but the lower peninsula, including about three-fifths of the area of the state, is very productive, and in its southern portion includes nearly the whole of the population and of the improvements of the state.

The farms include 10,027,142 acres, of which 5,096,939 are improved; 842,057 unimproved and 4,080,146 woodland. The cash value of farms in 1870 was $398,240,578, and of farm implements, $13,711,979. The estimated value of all farm productions, including additions to stock, was $81,508,623, and of orchard products, $3,447,985.

The wheat yield of Mich. is surpassed by but few other states. It was, in 1870, 268,810 bush. of spring wheat, and 15,996,963 of winter wheat. The other productions were: rye, 144,508 bush.; Indian-corn, 14,086,238 bush.; oats, 8,954,466 bush.; barley, 834,558 bush.; Irish pot's, 10,318,799 bush.; tobacco, 5,385 lbs.; butter, 24,400,185 lbs.; hay, 1,290,923 tons, and wool, 8,726,145 lbs. Wool growing is a leading agricultural interest of the state. Southern Mich. has become one of the greatest apple growing regions of the Union. Peaches are raised successfully in the region bordering on Lake Michigan as far N. as Grand Traverse B., while pears, plums, cherries, quinces and other varieties of fruit are grown throughout the state. The culture of the grape has been successfully introduced into the valleys which open out on Lake Michigan; and the more hardy species grow in the interior.

In 1870 the live stock of the state had a value of $49,809,869, and comprised 228,302 horses, 2,353 mules and asses, 250,859 milch cows, 36,499 working oxen, 260,171 other cattle, 1,985,906 sheep and 417,811 swine.

Manufactures.—Mich. has progressed most rapidly in the development of its manufacturing interests. In 1850 the total value of the manufactures was $11,169,001; in 1860, $32,658,356; and in 1870 it had nearly quadrupled, being $118,394,676. The 2,215 steam-engines had 70,956 horse-power, and the 9,455 establishments employed 63,694 hands, and consumed materials to the amount of $68,142,515. The capital invested was $71,712,283, and the wages paid, $21,205,355.

The principal products of industry and their values were as follows: Agricultural implements, $1,569,596; boots and shoes, $2,552,931; carpentering and building, $3,976,333; carriages and wagons, $2,393,328; freight and passenger cars, $1,488,724; men's clothing, $2,423,170; copper, milled and smelted, $9,260,976; flour and meal, $21,174,247; furniture, $1,630,199; forged and rolled iron, $780,750; pig iron, $2,911,515; iron castings, $2,082,532; leather, $2,670,608; beer, $1,216,286; lumber, $33,078,241; machinery, $1,355,371; salt, $1,176,811; sash, doors and blinds, $1,868,596, and tobacco and cigars, $1,849,383.

Commerce and Railroads.—The commercial position of the state is very advantageous, surrounded by the great lakes, its coasts are in direct water communication with New York, while its railroads and canals facilitate an immense internal commerce. It has four ports of entry: Detroit, Huron, Superior and Michigan, into which entered, in 1871, foreign goods of $2,323,542 in value, and from which where exported domestic goods of $3,605,025 in value.

The first 24 mls. of R. R. were completed in 1840; 10 years later the mileage was 342. From 1869, when the mileage was 1,199, to 1873, Jan. 1, 1,808 mls. were constructed, or 150 per cent. more than the aggregate length constructed during the whole previous history of the state. The governor estimates the cost of the roads built during the four years at $54,000,000.

The principal roads are the following: The Detroit & Milwaukee R. R. (189 mls.); the Flint & Pere Marquette R. R. (232 mls.); the Jackson, Lansing & Saginaw R.R. (208 mls.); the Marquette Houghton & Ontonagon R. R. (49 mls.); the Michigan Central R. R. (285 mls); the Port Huron & Lake Michigan R. R. (66 mls.); and the Detroit Lansing & Lake Michigan R. R., 164 mls.

Education.—Mich. has always supported and fostered public schools and higher institutions of learning with the greatest liberality. The State University at Ann Arbor is the largest college W. of the Alleghany Mts. and ranks with the foremost institutions of its kind in the country. In 1870 it had 1,126 students and 34 professors. The number of students in the department of science, literature and the arts was 477; in that of medicine and surgery 340; and in that of law 309. The total receipts for 1872 were $76,359, and the expenses $92,000, leaving a deficiency of $15,640. The university admits lady students.

The Agricultural College, located at Lansing was established in 1863, and has an endowment of 240,000 acres. It had, in 1870, 7 professors and 142 students. The three other colleges of Mich. are at Kalamazoo, Albion and Olivet. The State Normal school at Ypsilanti was opened in 1854, and embraces a training course and a higher course. In the experimental school the pupils of the Normal School practice actual teaching.

The school population from 5 to 20 years of age was, in 1870, 384,546, of whom 278,685 attended the public schools. The number of male teachers was 2,793, and of female teachers 8,221. The estimated number of pupils attending private schools was 9,613. The number of school-houses was 5,111, 109 more than in the preceding year (1869). The value of school-houses was $6,243,797; total resources for school purposes, $3,154,221.

Charitable and Penal Institutions.—The Asylum for the Deaf, Dumb and the Blind, at Flint, was opened in 1854. Mechanical instruction has lately been introduced, which enables the pupils to qualify themselves for self-support after leaving the institution. The Asylum for the Insane at Kalamazoo had, in 1872, 460 patients. The State Reform School at Lansing, to which youthful delinquents are committed, is maintained at a cost of over $30,000 per annum.

The State Prison is located at Jackson, and had, in 1870, 663 convicts; in 1871, 627, and in 1872, 589. For the last four years it has been more than self-sustaining.

Wealth, Taxation and Finances.—In 1870 the true value of real and personal estate was $719,208,118; the assessed value of the same was but $272,242,917, including $224,663,667 for real estate, and $47,579,250 for personal estate. The total, not national, taxation was $5,412,957, including state, county and town taxes.

The receipts for the fiscal year ending September 30, 1872, was $2,181,498, and the disbursements $1,888,397, leaving a balance in the treasury of $977,224. The total state debt in 1872 was $1,762,293, of which $1,728,000 was in interest-bearing bonds, and $34,293 was debt bearing no interest.

Government.—Mich. was settled by the French at Detroit in 1690. At the peace of 1763 it came under the dominion of Great Britain. It was a part of the territory ceded to the United States by Virginia, erected into a territory in 1805, and admitted as a state into the Union in 1837.

The following officers are chosen biennially by the legal voters: Governor, Lieutenant-Governor, Secretary of State, Treasurer, Auditor-General, Commissioner of the Land Office, Attorney-General, Superintendent of Public Instruction, and Adjutant-General.

The legislature meets biennially in the odd years, and comprises a Senate of 32 members, and a House of Representatives of 100 members. To qualify a resident to vote, he must be above the age of 21, must have resided in the state 3 months and in his election district 10 days. The judicial power is vested in one Supreme Court, circuit courts, probate courts and justices of the peace. The Supreme Court has a general superintending control over all inferior courts, and consists of 4 judges, who are chosen by the voters for 8 years, one judge retiring every second year, unless re-elected. The judges of the eleven circuit courts are chosen for 6 years.

Mich. is divided into the following 75 counties: Alcona, Allegan, Alpena, Antrim, Barry, Bay, Benzie, Berrien, Branch, Calhoun, Cass, Charlevoix, Cheboygan, Chippewa, Clare, Clinton, Delta, Eaton, Emmett, Genesee, Gladwin, Grand Traverse, Gratiot, Hillsdale, Houghton, Huron, Ingham, Ionia, Iosco, Isabella, Jackson, Kalamazoo, Kalkaska, Kent, Keweenaw, Lake, Lapeer, Leelenaw, Lenawee, Livingston, Mackinaw, Macomb, Manistee, Manitou, Marquette, Mason, Mecosta, Menomonee, Midland, Missaukee, Monroe, Montcalm, Montmorenci, Muskegon, Newaygo, Oakland, Oceana, Ogemaw, Ontonagon, Osceola, Oscada, Ottawa, Presque' Isle, Roscommon, Saginaw, Sanilac, Schoolcraft, Shiawassee, St. Clair, St. Joseph, Tuscola, Van Buren, Washtenaw, Wayne and Wexford. Lansing, 5,241 inhabitants, is the state capital. The census enumerates the following cities with their populations: Bay City, 7,064; Niles, 4,630; Coldwater, 4,381; Battle Creek, 5,838; Marshall, 4,925; Flint, 5,386; Hillsdale, 3,518; Jackson, 11,447; Grand Rapids, 16,507; Lapeer, 1,772; Adrian, 8,438; Manistee, 3,343; Big Rapids, 1,237; Monroe, 5,086; Muskegon, 8,002; Pontiac, 4,867; Grand Haven, 3,147; Holland, 2,319; East Saginaw, 11,350; Saginaw, 7,460; Corunna, 1,408; Owasso, 2,065; Port Huron, 5,973; St. Clair, 1,790; Ann Arbor, 7,363; Ypsilanti, 5,471; Detroit, 79,577, and Wyandotte, 2,731.

Michigan, Lake, one of the "Great Lakes" belonging to the basin of the St. Lawrence R. It extends in a southerly direction between Mich., Wis., Ill. and Ind., and from 46° to 41° 40′ N. lat. Its length is about 325 mls. and its width 85 mls. Its surface is 578 feet above the sea level, and its greatest depth is probably near 1,000 feet. The Strait of Mackinaw connects it with Lake Huron, and in the N. W. extends the long and narrow Green B., and in the N. E. Great and Little Traverse Bs. The islands constituting Manitou co., Mich., are in the northern part of the lake. Its drainage area is not large. It receives from the N. Manistique and Esconaba Rs., from the W. Manistee and Fox R., and from the E. the principal streams of the southern peninsula of Mich., as the St. Joseph, Grand, Muskegon and other rivers.

Middlesex, co. in Conn., S. part. Area, 425 sq. mls. Pop., 36,099; in 1860, 30,859. It includes the southern portion of the Connecticut R. Valley, and borders on Long Island Sound. The Hammonassett R. forms part of the W. boundary. The surface is undulating and gradually rises from the sea-coast toward the interior. The soil is productive. The Shore Line R. R., the Air Line R. R. and the Connecticut Valley R. R. intersect the co. Middletown and Haddam are the co. seats. Agr. productions in 1870: Wheat, 5,841 bush.; rye, 17,101 bush.; oats, 40,352 bush.; Indian-corn, 85,451 bush.; Irish pot's, 176,231 bush.; sweet pot's, 105 bush.; tobacco, 609,327 lbs.; butter, 494,620 lbs.; hay, 39,882 tons. Cash value of farms, $6,932,828. Total, estimated, value of all farm productions, including additions to stock, etc., $1,504,256. Principal products of industry in 1870: Bells, $326,000; cotton, goods, $936,272; flour and meal, $440,622; hardware, $745,273; musical instruments, $418,000; plated ware, $415,551; pumps, $327,200 and washing machines, $345,000. Total value of manufactures, $7,719,537.
Middlesex, co. in Mass., N. E. part. Area about 850 sq. mls. Pop., 274,353; in 1860, 216,354. It has an uneven surface, rising in some parts into hills. The principal streams are the Merrimac R., which passes through the N. E. corner: the Nashua R. and the Concord R. These streams and their tributaries afford ample water-power, which is made use of in numerous manufacturing establishments. Railroads intersect the co. in all directions. Concord is the co. seat. Agr. productions in 1870: Wheat, 1,410 bush.; rye, 20,350 bush.; Indian-corn, 190,965 bush.; oats, 56,302 bush.; Irish pot's, 443,099 bush.; butter, 530,136 lbs.; hay, 74,678 tons. Cash value of farms, $19,544,230. Total, estimated, value of all farm productions, including additions to stock, etc., $5,297,365. Principal articles of industry: Woollen goods, $7,025,736: worsted goods, $1,670,089; bleaching and dyeing, $16,211,725; boots and shoes, $16,191,027; bakery products, $344,330; carpets, $2,170,000; men's clothing, $857,494; cotton goods, $12,063,252; drugs and chemicals,

$830,000; flour and meal, $1,242,007; furniture, $2,311,221; glass ware, $1,254,800; hosiery, $1,080,353; India-rubber goods, $1,665,530; iron castings, $947,880; tanned leather, $2,930,541; curried leather, $4,932,928; morocco, $982,420; machinery, $1,342,187; molasses and sugar, refined, $2,551,212; paper, $1,206,970; patent medicines, $645,500; printing cotton and woollen goods, $4,977,538; book printing, $1,150,000; soap and candles, $998,384; straw goods, $1,081,000; and watches, $1,151,160. Total value of manufactures, $113,147,270.

Middlesex, co. in N. J., E. part. Area, 300½ sq. mls. Pop., 45,029; in 1860, 34,812. It is bounded on the S. W. by Millstone R., on the N. by Rahway R., and on the E. by Raritan B. and Staten Island Sound. The Raritan R., South R. and Manalapan Cr. drain the co., and the Camden & Amboy R. R. and the New Jersey R. R. intersect it. New Brunswick is the co. seat. Agr. productions in 1870: Wheat, 106,158 bush.; rye, 15,967 bush.; oats, 271,332 bush.; Indian-corn, 423,843 bush.; Irish pot's, 248,830 bush.; sweet pot's, 12,391 bush.; butter, 418,434 lbs.; hay, 37,160 tons. Cash value of farms, $16,895,100. Total, estimated, value of all farm productions, including additions to stock, etc., $2,178,202. Principal products of industry: India-rubber goods, $1,251,494; brick, $803,624, and hosiery, $450,000. Total value of manufactures, $5,372,583.

Milwaukee, co. in Wis., S. E. part. Area, 310 sq. mls. Pop., 89,930; in 1860, 62,518. It borders in the E. on Lake Michigan, and is intersected by the Milwaukee R. The surface is level and well timbered, and the soil highly productive. The numerous railroads centering at the city of Milwaukee, the co. seat, intersect the co. Agr. productions in 1870: Wheat, 238,132 bush.; rye, 48,271 bush.; Indian-corn, 169,996 bush.; oats, 297,874 bush.; Irish pot's, 214,916 bush.; butter, 647,590 lbs.; hay, 25,069 tons. Cash value of farms, $10,284,555. Total, estimated, value of all farm productions, including additions to stock, etc., $1,734,926. Value of manufactures, $18,793,122.
Milwaukee, tn. in Milwaukee co., Wis. Pop., 3,096.
***Milwaukee,** city, port of entry, and co. seat of Milwaukee co., Wis., on W. shore of Lake Michigan, at mouth of Milwaukee R., 85 mls.

N. by W. of Chicago. It is the terminus of the Milwaukee & Northern R. R., of the La Crosse Division and the Prairie du Chien Division of Milwaukee & St. Paul R. R., of the Western Union R. R. and of the Detroit & Milwaukee R. R., and is connected by steamers with the principal ports on the lake. Its harbor is capacious and safe.

The imports from foreign countries, in 1872, had a value of $130,063, and the exports to foreign countries of $1,464,972.

The city is pleasantly located upon both banks of the river. It is a prominent wheat market, and has immense facilities for storage and shipment. The river affords fine water-power, which is turned to account by extensive manufactories. The city has many substantial public buildings, hotels and private residences. The United States Custom House, which embraces the Post-office and United States Courts, is a handsome structure of Athens stone. Among the 60 church buildings belonging to the different denominations, several are remarkable for beauty and design, as the new Baptist Church and the Catholic Cathedral of St. John.

M. was settled in 1835, incorporated in 1846, and had, in 1870, a population of 71,450; in 1860, 45,140; in 1850, 19,963, being the largest city in the state and the nineteenth in the Union. According to the last census, the native population was 37,667, of whom 37,499 were whites, and only 167 colored persons. The natives of foreign countries numbered 33,773, of whom 22,599 were Germans, 1,395 Englishmen, 3,784 Irishmen, 423 Scotchmen, and 692 Dutchmen. In the various classes of useful occupations there were engaged 23,119 persons, viz.: 244 in agriculture, 8,263 in professional and personal services (including 68 clergymen, 23 journalists, 108 lawyers, 84 physicians and surgeons, 397 teachers, 2,575 domestic servants and 3,724 laborers), 5,355 in trade and transportation, and 9,257 in manufactures and mechanical industries. Twenty-five newspapers and periodicals are published in the city, the principal of which are the "Sentinel" (daily, tri-weekly and weekly), "News" (daily, semi-weekly and weekly), "Evening Wisconsin" (daily, semi-weekly and weekly), "Herald" (daily and weekly), and "See Bote" (daily).

Milwaukee River, in E. Wis., rises in Sheboygan co., flows through Ozaukee co., has a southerly course, and empties into Lake Michigan. The city of Milwaukee lies on both sides above its mouth.

Minisink, p. o. in the above tn.
Minneapolis, p. v. in Ottawa co., Kans., on Solomon R., 25 mls. N. W. of Solomon City. Has abundant water-power, which is fast being turned to account for manufacturing purposes. Pop. about 550. One newspaper.
Minneapolis, tn. in Hennepin co., Minn. Pop., 14,239.
***Minneapolis,** city in the above tn. and the co. seat, on both sides of the Mississippi R., 10 mls. N. W. of St. Paul and at Falls of St. Anthony. A fine suspension bridge spanning the R. connects the eastern and western parts of the city. The eastern part was formerly the city of St. Anthony. Its railroad connections are the St. Paul & Minneapolis R. R., St. Paul & Pacific R. R., Minneapolis & St. Louis R. R., and Minneapolis & Duluth R. R. The city possesses one of the finest available water-powers in the world, which it is largely employing in extensive manufactories of castings, woollen goods, flour, paper, agricultural implements, sash, doors, mouldings, etc., aggregating annually over $11,000,000 in value. There are here several beautiful hotels, public buildings and private residences. Fourteen newspapers are published, the principal of which are the "Tribune" (daily and weekly); "Evening News," "Farmers's Union," "Nordisk Folkeblad," Norwegian, and "Freie Presse," German. Pop., 18,079; in 1860, 5,821.
Minnehaha, co. in Dak. Ter., E. part. Pop., 355. It borders on Minn., has a rolling prairie surface, and is intersected from N. to S. by the Big Sioux R. Sioux Falls is the co. seat. Agr. productions in 1870: Butter, 8,100 lbs. Cash value of farms, $20,540. Total, estimated, value of all farm productions, including additions to stock, etc., $2,275.
Minnehaha River, a small tributary of the Mississippi R., in Hennepin co., Minn. It is noted for its beautiful falls, 40 feet high and about half a mile above its mouth.
Minneaska, tn. in Wabashaw co., Minn. Pop., 393.
Minneola, p. o. in Little River co., Ark.
Minneola, tn. in Goodhue co., Minn. Pop., 1,089.
Minnequa, p. v. in Bradford co., Pa., on the Northern Central R. R., 41 mls. N. of Williamsport.
Minneska, p. v. in Wabashaw co., Minn., on the Mississippi R. and the Chicago, Milwaukee & St. Paul R. R., 16 mls. N. W. of Winona. Pop., 217.
MINNESOTA lies near the center of the continent, and is bounded on the N. by British America, from which it is partly separated by the Pigeon R. and the series of lakes and portages extending from that river westward to Rainy Lake. The boundary then follows Rainy Lake and its outlet, Rainy Lake R., to the large Lake of the Woods. The eastern boundary is formed by Lake Superior and the state of Wis., from which Minn. is divided by the St. Croix and Mississippi Rs. From Dak. Ter., in the W., Minn. is separated by the Red River of the North, the Bois des Sioux R., Lake Traverse and Big Stone Lake, and on the S. it is bounded by Iowa. It extends from 43° 30′ to 49° N. lat., and from 89° 29′ to 97° 5′ W. long., and has an area of 83,531 sq. mls., or 53,459,840 acres.
Surface.—The surface of the state is undulating and resembles the rolling prairies of the adjoining states of Iowa and Wis. It has no mountains, yet the general evenness of the surface is broken by that broad swell of the ground which intersects the northern portion, and is known as the "Hauteurs des Terres," or the Height of Land. This height gives rise to the head streams of the Mississippi and the affluents of Lake Winnepeg and rarely exceeds 1,500 feet in elevation above the sea. Lake Itaska, commonly regarded as the source of the Mississippi, lies within the heights and is 1,680 feet high.
Rivers and Lakes.—Minn. has five navigable rivers. The Mississippi, rising on the Height of Land, takes from Lake Itasca a circular sweep northward, and then pursues a general southern course, running through the state for about 800 mls., of which 130 wash the eastern boundary. It is navigable in all about 540 mls. in the state, which distance, however, is interrupted by the Falls of St. Anthony, near Minneapolis. The St. Croix R., rising in northern Wis., flows southward and forms, for 128 mls., the boundary between Wis. and Minn. It is navigable for 53 mls.
The Minnesota R., the principal tributary of the Mississippi in the state, rises in Coteau des Prairies, in Dak. Ter., and after passing through Big Stone Lake, flows S. E. as far as Mankato, where it sharply turns N. E. and empties 5 mls. above St. Paul, after a course of 470 mls., 300 of which are navigable in the wet season and about 50 in the dryest months of the year.
The Red River of the North rises in the Height of Land near the source of the Mississippi, and, after sweeping to the S. and the W. to Breckinridge, flows due N., along the boundary of Minn., a distance of 380 mls. It is navigable in most seasons about 250 mls. The St. Louis R., which joins the western extremity of Lake Superior, is navigable for 21 mls.
The large rivers here mentioned receive numerous smaller streams, watering every portion of the state and affording excellent facilities for lumbering, manufacturing and farming
The Red River of the North receives Buffalo

R., Wild Rice R., Red Lake R., the outlet of the large lake of the same name, and Swamp, or Tamarao, R. The Mississippi receives Swan R., Rum R., the outlet of the large lake called Mille Lacs, Pine R., Crow Wing R., with Leaf and Long Prairie Rs.; Sauk R., Crow R., Cannon R., Zumbro R. and Root R. The principal tributaries of the Minnesota R. are Pomme de Terre R., Chippewa R., Lac qui Parle R., Yellow Medicine R., Redwood R., Big Cottonwood R. and Blue Earth R.; and those of the St. Croix are Kettle R. and Snake R.

The almost numberless lakes, varying from 1 to 30 mls. in diameter, form a marked feature in the scenery of the state. Their water is remarkably clear and pure, resting upon basins of sand and pebbles, among which jasper, agate and cornelian are often found. These lakes abound with the very best varieties of fish, and are the resorts in spring and autumn of wild geese, ducks and other water fowl.

Climate and Vegetation.—The climate of Minn. is healthy and invigorating. The atmosphere in summer is clear, cool and pleasant, with westerly, south-westerly and southerly breezes. The nights are always cool and bracing. The winters are rigorous and marked by extreme dryness. The greater quantity of rain or moisture falls during the season of vegetation from May to September.

The mean summer temperature is about 70.50° and corresponds with that of central Wis. and southern Pa. The mean winter temperature is 16.10°, corresponding with that of northern Wis. and southern Vt. The mean annual temperature is 44.60°.

Minn. is neither a timber nor a prairie state, but possesses in a large degree the advantages of both. It is estimated that about one-third of the area is covered with forest growth, while two-thirds are open prairies. The Height of Land and the region in which rise the upper tributaries of the Mississippi and St. Croix Rs. are known as the "pine region," comprising an estimated area of 21,000 sq. mls. On both sides of the Minnesota R. extend the so-called "big woods," a region covered with deciduous forests, including an area of about 5,000 sq. mls. Many of the prairies of Minn. are dotted with small bodies of wood, or scattered trees, and have the general character of well kept and handsomely laid out parks.

Wild animals yet abound on the prairies and in the forests, among which are deer, bears, wolves, foxes, wild cats, raccoons and rabbits. The streams are frequented by the otter, mink, beaver and muskrat. Pigeons, grouse and partridges are among the feathered game.

Population.—The growth of Minn. in population has been very rapid, and as there are yet millions of acres of the greatest fertility awaiting settlers, it promises to be equally rapid in the future. When in 1849 it was erected into a territory, it had but 4,057 inhabitants. In 1850 there were 6,077; in 1860, 172,023, and in 1870, 439,706, thus showing an increase during the last two decades of 2,766, and 155 per cent. respectively. In 1870 the population consisted of 438,257 whites, 759 colored persons, and 690 Indians out of tribal relations; there were, besides, 6,350 Indians living on reservations and at agencies. The nativities, according to the census, were as follows: natives of the United States, 279,009; of the state, 125,759; of Conn., 2,359; of Ill., 10,979; of Ind., 7,438; of Iowa, 3,970; of Ky., 1,733; of Me., 9,939; of Md., 719; of Mass., 5,731; of Mich., 3,742; of Mo., 1,447; of N. H., 3,271; of N. J., 1,348; of N. Y., 39,505; of N. C., 438; of Ohio, 12,650; of Pa., 11,966; of R. I., 564; of Tenn., 320; of Vt., 6,815; of the Virginias, 1,812, and of Wis., 24,048.

The foreign-born population numbered 160,697, of whom were born in Austria, 2,647; in Bohemia, 2,166; in British America, 16,698; in Denmark, 1,910; in France, 1,743; in Germany, 41,346; in England, 5,670; in Ireland, 21,746; in Scotland, 2,194; in Wales, 944; in Holland, 1,855; in Luxemburg, 1,173; in Norway, 35,940; in Sweden, 20,087, and in Switzerland, 2,162.

The population of 10 years of age and over amounted to 305,568; of whom 132,657 pursued some one of the useful occupations. In agriculture were engaged 75,157; in professional and personal services, 28,330; in trade and transportation, 10,582, and in manufactures and mechanical and mining industries, 18,588.

Minerals and Mining.—Copper abounds in the mineral belt stretching along the northern shore of Lake Superior, and large masses of the pure metal have been taken from Knip and Stuart Rs. Iron ore is found in considerable quantity near Portage and Pigeon Rs., and yields metal fully equal to the best Swedish or Russian iron. A coal bed has been discovered in Brown co., on Cottonwood R., in the vicinity of New Ulm, but thus far the state is supplied with this indispensable mineral from the great coal fields of Iowa. Gold and silver exist, but the attempts to extract them have not been remunerative. The numerous Salt Springs of the Red River Valley yield one bushel of good salt to 24 gals. of brine; and a joint stock company is prosecuting the manufacture of salt from the springs near Belle Plaine on the Minnesota R. Excellent limestone for building purposes is found in immense outcroppings below the Falls of St. Anthony; and at St. Peter a variety occurs which resembles marble and is susceptible of a fine polish.

Agriculture.—The extraordinary development of Minn. is shown by the enlargement of its cultivated area and the increase of its farm productions. In 1860 the improved lands of the state measured 556,250 acres; in 1870, 2,322,102 acres, an increase of 363 per cent. The woodland in the latter year amounted to 1,336,299 acres, and the unimproved land, 2,825,427, making a grand total of 6,483,828 acres, comprised in farms, or nearly 12 per cent. of the whole area of the state. The cash value of farms was $97,847,422; of agricultural implements, $6,721,120, and of farm productions, including additions to stock, etc., $33,446,400. The principal farm products were: Winter wheat, 76,885 bush.; spring wheat, 18,789,188 bush.; rye, 78,088 bush.; Indian-corn, 4,743,117 bush.; barley, 1,032,024 bush.; tobacco, 8,247 lbs.; wool, 401,185 lbs.; Irish pot's, 1,943,063 bush.; butter, 9,522,010 lbs.; cheese, 233,977 lbs.; hay, 695,053 tons; hops, 222,065 lbs., and flax, 122,571 lbs.

The live stock had a value of $20,118,841, and comprised 93,011 horses, 2,350 mules and asses, 121,467 milch cows, 43,176 working oxen, 145,736 other cattle, 132,343 sheep, and 148,473 swine.

Fruit-growing is a profitable branch of industry in Minn. The more hardy varieties of apples, pears, cherries, grapes, and the small fruits generally, succeed well. The apple crop of 1871 is estimated at 30,000 bushels. The cranberry marshes are so vast that Minn. has sometimes been called the "Cranberry State." Strawberries are found wild in large quantities, and all the cultivated varieties of unexcelled quality are grown extensively.

Manufactures.—Great progress has already been made in manufacturing industry, and the immense water-power, the mineral and agricultural resources, the commercial advantages, and the enterprising character of the northern people, by whom Minn. is settled, indicate that it is destined to become conspicuous as a manufacturing state. At the Falls of St. Anthony 100,000 horse-power could easily be utilized, and hardly less is afforded by the St. Croix Falls, and by several other of the large streams of the state.

According to the last census report, Minn. had 2,270 manufacturing establishments, which employed 246 steam-engines of 7,085 horse-power: 434 water-wheels of 13,054 horse-power, and 11,290 workmen. The capital invested in

manufactures was $11,903,729; the wages paid, $4,052,837; the cost of raw materials consumed, $13,832,902, and the total value of products, $23,110,700, an increase for the preceding decade of 393 per cent.

The principal products of industry and their value were: Boots and shoes, $553,163; carpentering and building, $1,067,203; carriages and wagons, $549,558; cars, $788,300; flour and meal, $7,534,575, and sawed lumber, $1,299,162.

Commerce and Railroads.—The commercial position of Minn. is very favorable. Occupying the center of the continent, and including the water-shed of its eastern half, the steam navigation of three great river systems terminates here, viz.: The Mississippi R., northward from the Gulf of Mexico; the Red River of the North, southward from Hudson's B., and the St. Lawrence R., with the chain of great lakes, westward from the Atlantic.

St. Paul is the only customs district in the state, and had, in 1871, 62 steamboats with 10,864 tons, and 77 barges with 9,195 tons. During the season of 1870, 10 steamboats were trading with Duluth; in 1871 the number was increased to 26. The export of grain, reducing flour to wheat, was, in 1871, 2,279,966 bush. On the Red R. three steamers were plying between Breckinridge, Moorhead and Fort Garry.

The first mile of railroad was completed in 1862, and 10 years later Minn. had 1,612 mls., of an assessed value of $84,135,332, carrying 774,289 tons of freight and 641,711 passengers. The following are the principal lines: Southern Minnesota R. R. from Grand Crossing on the Mississippi through the southern tier of counties (167½ mls.), with a branch from Wells to Mankato in course of construction; the Winona & St. Peter R. R., running about 20 mls. N. of and parallel with the above road (200 mls.); the Hastings & Dakota R. R., from Hastings to Glencoe (74 mls.); the Minneapolis & St. Louis R. R., from Minneapolis to Carver (27 mls.), and soon to be completed to a point on the Iowa Central R. R.; the St. Paul & Sioux City R. R. (270 mls.); the Milwaukee & St. Paul R. R., from Minneapolis & St. Paul, southward through Iowa to McGregor on the Mississippi R., and thence to Milwaukee (152 mls. in Minn.); the Chicago & St. Paul R. R., from St. Paul to Winona on the Mississippi R.; the St. Paul, Stillwater & Taylor's Falls R. R. (20 mls.); the Lake Superior & Mississippi R. R. from St. Paul to Duluth (156 mls.); the St. Paul & Pacific R. R., from St. Paul to Breckinridge (217 mls.), with a Branch to Sauk Rapids (66 mls.), and the St. Vincent Branch in process of construction; and the Northern Pacific R. R., from Duluth to the Pacific Ocean (1,775 mls.), of which 255 mls. are within the state.

Education.—In 1851 the Legislature provided for the establishment of the University of Minnesota, and in 1854 the building was begun on an eminence commanding a view of the Falls of St. Anthony. After many struggles, the institution is now in full operation, with a classical, agricultural and military establishment. It has 11 professors and 371 students.

Three Normal Schools are in operation: the first at Winona, the second at Mankato, and the third at St. Cloud. The attendance was, in 1871, 498 students.

An excellent system of public schools has been established in the state. In 1871 the number of school-districts was 2,732 (against 1,685 in 1863); the number of persons of school age, 167,463, of whom 113,983 attended the public schools. The 4,385 teachers were, in the aggregate, paid $540,388, and the 2,310 school-houses had a value of $1,758,133.

The most prominent among the private and and higher institutions of learning are: Carleton College, at Northfield; Groveland Seminary, at Wasioja; Afton Academy, at Afton; St. Mary's Female Academy and St. Paul Female Seminary, at St. Paul.

Wealth, Taxation and Finances.—The assessed value of real estate in 1870 was $62,079,587, and of personal estate, $22,055,745. The true or estimated value of both kinds of property was $228,909,590, against $52,294,413 in 1860.

The amount of levies on all taxable property, in 1871, was $453,363 for state purposes, $825,086 for the public schools, $769 170 for county purposes, $839,297 for town purposes, and $14,686 for bounties, making the total taxes for all purposes, $2,901,602.

The aggregate public debt, not national, in 1870, was $2,788,797, including $350,000 state debt, for which bonds have been issued; $472,694 county debts, and $1,966,103 town and city debts.

Government.—As early as 1680 Louis Hennepin, a French priest, in company with some fur traders, ascended the Mississippi R. as far as the Falls of St. Anthony. The north-western territory, including what is now Minn., was transferred to the United States in 1783, and in 1805 the government purchased from the Indians a tract of land for military purposes, at the mouth of the St. Croix R., and another tract at the mouth of the Minnesota R., including the Falls of St. Anthony. Upon the latter Fort Snelling was built in 1820, and the country near it was settled in 1845. Minn. was organized as a territory in 1849, and admitted into the Union as a state in 1857.

The Governor, Lieutenant-Governor, Secretary of State, Treasurer and Attorney-General are chosen for two years. The Auditor is chosen for three years. The Senate consists of 22 members, chosen for two years, one-half each year; and the House of Representatives comprises 47 members, who are elected annually. The Legislature meets annually in the month of January. Citizens of the United States, who have resided 4 months in the state and 10 days next preceding an election in the district, are legal voters.

The judiciary comprises a Supreme Court, District Courts, Courts of Probate and Justices of the Peace. The Supreme Court has original jurisdiction in such remedial cases as are prescribed by law, and appellate jurisdiction in all cases, both in law and in equity. It consists of a chief justice and two associate justices, who are elected for 7 years. There are six district court judges, who are elected in single districts for 7 years. The district courts have original jurisdiction in all cases of law and equity, where over $100 are in controvesy, and in criminal cases where the punishment may be imprisonment for over 3 months, or a fine of over $100.

The state is divided into the following 70 counties: Aiken, Anoka, Becker, Benton, Blue Earth, Brown, Carlton, Carver, Cass, Chippewa, Chisago, Clay, Cottonwood, Crow Wing, Dakota, Dodge, Douglas, Faribault, Fillmore, Freeborn, Goodhue, Grant, Hennepin, Houston, Isanti, Jackson, Kanabec, Kandiyohi, Lake, Le Sueur, Lyon, McLeod, McPhail, Martin, Meeker, Mille Lac, Morrison, Mower, Murray, Nicollet, Noble, Olmstead, Otter Tail, Pine, Polk, Pope, Ramsey, Redwood, Renville, Rice, Rock, St. Louis, Scott, Sherburne, Sibley, Stearns, Steele, Stevens, Swift, Todd, Traverse, Wabasha, Wadena, Waseca, Washington, Watonwan, Wilkin, Winona, Wright and Yellow Medicine.

The following are the cities enumerated in the census report, with their population: St. Paul, capital of the state, 20,030; Mankato, 3,482; Hastings, 3,458; Red Wing, 4,260; Minneapolis, 13,066; Rochester, 3,953; St. Cloud, 2,161; Owatonna, 2,070; Duluth, 3,131; Winona, 7,192; Stillwater, 4,124, and, Faribault, 3,045.

Mississinewa River, a tributary of the Wabash R. in Indiana; rises in Randolph co. and passes through Delaware, Grant, Wabash and Miami cos. It has a north-westerly course.

MISSISSIPPI, one of the southern states; is bounded on the W. by Ark. and La., on the S. by La. and the Mississippi Sound, an extension of the Gulf of Mexico; on the E. by Ala. and on the N. by Tenn. Its length from N. to S. is 334 mls.; its average width from E. to W. 150 mls., and its area 47,156 sq. mls., or 30,179,840 acres. It lies between 30° 20′ and 35° N. lat., and 88° 12′ and 91° 40′ W. long.

Surface.—The north-eastern is the highest part of the state and forms an undulating table-land, which gently slopes down toward the W. and S., and terminates with steep bluffs on the banks of the Mississippi and Yazoo Rs. In several places, as at Vicksburg, Grand Gulf, Rodney, Natchez, Ellis Cliff and Fort Adams, these bluffs approach close to the river; in others a broad belt of swampy bottom-lands extends along their base. The north-western part of the state includes the largest of these swampy regions, known as the "Yazoo Bottom," which is traversed by the Yazoo, Sun Flower and other streams. It has an area of 7,110 sq. mls. and varies in width from a few to 100 mls. It is, however, intersected by a line of higher ground, some 2 to 6 mls. in width, which is never overflowed.

Rivers.—The Mississippi, which washes the western border of the state, drains nearly one-half of its area. Its principal tributary is the Yazoo R., which flows near the eastern part of the bottom, rises near the northern state line in Marshall co., is known as Cold Water R. until joined by the Tallahatchee R., and then as Tallahatchee R. until joined by the Yallabusha R. The total length from its proper source (Horn Lake) to its mouth above Vicksburgh, is about 500 mls., one-half of which distance is navigable during high water by boats drawing from 2 to 3 feet of water, and as far as Panola by boats drawing 6 feet.

The Big Black R. rises in Choctaw co., and flowing S. W. joins the Mississippi above Grand Gulf. Its whole basin is made up of a rolling country entirely above danger of inundation. The Homochitto R. is the last tributary of the Mississippi, in state of importance. It rises in Franklin co., and flowing W. forms the boundary between Adams and Wilkinson cos.

The north-eastern part of the state is drained by the head waters of the Tombigbee R. and the south-eastern by the Pascagoula R., which is formed in Greene co. by the Leaf and Chickasawha Rs. Pearl R. rises in De Kalb co., flows W. S. W. as far as Jackson, and turning S. empties into Mississippi Sound near Lake Borgne. The Young Warrior and Strong Rs. are its principal affluents. The Tennessee R. touches the N. E. corner of the state for about 15 mls.

Climate and Vegetation.—Miss. has a warm climate. The summers are long and hot, the winters short and mild. The isothermal of 88° Fahr. passes through the central part, and that of 84° through the northern part. The rain-fall is abundant and well distributed through the seasons. Along the Gulf coast it amounts to 64 inches, and from here gradually diminishes toward the N. W., where it is about 48 inches.

The soil of Miss. is very fertile and the vegetation luxuriant. The more elevated portions of the bottoms of the Yazoo and Mississippi are covered with red hickory, holly, spicewood,

dogwood, sassafras, walnut, pecan, gum, overcup oak and hackberry, while the lower and swampy portions contain cypress, water-oak, privet, box elder and swamp ash.

The table-land in the N. E. portion of the state consists generally of prairie land. The remaining and by far the largest portion is covered with forests, consisting of deciduous trees and southern evergreens, as the live-oak, magnolia and others. The long-leaved pine predominates in the sandy plains which occupy the S. E. corner.

Population.—The population of Miss., in 1800, was 8,850; in 1810, 40,352; in 1820, 75,448; in 1830, 136,621; in 1840, 375,651; in 1850, 606,526; in 1860, 791,305; and in 1870, 827,922. This last aggregate comprised 382,896 whites; 444,201 colored persons; 16 Chinese and 809 Indians.

The persons born in the United States numbered 816,731, of whom 563,596 are natives of the state, 59,519 of Ala., 28,259 of Ga., 938 of Ill., 575 of Ind., 1,458 of N. Y., 27,941 of N. C., 1,171 of Ohio, 855 of Pa.. 35,956 of S. C., 31,804 of Tenn., and 33,551 of the Virginias. The foreign-born population numbered but 11,191, of whom 2,960 were natives of Germany, 1,086 of England, 3,359 of Ireland, and 434 of Scotland.

The population of 10 years of age and over numbered 581,206; of whom 318,850 were engaged in all classes of occupations, viz.: 259,199 in agriculture, 40,522 in professional and personal services, 9,148 in trade and transportation and 9,981 in manufactures and mechanical industries.

Agriculture.—Miss. has on the whole an exceedingly productive soil, and but few small sections of the state are permanently unfit for tillage. The sandy pine region in the S. E. requires fertilizing, but in its present state yields turpentine. The prairie table-land in the N. E. has a rich black soil, impregnated with lime, and produces heavy crops of cotton and corn. The valleys of the central and northern parts are also very productive, but the richest soil is found in the Yazoo and Mississippi bottoms, which indeed are inexhaustible. The great staple is cotton, and in its production Miss. holds the first rank in the country.

In 1870 there were 4,209,146 acres of improved land, 7,959,384 acres of woodland and 952,583 acres of other unimproved land, making a total of 10,121,113 of acres in farms, which is but a little over one-third of the area of the state.

The cash value of farms was $81,716,576. Total, estimated, value of all farm productions, including additions to stock, etc., was $73,137,953. The wages paid amounted to $10,326,794. The principal products were: Spring wheat, 66,638 bush.; winter wheat, 207,841 bush.; rye, 14,852 bush.; Indian-corn, 15,637,316 bush.; oats, 414,586 bush.; Irish pot's, 214,189 bush.; sweet pot's, 1,743,432 bush.; cotton, 564,938 bales; wool, 288,285 lbs.; rice 374,627 lbs.; tobacco, 61,012 lbs.; butter, 2,613,521 lbs.; hay, 8,324 tons; cane sugar, 49 hhds.; cane molasses, 152,164 galls., and sorghum molasses 67,509 galls.

The value of all live stock was $20,940,238, and comprised 90,221 horses, 85,886 mules and asses, 173,899 milch cows, 58,156 working oxen, 269,030 other cattle, 232,732 sheep and 813,381 swine.

Manufactures.—Miss. has but few manufactures and these mostly embrace the ordinary and simple branches of mechanical industry, such as building, blacksmithing, tanning, etc. The last census reports 1,731 establishments, employing 384 steam-engines of 10,019 horsepower, 225 water-wheels of 2,453 horse-power, and 5,941 operatives. The capital invested was $4,501,714, and the total value of products, $8,154,758. The wages paid were $1,547,428, and the materials consumed, $4,364,206.

The chief products of industry were sawed lumber of $2,160,667 in value, and flour and meal of $2,053,567 in value.

Commerce and Railroads.—Miss. has no direct commerce with foreign countries. The only three ports of entry or custom districts, Natchez, Pearl River and Vicksburgh, do not appear in the official tables of exports and imports. The total tonnage of the state, in 1871, was but 2,963. The domestic commerce is carried on by way of the Mississippi and other navigable streams, and the railroads, which had, in 1872, an aggregate length of 990 mls. The principal line is the Great Jackson Route, comprising the consolidated lines of the New Orleans, Jackson & Great Northern R. R., the Mississippi Central R. R., and the Mississippi & Tennessee R. R. It extends from New Orleans to Jackson, Tenn., and has a branch from Grenada to Memphis. The Mobile & Ohio R. R. intersects the eastern portion of the state, and the Vicksburgh & Meridian R. R. intersects the state from E. to W.

Education.—The total school population, in 1870, was 304,762, of whom only 98,600 were enrolled in the public schools. The number of schools was 3,450, and of school teachers, 3,520. An earnest beginning has been made to introduce a complete system of public schools; but the lack of funds has thus far been a serious hindrance.

The State Normal School is located at Holly Springs, and admits none but those intending to become teachers. Tougaloo University, situated 7 mls. N. of Jackson, is in successful operation under the management of the American Missionary Association. The College at Pass Christian, Harrison co., was organized in 1866, and includes a preparatory, collegiate and commercial department. Mississippi College, at Clinton, Hinds co., commenced in 1868 with 2 college and 9 preparatory students, but is now attended by 150. It has been adopted by the Baptists of Arkansas as their state institution.

The University of Mississippi is located at Oxford, La Fayette co., and comprises three general departments; a department of preparatory education, a department of science, literature and the arts, and a department of professional education. The legislature, on the recommendation of the Governor, has appropriated the sum of $50,000 per annum for ten years.

The State Institution for the Education of the Blind, the Lunatic Asylum, and the State Penitentiary, are at Jackson.

The Press of Miss. comprised, in 1870, 111 newspapers and periodicals, with a total circulation of 71,868. Only 3 were dailies, 92 were weeklies, 2 semi-monthlies and 5 monthlies.

Wealth and Taxation.—In 1870 the total assessed valuation was $177,278,890, of which $118,278,460 represented real estate and $59,000,430 personal estate. The true or estimated value for both kinds of property was $209,197,345, against $507,324,911 in 1860. The great decrease was chiefly due to the abolition of slavery.

The state taxes amounted to $1,309,655, the county taxes to $2,299,699, and the township, city, etc., taxes to $127,078, making a total taxation of $3,736,432.

Government.—The region now comprised in Miss. was first visited in 1540 by De Soto, a Spanish soldier of fortune. The settlement at Fort Rosalie (now Natchez), in 1716, by a party of Frenchmen under Bienville, was the first permanent colony. At the peace of Paris, in 1763, Miss. became part of the English territory. In 1798 Miss., including Ala., was erected into a territory, and in 1817 was admitted as a state into the Union.

The present constitution, adopted by the convention in 1868, provides that all male inhabitants who are citizens of the United States, twenty-one years of age and over, who have resided in the state 6 months, and in the county one month next preceding the day of election, are qualified electors.

The House of Representatives consists of 107

members, chosen every second year by the qualified electors. The Senate consists of 33 members chosen ever four years.

The Governor and Lieutenant-Governor are elected by the qualified electors, and hold their offices for four years. They must be at least 30 years of age, must have been citizens of the United States 20 years, and must have resided in the state 2 years next preceding the day of election. The Secretary of State, Attorney-General, Treasurer and Auditor of Public Accounts are also elected for 4 years, and must at least be 25 years of age. A sheriff, coroner, treasurer, assessor and surveyor are elected in each county for 2 years.

The judicial power is vested in a Supreme Court, consisting of three judges, who are appointed by the Governor, by and with the advice of the Senate, for 9 years. The judges of the Circuit Court are appointed for 6 years, and those of Chancery Courts for 4 years.

Mississippi is divided into the following 72 counties: Adams, Alcorn, Amite, Attala, Benton, Bolivar, Calhoun, Carroll, Chickasaw, Choctaw, Claiborne, Clark, Coahoma, Colfax, Copiah, Covington, De Soto, Franklin, Greene, Grenada, Hancock, Harrison, Hinds, Holmes, Issaquena, Itawamba, Jackson, Jasper, Jefferson, Jones, Kemper, La Fayette, Lauderdale, Lawrence, Leake, Lee, Le Flore, Lincoln, Lowndes, Madison, Marion, Marshall, Monroe, Montgomery, Neshoba, Newton, Noxubee, Octibbeha, Panola, Perry, Pike, Pontotoc, Prentiss, Rankin, Scott, Simpson, Smith, Sunflower, Tacaleeche, Tallahatchee, Tate, Tippah, Tishomingo, Tunica, Union, Warren, Washington, Wayne, Wilkinson, Winston, Yallabusha, Yazoo.

Jackson, 4,234 inhabitants, is the state capital, and the following are the largest cities: Grenada, 1,887 inhabitants; Columbus, 4,812; Holly Springs, 2,406; Vicksburgh, 12,443; Natchez, 9,057.

Mississippi, co., in Ark., N. W. part. Area about 1,000 sq. mls. Pop., 3,633; in 1860, 3,895. It is bounded on the E. by the Mississippi R. and on the W. by the St. Francis R. The surface is low and level. Extensive swamps and lakes occupy parts of the co. The cultivable tracts are of great fertility. Osceola is the co. seat. Agr. productions in 1870: Indian-corn, 120,700 bush.; Irish pot's, 7,416 bush.; sweet pot's 3,780 bush.; cotton, 3,587 bales. Cash value of farms, $477,166. Total, estimated, value of all farm productions, including additions to stock, etc., $434,210. Value of manufactures, $13,500.

Mississippi, tn. in Columbia co., Ark. Pop., 829.

Mississippi, tn. in Desha co., Ark. Pop., 1,600.

Mississippi, tn. in Sebastian co., Ark. Pop., 530.

Mississippi, tn. in Sacramento co., Cal. Pop., 171.

Mississippi City, p. v. and the co. seat of Harrison co., Miss., on the Mississippi Sound and the New Orleans, Mobile & Texas R. R., 70 mls. W. of Mobile and 70 mls. E. of New Orleans. Pop., 252.

Mississippi, co. in Mo., S. E. part. Pop., 4,382; in 1860, 4,859. It borders on the Mississippi R., which separates it from Illinois and Kentucky, and belongs to the New Madrid swamp region, being partly occupied by lagoons and marshes. A levee 30 mls. long on the Mississippi protects the bottom-land, which is very productive, from inundation. It is believed that the whole co. could be drained with but little expense. The St. Louis & Iron Mountain R. R. intersects it. Charleston is the co. seat. Agr. productions in 1870: Wheat, 5,225 bush.; Indian-corn, 491,990 bush.; oats, 4,593 bush.; Irish pot's, 9,625 bush.; sweet pot's, 1,302 bush.; butter, 1,480 lbs.; tobacco, 6,160 lbs.; hay, 97 tons. Cash value of farms, $630,718. Total, estimated, value of all farm productions, including additions to stock, etc., $406,725.

Mississippi, tn. in the above co. Pop., 357.

Mississippi River, the principal stream in the North American continent, and, with its tributary the Missouri R., the longest in the world, drains the greater part of the United States. It rises in Lake Itasca (in lat. 47° 14′ N., and in long. 95° 2′ W. of Greenwich), which is situated in the "Hauteurs des Terres," or "Height of Lands," 1,575 feet above the sea level. This lake is a beautiful sheet of transparent water, about 7 mls. long and from 1 to 3 mls. wide. One of the five small creeks that fall into it, coming from the W., is distinguished from the others by its more abundant waters and greater length, and in obedience to a well recognized geographical law, must be considered the true source of the Mississippi. (This source is 1,680 feet above the sea.)

On leaving Lake Itasca the stream is about 12 feet wide and from 12 to 18 inches deep. For the first 25 mls. the river forms a series of strong rapids, and 15 mls. further E. it enters Cass Lake, a sheet of about 120 sq. mls. in area. Out of this the Mississippi flows with a width of 175 feet and a depth of 8 feet, and then traverses the Upper and Little Winnipec lakes. Below the latter the course is very winding, but has a general S. E. direction, gradually curving S. W. to Fort Ripley, where it is joined by the Crow Wing R. Four miles below the mouth of Elk R. the Mississippi forces its way through a narrow defile of rocks, forming the Little Falls. The Big Falls, further down the stream, consist of a series of brakes and chutes extending about 800 yards.

At Minneapolis are the Falls of St. Anthony, where the river makes a perpendicular pitch of 40 feet, with rapids above and below of additional 25 feet of fall. About 55 mls. below the mouth of the Minnesota R. the Mississippi expands into Lake Pepin, which is from 2 to 3 mls. wide and 27 mls. long. About 270 mls. farther down are the Rock River Rapids, where the river falls 22 feet in a distance of about 13 mls.; and 115 mls. further on are the Des Moines Rapids, 11 mls. long, with a fall at low water of 21 feet.

From Lake Pepin to the junction of the Missouri the Mississippi ramifies in numberless branches or "sloughs," inclosing wooded islands.

Below this junction the Mississippi is a turbid and boiling current, of immense volume and force, its waters destroying banks and islands at one locality and reconstructing them at another. It absorbs tributary after tributary, without visible increase of size. From the mouth of the Missouri to the town of Commerce, Scott co., Mo., the western bank of the Mississippi is mainly composed of high limestone and clay bluffs, which are interrupted near Cape Girardeau by a strip of lowland, serving as an inlet to the St. Francois Bottom. The left bank of the stream, from the mouth of the Missouri to the mouth of the Kaskaskia, consists of the "American Bottom," a strip of low land which is subject to overflow in the highest floods. Thence to Commerce the banks are formed by bluffs like those on the opposite side, which, however, frequently assume the most fantastic shapes. From the mouth of the Ohio the river flows through its great alluvial flood-ground. This region varies in width from 22 to 73 mls., lies mainly below the level of its flood, and is bordered in the E. and W. by a line of bluffs, to the base of which the river approaches in many places. At Columbus, Ky., it first strikes high land, which is 200 feet above high water, and then at Hickman, Ky.; then follow the four Chickasaw Bluffs in Tenn., the second at Randolph and the fourth at Memphis. At

Vicksburgh the river again approaches the bluffs on its eastern bank, and then successively 8 mls. above Natchez, at Ft. Adams, Bayou Sara, Port Hudson, and lastly at Baton Rouge, below which point the banks are uniformly below the high-water level.

From the mouth of the Red R. to the Gulf of Mexico the Mississippi traverses the Delta, a region of 12,300 sq. mls. in area, consisting partly of alluvial lands lying above the sea level and partly of sea marsh. It contains several lakes—as Lake Pontchartrain, Lake Maurepas, Grand Lake, Lake Verret, Washa Lake, Lake Fields, Lake Quitman, etc., and is traversed by many bayous, three of which, the Atchafalaya, Plaquemine and La Fourche are connected with the Mississippi. The river has five mouths, called passes, viz.: the Southwest Pass, the South Pass, the Southeast Pass, the Northeast Pass and the Pass a l'Outre.

The length of the upper Mississippi, from its source to its junction with the Missouri R., is, according to Capt. A. A. Humphrey's report, 1,330 mls.; and of the lower Mississippi, from said junction to the mouth, 1,286 mls., making a total for the great stream of 2,616 mls. The lower course is navigable at all times by the largest boats. In the upper course navigation is rendered difficult during the lowest stages of water by the bars and rapids, but is usually open to the Falls of St. Anthony, at Minneapolis, Minn. The following table shows the height of the river at various points, and its fall per mile:

	Distances from mouth.	Height above the sea.	Fall per mile.
Extreme source	2,616 mls.	1,680 ft.	
Lake Itasca	2,610 "	1,575 "	17.50 ft.
M'th of Crow Wing R.	2,101 "	1,130 "	0.87 "
St. Paul	1,944 "	670 "	2.92 "
Prairie du Chien	1,739 "	600 "	0.34 "
M'th of Missouri R.	1,286 "	416 "	0.40 "
Cairo	1,097 "	322 "	0.49 "
Memphis	872 "	221 "	0.45 "
Baton Rouge	245 "	34 "	0.29 "
Gulf of Mexico	0 "	0 "	0.23 "

The Mississippi R., with its numerous tributaries, drains an area of 1,244,000 sq. mls. Its average depth below the mouth of the Ohio R. varies from 90 to 120 ft., and its average velocity of current at New Orleans is from 34 to 35 mls. per day, or about 2 ft. per second. The average amount of water it discharges into the Gulf of Mexico is 675,000 cubic ft. per second, and the approximate quantity of earthy matter 237,795 tons per day.

Owing to the vast drainage area, the river shows great differences between high and low water, and frequently rises so high as to inundate the bottom-lands along its banks. The rise is produced by heavy rain-falls over large portions of its basin, or by the melting of the snow in the northern parts of the same, and hence cannot be predicted with any certainty. In 1858 four great rises took place at the head of the alluvial region (above the mouth of the Ohio). The first, caused mainly by a flood in the Ohio, ocurred in December, 1857. It filled the Mississippi R. to the top of the banks, and the maximum discharge at Columbus was 1,190,000 cubic ft. per second. The second rise occurred in March and April, 1858, and was caused by the swelling of the lower tributaries of the Missouri R. and the Upper Mississippi R. The third great rise was caused by heavy rains which swelled the lower tributaries of the Missouri R., of the Ohio and the upper Mississippi R. The fourth and greatest rise occurred in June, and was produced by heavy rains during May, in the Ohio valley, and the usual June rise of the Missouri, by the melting of snow in the Rocky Mts. The stream overflowed its banks, covered the swamps above Columbus, inundated the city of Cairo, and poured rapidly into the bottom-lands of the St. Francis R.

In order to protect the alluvial region from inundations, embankments, called "levees," have been raised from five to ten feet on both sides of the Mississippi and some of its lower tributaries.

Mississippi Sound, extending along the coast of Miss. and Ala., is separated from the Gulf of Mexico by a chain of low islands, as Cat Island, Ship Island, Horn Island, Petit Bois Island and Dauphin Island.

Missisquoi River, in Franklin co., Vt., flows W. and empties into Lake Champlain.

Missoula, co. in Mont. Ter., forming the N. W. corner of the territory. Pop., 2,554. It borders in the N. on British America and in the W. on Idaho Ter. The Rocky Mts. occupy the eastern part, the Coeur d'Allene Mts. the western, and the Bitter Root Mts. trend along the S. W. boundary. The Flat Head R., which is formed by three forks, flows to the S. along the western base of the Rocky Mts. Near the 48th parallel it expands into the beautiful Flat Head Lake, and below this it describes a curve, flowing first S., then W., and near the 115th meridian it is joined by the Missoula R. to form Clark's Fork of the Columbia. The Missoula R. is formed by the confluence of the Big Blackfoot and Hell Gate Rs., and below receives the Bitter Root R. The north-western corner of the co. is intersected by the Kootenay R. The region between the Flat Head R. and Clark's Fork is traversed by a range of rugged hills, which are covered down to the base with dense pine forests. Missoula is the co. seat. Agr. productions in 1870: Wheat, 32,436 bush.; oats, 15,836 bush.; Indian-corn, 250 bush.; Irish pot's, 12,152 bush.; butter, 12,925 lbs.; hay, 956 tons. Cash value of farms, $96,520. Total, estimated, value of all farm productions, including additions to stock, etc., $140,195. Value of manufactures, $215,400.

***Missoula,** p. v. in the above co. and the co. seat, on Clark's R., 128 mls. W. of Helena, and in the midst of one of the most productive mining regions of the territory. Pop. about 600. One newspaper.

MISSOURI lies W. of the Mississippi R., which separates it from Ill., Ky. and Tenn., while the Missouri R. forms part of the western boundary. In the N. it borders on Iowa; in the W. on Nebr., Kans., and Indian Ter., and in the S. on Ark. It has an area of 65,350 sq. mls., or 40,824,000 acres, and lies between 36° 30′ and 40° 30′ N. lat., and 89° 2′ and 95° 51′ W. long.

Surface.—The Missouri R., which intersects the state from W. to E., divides it into two distinct portions. The northern portion resembles Iowa in structure, consists of rolling prairies, which are intersected by the deeply eroded valleys of the streams, and has a general slope from N. W. to S. E. These valleys are generally well timbered with deciduous forests, while the uplands support a prairie vegetation of grasses and herbacious plants. The southern portion of the state is larger than the northern and presents a far greater variety of surface. The south-eastern extremity is occupied by the Great Swamp, the product of the terrible earthquakes of 1811 and 1812, which buried the town of New Madrid and others in the floods of the Mississippi, and was followed by a general subsidence of the ground. Four natural subdivisions of the Great Swamp may be distinguished, locally known as the St. Francis, the St. John's, the St. James, and the White Water, or Little River, Swamps. At some future time they will doubtless be reclaimed; but thus far they have defied all attempts at settlement. A line of "bluffs," consisting in several places of precipitous limestone rocks, bounds the Great Swamp on the W., and terminates on the Mis-

sissippi, near St. Genevieve, in picturesque hills 360 feet above the R. bank.

These bluffs form the margin of an extremely rough and broken territory, which occupies the greater part of southern Mo., and gradually sinks down to the valleys of the Osage and Missouri Rs. The hills are quite irregular, and rarely assume the form of distinct ranges, except in the S. W., where they attain their greatest elevation in the Ozark Mts., which traverse in compact ridges the N. W. corner of Ark. and a large portion of Indian Ter. The Iron Mts. also appear as a continuous range, which trends from a point 60 mls. below the mouth of the Missouri R., in a S. W. direction, and attains, in Pilot Knob, an elevation of 1,490 feet above the sea. The portion of the state which lies W. of the Ozark Region and lower course of the Osage R. consists of rolling prairies, and, like north Mo., is deeply furrowed by the forest-clad valleys of the streams.

Rivers.—The principal rivers of Mo. are the Mississippi, which washes the entire eastern boundary, a distance of 470 mls., and the Missouri, which for 200 mls. forms the western boundary and from the point where it receives the Kansas R. flows eastwardly across the state, joining the Mississippi 15 mls. N. of the city of St. Louis. The tributaries which empty direct into the Mississippi N. of the Missouri R. are the Little Fork R., the Wyaconda R., the Fabius R., formed by the North, Middle and South forks, and emptying opposite Quincy, Ill., the Salt R., the Cuivre or Copper R., Peruque Cr. and Bardenne Cr. The Maramec R. is the only stream of importance which joins the Mississippi in this state S. of the Missouri. It rises in the Ozark Mts. and receives Bourbeuse and Negro Crs. The White R. belongs to Ark., and with its most northerly curve only to Mo. Its tributaries drain the south-eastern portion of the state and join the White R. beyond its southern boundary. They are the North Fork, Eleven Point R., Current R. and Black R. The St. Francis R. and Little R. traverse the Great Swamp, and in Ark. unite with the Mississippi.

The Missouri R. receives numerous tributaries in the state and drains the greater part of its area. Its northern affluents rise in Iowa and have a southerly course, as the Nishnabotany R., Nodaway R., Platte R., Grand R. (formed by several forks and joined by Big R., Thomas Fork, Medicine Cr.), Yellow Cr., Charitan R., Rocher Perce R. and Cedar R. The southern affluents of the Missouri are Lamine R., Osage R. (which rises in Kans. and receives the Little Osage R.), Sac R., Grand R., Pomme de Terre R., Big Niangua R., Auglaize R. and Maries Cr., and lastly the Gasconade R., which rises in the Ozark Mts. and receives Robideaux Cr. and Piney Fork.

Climate and Vegetation.—The climate of Mo. is subject to great extremes. The summers are long and hot, and the winters so cold that the rivers are usually bridged over with ice strong enough for the heaviest loads. Mo. is a healthy state and particularly favorable to persons afflicted with pulmonary diseases.

Near St. Louis the mean annual temperature is 55.50°, and the mean temperature of the seasons as follows: Spring, 56.15°; summer, 76.20°; fall, 55.50°, and winter, 33.85°.

The surface of Mo. is favorably divided between prairie and timber land. In the northern and western portions of the state prairies predominate, and the forests, chiefly of deciduous trees, are limited to the rich bottom-lands of the streams. Southern Mo. is abundantly supplied with timber. The Ozark Mts. are throughout covered with woods comprising oaks, elms, limes, sycamores, ailanthus, maples, willows, hickory and other nut-bearing trees, chestnuts, catalpas, tulip trees, poplars, cypress, pines and paw-paws, with an undergrowth of wild grapes, flowering shrubs and a great variety of climbers and creepers.

The animal kingdom is represented by several species of deer, raccoons, squirrels, foxes, and in the mountains by bears, wild cats and panthers. Wild pigeons and turkeys, quails and prairie hens are very abundant; eagles, falcons and owls prey on the smaller birds, field mice and moles, and the larger streams and swamps are animated with immense flocks of wild geese and ducks, herons, swans and divers. Nor does Mo. lack snakes, lizards, frogs and turtles.

Population.—In 1810 Mo. had 20,845 inhabitants; in 1820, 66,557; in 1830, 140,455; in 1840, 383,702; in 1850, 682,044; in 1860, 1,182,012, and in 1870, 1,721,295. Of this last number 1,603,146 were whites, 118,071 colored persons, and 75 Indians.

In regard to nativity the population comprised the following: Born in the United States, 1,499,028, inclusive of 788,491 natives of the state, 10,963 of Ark., 2,070 of Conn., 3,843 of Ga., 72,623 of Ill., 51,303 of Ind., 22,436 of Iowa, 4,933 of Kans., 102,861 of Ky., 4,045 of La., 2,316 of Me., 7,619 of Md., 5,731 of Mass., 4,570 of Mich., 3,484 of Miss., 1,235 of Nebr., 1,384 of N. H., 3,200 of N. J., 31,805 of N. Y., 76,062 of Ohio, 35,384 of Pa., 2,851 of S. C., 70,212 of Tenn., 3,386 of Tex., 2,961 of Vt., 61,305 of Va. and W. Va. and 6,282 of Wis. The foreign-born population numbered 222,267, of whom 8,448 were natives of British America, 6,293 of France, 113,618 of Germany, 14,313 of England, 54,983 of Ireland, 3,283 of Scotland, 1,524 of Wales, 1,167 of Holland and 2,599 of Sweden and Norway.

The total population of 10 years and over numbered 1,205,568, and of these there were engaged in agriculture 263,918; in professional and personal services, 106,903; in trade and transportation, 54,885, and in manufactures, mining and mechanical trades, 79,850, making an aggregate of 505,556 persons engaged in all classes of occupations.

Minerals and Mining.—The mineral wealth of Mo. is as great as that of any equal area on the globe, and its productions are distinguished not only for their immense quantity, but also for their excellence and purity. The coal deposits of northern Mo. are a portion of the great Iowa field, and within the limits of the state measure 62,887 sq. mls. Prof. G. C. Swallow, the state geologist, estimates the amount of available coal at 134,435 billions of tons. The smaller coal areas in other parts of the state, compared with this vast amount, are but of local importance. The iron deposits of Mo. are perhaps surpassed in extent by those of Mich. and Pa.; but in neither of those states are such vast quantities of almost pure metal so near the surface or even upon it as here. Iron Mt., in St. Francois co., is 228 feet high, covers an area of 500 acres, and its contents, of the finest ore, have been estimated at 16,555 millions of cubic feet, or 230,187,075 tons. Pilot Knob, in Iron co., is 581 ft. high (or 1,490 ft. above the sea), and covers an area of 360 acres. Magnetic iron, interspersed with specular iron, is found in immense quantities on Mt. Shepperd, near Pilot Knob. Lead is, next to coal and iron, the most important mineral production of Mo. Prof. Swallow distinguishes four lead regions: the eastern, comprising an area of 5,000 sq. mls. in the cos. of Washington, Franklin, Jefferson, Crawford, Dent, Madison, St. Francois and St. Genevieve; the south-western, 200 sq. mls. large, in Jasper and Newton cos., with the Granby mines; the southern, 100 sq. mls. large, in Taney and Christian cos., and the Osage lead region, comprising 1,000 sq. mls. in the cos. of Cole, Moniteau, Morgan, Benton, Camden and Miller. The La Motte mines, in Madison co., and discovered in 1720, yielded, in 1870, 1,200,000 lbs. The Granby mines have been worked nearly 20 years. Zinc, which is rather rare in the United States, occurs abundantly in this state, and in 1872 eleven furnaces were en-

gaged in reducing the ore. Copper was formerly mined, but for the last few years Mo. produces none, though the rich deposits in Dent, Crawford and other cos. would pay handsomely, if rationally worked. Cobalt, nickel, manganese and small quantities of gold and silver have been found. Various kinds of limestone, marble and granite abundantly supply the demand for building materials.

Agriculture.—The soil of Mo. is remarkable for variety and fertility. The prairies throughout the state are covered with a thick layer of highly productive loam, and the deep alluvial bottom-lands produce large crops of all cereals and fruits grown in the Temperate Zone. In the Ozark Mountain region there are limited areas of unproductive hills, easily distinguished by the settler, as they are generally covered with forests of the yellow pine, thriving well in their sandy soil.

According to the census there were, in 1870, 9,130,615 acres of improved land, 8,965,229 acres of wood land, and 3,611,376 acres of other unimproved land. The cash value of farms was $392,908,047; of farm implements, $15,596,426; of farm productions, including additions to stock, $103,035,759, and of orchard products, $2,617,463.

The productions were as follows: Spring wheat, 1,093,905 bush.; winter wheat, 13,222,021 bush.; rye, 559,532 bush.; Indian-corn, 66,034,075 bush.; oats, 16,578,313 bush.; barley, 269,240 bush.; Irish pot's, 4,238,361 bush.; sweet pot's, 241,253 bush.; tobacco, 12,321,483 lbs.; wool, 3,649,390 lbs.; cotton, 1,246 bales; butter, 14,455,825 lbs.; cheese, 204,090 lbs.; hay, 615,611 tons; sorghum molasses, 1,730,171 gallons, and wine, 326,173 gallons.

The Agricultural Department computes the crops for 1871 as follows: Indian-corn, 87,390,000 bush.; wheat, 12,825,000 bush.; rye, 508,000 bush.; oats, 13,812,000 bush.; barley, 270,000 bush.; potatoes, 3,410,000 bush.; tobacco, 13,138 lbs., and hay, 542,000 tons. The total value of live stock was, in 1870, $84,285,273, and comprised 493,969 horses, 111,502 asses and mules, 398,515 milch cows, 65,825 working oxen, 689,355 other cattle, 1,352,001 sheep, and 2,306,430 swine. The value of animals slaughtered was $23,626,784.

Manufactures.—The number of manufacturing establishments, in 1870, was 11,879, which employed 1,638 steam-engines, with 48,418 horse-power and 65,354 hands. The total value of products was $206,213,429; the capital invested in manufacturing, $30,257,244, and the wages paid, $31,055,445.

Nine iron furnaces turned out products of $2,991,613 value; one bloomery of $140,000; two rolling mills of $1,455,000; one nail factory of $294,000; thirty-one lead furnaces of $642,831; one bar and sheet-lead factory of $650,000; 531 wagon shops of $3,253,734, and five car factories of $2,200,150. The value of flour and meal was $31,837,352; of men's clothing, $7,271,962; of boots and shoes, $4,099,552; of agricultural implements, $1,588,108; of furniture, $3,303,024; of brass, produced in 10 foundries, $292,500; of stoves and hollowware, $2,981,350; of malt liquor, $6,519,548; of sawed lumber, $6,363,112; of planed lumber, $857,340, and of steam-engines and boilers, $3,825,100.

The pork packed in 23 establishments had a value of $4,135,250; and the goods made in 390 saddle and harness shops of $5,424,635. Sixty-five factories turned out $8,356,511 worth of chewing and other tobacco, and 318 factories $2,059,093 worth of cigars.

Commerce.—Mo. has great natural facilities for commercial intercourse. The Mississippi and Missouri Rs. are navigable far beyond the limits of the state, and at all seasons afford steam boat communication with the great commercial cities of the interior and with New Orleans, while the larger tributaries of these streams are navigable fo short distances above their mouths.

The railroad system of the state is of recent date, but has been perfected with the greatest energy. In 1853 the railroad mileage was but 53; in 1856, 144; in 1858, 547; in 1862, 838; and in 1872, 2,783. New lines are in course of construction. The following are the principal lines in operation: Atlantic & Pacific R. R. (331 mls.), within the state, from Pacific, 37 mls. W. of St. Louis, to Vinita, Indian Ter.; the Burlington & Southwestern R. R., from Iowa state line to Laclede, Linn co. (65 mls.); the Louisiana Branch of the Chicago & Alton R. R. (100 mls.); the Southwestern Branch and the Winthrop Branch of the Chicago, Rock Island & Pacific R. R. (168 mls.); the Hannibal & Central Missouri R. R., from Hannibal to Moberly (71 mls.); the Hannibal & St. Joseph R. R. (206 mls.); with a branch to Kansas City (53 mls.); and another from Palmyra to Quincy (15 mls.); the Kansas City, St. Joseph & Council Bluffs R. R. (148 mls.), with the Maryville Branch (63 mls.); the Missouri, Kansas & Texas R. R. (141 mls.); the Pacific R. R. of Missouri with four branches (393 mls.); the Quincy, Missouri & Pacific R. R., from West Quincy to Kirksville (70 mls.); the St. Louis & Iron Mt. R. R. (196 mls.), with the Arkansas Branch (101 mls.), and the Potosi Branch (4 mls.); and the St. Louis, Kansas City & Northern R. R., with four branches (541 mls.).

Wealth, Taxation and Debt.—The value of property, real and personal, was assessed in 1871 at $575,129,969; but amounted in reality to $1,284,922,897. The taxes, except for school purposes, are fixed at 50 cts. on $100. The total receipts from Jan. 1 to Oct. 31, 1871, were $3,572,941, and the expenditures $2,725,759; leaving a cash balance in the treasury of $847,182. The financial condition of the state, in the words of the Governor's Message of 1872, was not without its difficulties; but by no means discouraging. The funded state indebtedness in 1870 amounted to $17,865,000, and the debts of counties, cities and townships to $29,643,965, of which $26,017,619, incurred in assisting railroads and other improvements, were secured by bonds.

Education.—Mo. provides with generous liberality for its schools and institutions of learning. In 1872 there were 634,443 persons between the ages of 5 and 21 years. Of these, 330,070 were enrolled in the public schools, which numbered 6,842 against 5,418 in the preceding year. The number of school-houses was 6,387; of teachers, 8,816, who received an aggregate of $887,019 for salaries. For buildings and other school purposes were expended $862,030. The average cost incurred by the state for each child enjoying school privileges was $11.27.

The higher educational institutions of the state were the State University, at Columbia, with which an agricultural college is connected; the Mining School, at Rolla; three Normal Schools, at St. Louis, Kirksville and Warrensburgh; the Lincoln Institute, at Jefferson city, a seminary for colored teachers; 19 colleges, 33 seminaries and 92 high-schools. All state educational institutions are strictly nonsectarian.

There were also numerous establishments not controlled by the state, the most prominent of which is the Washington University, at St. Louis, with an endowment of $700,000. The following institutions are controlled by Roman Catholics: St. Vincent's Seminary, at Cape Girardeau; St. Louis University, at St. Louis; Stanislaus Seminary, at Florissant; the colleges at St. Louis and Hannibal; the College of Christian Brothers, at St. Louis. They also have 9 female schools, 23 parochial schools and 50 elementary schools. The Lutheran institutions are the Concordia Seminary and an academy at St. Louis, a higher female school at St. Joseph, and about 50 parochial schools.

Charitable and Penal Institutions.—The institution for the education of the blind, at St. Louis, was established in 1851. At Fulton there is an asylum for the insane and an asylum for

the deaf and dumb. The State Penitentiary, located at Jefferson City, is nearly self-supporting. The number of prisoners during 1871 varied from 750 to 850.

Government.—A new constitution was adopted by a convention in April, 1865, and ratified by the people in June; but has since then been modified by several amendments. The Governor, Lieutenant-Governor, Secretary of State, Treasurer, Auditor, Register of Lands, Attorney-General and Superintendent of Public Schools are elected for a term of two years, on the first Tuesday after the first Monday of November, in the even years, 1872, 1874, etc. The Senate comprises 34 members, elected for four years, one-half biennially. The House of Representatives consists of 138 members, who are chosen for two years at the general biennial election. The General Assembly meets annually in the month of January. The judicial power is vested in a Supreme Court, 29 Circuit Courts, Inferior Courts, County Courts and Justices of the Peace. The Supreme Court is composed of 5 justices elected for 10 years and has appellate jurisdiction. The judges of the circuit courts are elected for six years.

In 1872 Mo. was divided into the following 114 counties: Adair, Andrew, Atchison, Audrain, Barry, Barton, Bates, Benton, Bollinger, Boone, Buchanan, Butler, Caldwell, Callaway, Camden, Cape Girardeau, Carroll, Carter, Cass, Cedar, Chariton, Christian, Clarke, Clay, Clinton, Cole, Cooper, Crawford, Dade, Dallas, Daviess, De Kalb, Dent, Douglas, Dunklin, Franklin, Gasconade, Gentry, Greene, Grundy, Harrison, Henry, Hickory, Holt, Howard, Howell, Iron, Jackson, Jasper, Jefferson, Johnson, Knox, Laclede, La Fayette, Lawrence, Lewis, Lincoln, Linn, Livingston, Macon, Madison, Maries, Marion, McDonald, Mercer, Miller, Mississippi, Moniteau, Monroe, Montgomery, Morgan, New Madrid, Newton, Nodaway, Oregon, Osage, Ozark, Pemiscot, Perry, Pettis, Phelps, Pike, Platte, Polk, Pulaski, Putnam, Ralls, Randolph, Ray, Reynolds, Ripley, Saline, Schuyler, Scotland, Scott, Shannon, Shelby, St. Charles, St. Clair, St. Genevieve, St. Francois, St. Louis, Stoddard, Stone, Sullivan, Taney, Texas, Vernon, Warren, Washington, Wayne, Webster, Worth and Wright.

Jefferson City, on the Missouri R., is the state capital; St. Louis, on the Mississippi R., the largest city and the commercial metropolis. The other incorporated cities, according to the census, are St. Joseph, Cape Girardeau, Independence, Kansas City, Westport, Macon, Hannibal, Louisiana, Chillicothe and St. Charles; the largest villages are Springfield, Sedalia, Lexington, Booneville, Warrensburgh, Mexico, Pleasant Hill, Canton and Columbia.

Missouri, tn. in Chariton co., Mo. Pop., 820.

Missouri River, the largest tributary of the Mississippi R.; is formed by three branches, the Jefferson, the Madison and the Gallatin Rs., which unite near Gallatin City, Mont. Ter. The Jefferson R. is formed by the Wisdom, or Bighole, R., the Beaverhead R. and the Stinking Water R., which rise in the main chain of the Rocky Mts. and unite in the northern part of Madison co., Mont. Ter. The Madison R. rises W. of the Yellow Stone Lake in Wyo. Ter., and flows through a fertile valley between two high mountain chains, and the Gallatin R. traverses a similar valley further to the E. From Gallatin City the Missouri R. flows N. between the Rocky Mts. on the W., and the Belt Mts. on the E., through a succession of mountain valleys and enormous canyons. The canyon near the 47th degree of latitude was called by Lewis and Clark, who first explored this region, the "Gate of the Mountains." For 5¾ mls. perpendicular rocks rise from the water's edge to the height of nearly 1,200 ft. The river, 350 yards in width, seems to have forced its channel down this solid mass. Its current here is very strong. About 35 mls. above Fort Benton the river pours over the "Great Falls," consisting of five principal cascades, varying in height from 6 to 76 ft. Up to the last and highest of these cascades the Missouri R. is navigable, a distance of 2,670 mls. above its mouth, and 3,956 mls. above the mouth of the Mississippi R., forming with the latter stream the longest natural water-route in the world.

About 25 mls. below Fort Benton the Missouri R. enters upon its easterly course, which it pursues along the 48th parallel as far as the 103d meridian. From this point it flows S. S. E. to 39° 18′, where it turns E., intersecting the state of Mo. to its confluence with the Mississippi R., 16 mls. above St. Louis.

From the Great Falls to the mouth of the Maria's R. the banks of the Missouri are from 100 to 160 feet in height. Below the Maria's R. they fall back with a gradual slope to the general prairie, and the R. flows with sweeping curves among beautiful islands. On reaching the Bear's Paw Mts. they are crowned with abrupt bluffs and detached pillars of partially cemented sand, capped with huge globes of sandstone. At the mouth of Judith R. the Missouri enters the Mauvaise Terres, or "Bad Lands," where not an island nor shrub is seen—nothing but huge bare pillars of mud, towering up as high as they can, and crowding each other for room. Below this repulsive region the banks become richer, and small bottoms, covered with fields of rank grass or thick groves of cottonwood, cherry and willow accompany the stream.

Between the mouth of the Milk R. and the mouth of the Yellow Stone the Missouri is a wide, turgid stream, with an ever-changing channel, and choaked with sand-bars, its great volume of water, however, securing a navigable channel on one side or the other. Below the mouth of the Yellow Stone the R. has generally a uniform width, varying from ½ to ½ a mle. when the banks are full, and is accompanied by bottom-lands increasing in width and fertility as we proceed downward. The Missouri drains an area of 518,000 sq. mls., and in the mean discharges 120,000 cubic feet of water per second. The range between low and high water at Fort Benton is 6 feet; at St. Joseph, 20 feet, and at the mouth, 35 feet.

Mitchel, tn. in Cross co., Ark. Pop., 670.

Mitchell, co. in Ga., S. W. part. Area about 475 sq. mls. Pop., 6,633; in 1860, 4,308. The surface is level and the soil productive. The Flint R. forms the western boundary and receives Pond Cr. The south-western part of the co. is drained by several small affluents of the Ocklockony R. Camilla is the co. seat. Agr. productions in 1870: Wheat, 70 bush.; Indian-corn, 150,526 bush.; oats, 26,240 bush.; sweet pot's, 21,382 bush.; butter, 39,860 lbs.; cotton, 4,703 bales. Cash value of farms, $779,085. Total, estimated, value of all farm productions, including additions to stock, etc., $658,100. Value of manufactures, $11,406.

***Mitchell,** p. v. in Lawrence co., Ind., on the Ohio & Mississippi R. R., at its intersection with Louisville, New Albany & Chicago R. R., 127 mls. W. of Cincinnati and 60 mls. N. W. of New Albany. Engaged in produce trade. Pop., 1,087. One newspaper.

Mitchell, co. in Iowa, N. part. Area, 425 sq. mls. Pop., 9,582; in 1860, 3,409. The surface is rolling and the soil excellent. The co. is drained by the Red Cedar R. and its tributaries. The Cedar Falls & Minnesota R. R. intersect the co. Osage is the co. seat. Agr. productions in 1870: Wheat, 564,894 bush.; rye, 100 bush.; Indian-corn, 150,847 bush.; oats, 358,105 bush.; Irish pot's, 36,141 bush.; wool, 8,906 lbs.; butter, 194,060 lbs.; hay, 15,415. Cash value of farms, $2,165,450. Total, estimated, value of all farm productions, including additions to stock, etc., $537,995. Value of manufactures, $397,750.

Mitchell, tn. in Mitchell co., Iowa. Pop., 1,228.

***Mitchell,** p. v. m above tn., on Cedar Falls & Minnesota R. R., 3½ mls. N. W. of Osage.

Mitchell, co. in Kans., N. part. Area, 440 sq. mls. Pop., 485. The surface is undulating and consists chiefly of fertile prairies. Solomon R. intersects the co. from E. to W., and Salt Cr., a tributary of the same, flows through the S. W. corner. Beloit is the co. seat. Agr. productions in 1870: Wheat, 666 bush.; Indian-corn, 6,250 bush.; oats, 58 bush.; Irish pot's, 215. Cash value of farms, $98,250. Total, estimated, value of all farm productions, including additions to stock, etc., $5,131.

Mitchell, co. in N. C. Area about 530 sq. mls. Pop., 4,705. This co. is almost entirely surrounded by mountains. The Blue Ridge forms the south-eastern boundary and the Iron Mts. the north-western. It is drained by tributaries of the Nolechucky R. Bakersville is the co. seat. Agr. productions in 1870: Wheat, 12,530 bush.; rye, 6,065 bush.; Indian-corn, 72,860 bush.; oats, 21,311 bush.; Irish pot's, 8,483 bush.; sweet pot's, 527 bush.; butter, 35,760 lbs.; hay, 456 tons. Cash value of farms, $258,205. Total, estimated, value of all farm productions, including additions to stock, etc., $177,089.

***Moberly,** p. v. in Randolph co., Mo., at the junction of the northern division with the main line of the St. Louis, Kansas City & Northern R. R. and with the Hannibal & Moberly R. R., 38 mls. from Mexico. It has the machine and car shops of the railroad co. and other manufactories. Pop., 1,514.

Mobile, co. in Ala., S. W. part. Area about 1,200 sq. mls. Pop., 49,311; in 1860, 41,131. It is bordered on the W. by the state of Miss., on the E. by the Mobile R. and Mobile B., and on the S. by the Mississippi Sound. The western part is drained by the Escatawpa R., the eastern by the Chickasaw R. The surface is level and in some localities undulating; the soil is mostly sandy and but moderately productive. Large tracts are covered by pine forests. The Mobile & Ohio R. R. intersects the northern part of the co., the Mobile & New Orleans R. R. the southern. Mobile is the co. seat. Agr. productions in 1870: Indian-corn, 61,350 bush.; oats, 185 bush.; Irish pot's, 10,394 bush.; sweet pot's, 67,116 bush.; cotton, 317 bales; butter, 1,148 lbs.; hay, 961 tons. Cash value of farms, $548,730. Total, estimated, value of all farm productions, including additions to stock, etc., $393,777. Value of manufactures, $2,760,390.

***Mobile,** city, port of entry and co. seat of the above co., on the W. bank of the Mobile R., at its entrance into Mobile B.; is the terminus of the Mobile & Ohio R. R., the New Orleans, Mobile & Texas R. R. and of the Mobile & Montgomery R. R. It is 186 mls. by railroad and 330 mls. by the river S. W. of Montgomery, and 140 mls. E. of New Orleans. It was founded in 1699 by the French, was ceded to England in 1763, and surrendered by England to Spain in 1780, and by Spain to the United States in 1813. It was incorporated as a city in 1819, with a population of about 8,000. In 1850 the pop. was about 20,515: in 1860, 29,258, and in 1870, 32,034; of whom 18,115 were white and 13,919 colored. It is one of the principal cotton-marts in the Union, ships large quantities of this staple, notwithstanding the shallowness of the harbor and B., which prevents vessels drawing over eight feet from coming up to the wharves. In 1872 it imported foreign goods of $1,761,402 in value, and exported domestic goods, principally cotton, of $13,938,605 in value.

The city is pleasantly situated on a sandy plain, and has many fine residences, especially on Government street, the principal avenue. The most notable public buildings are the theater, the Municipal Buildings and the Market on Royal street. The United States Custom House, once the most costly edifice of the city, and the Court House, are now in ruins. Of the eight newspapers published in the city, but two issue daily editions, the "Mobile Register" and the "Mobile Tribune."

Mobile Bay, on the S. W. coast of Ala.; has a length of about 35 mls. and a width of from 8 to 15 mls. The main channel into the B. is between Dauphin Island and Mobile Point, the western extremity of a long and narrow peninsula which separates the eastern part of Mobile B., called Bonsecour B., from the Gulf of Mexico.

Mobile River, formed by the confluence of the Alabama and Tombigbee Rs. (See Alabama.)

Mono, co. in Cal., E. part. Pop., 430. It is bounded on the W. by the main ridge of the lofty Sierra Nevada and on the N. E. by the state of Nev., occupying a long and narrow strip of country which extends 150 mls. from N. W. to S. E. and about 50 mls. from S. W. to N. E. The E. part is traversed by the White Mts. and other chains, which are separated from the Sierra Nevada by the valleys of the Owens R. and Mono Lake. Several branches of Walker's R. rise in and traverse the N. part. Good arable lands extend along the rivers, but can be cultivated only by means of irrigation, as the climate is exceedingly dry. On the Sierra there is good pine and spruce timber, from which enough lumber is made to meet local requirements. The placer mines formerly yielded considerable amounts of gold. Bridgeport is the co. seat. Agr. productions in 1870: Wheat, 6,144 bush.; rye, 27 bush.; Indian-corn, 325 bush.; oats, 4,173 bush.; Irish pot's, 4,982 bush.; wool, 7,000 lbs.; butter, 35,685 lbs.; hay, 2,714 tons. Cash value of farms, $84,300. Total, estimated, value of all farm productions, including additions to stock, etc., $88,822. Value of manufactures, $74,625.
Monocacy, p. o. in Montgomery co., Md.
Monocacy, p. o. in Berks co., Pa., on the Schuylkill R. and Navigation Canal and near the Philadelphia & Reading R. R., 7 mls. W. of Pottsdam.
Monocacy River, a tributary of the Potomac R.; rises in Adams co., Pa., flows S. through Frederick co., Md., and empties near Monocacy at the W. corner of Montgomery co. It traverses a broken but fertile valley between Parr's and South Mts.
Monocacy Station, p. o. in Berks co., Pa., on the Schuylkill R., opposite Monocacy, and on the Philadelphia & Reading R. R.

Mono Lake, in Mono co., Cal.; lies E. of the main crest of the Sierra Nevada, and is 14 mls. from E. to W. and 9 mls. from N. to S. Its water is intensely bitter and saline, and has a high specific gravity, containing much salt, lime, borax and carbonate of soda. The lake contains a number of islands composed of volcanic materials, on one of which there are hundreds of fumaroles, emitting gas, steam and smoke. From its great depth and peculiar formation it is supposed to occupy the crater of an ancient volcano. There are now scattered about in the vicinity numerous cones and partial craters. It is entirely devoid of life, and Mono Lake has not inaptly been termed the "Dead Sea" of the Great Basin.

Monon, tn. in White co., Ind. Pop., 969.

Monon, p. o. in the v. of Bradford in the above tn., on the Louisville, New Albany & Chicago R. R.

Monona, co. in Iowa W. part. Area, 900 sq. mls. Pop., 3,654; in 1860, 832. It borders in the W. on the Missouri R., and is drained by the Sioux R. and Maple R. The surface is undulating and consists mostly of prairies. The Sioux City & Pacific R. R. intersects the western part of the co. from N. to S. Onawa City is the co. seat. Agr. productions in 1870: Wheat, 88,990 bush.; rye, 10 bush.; Indian-corn, 285,457 bush.; oats, 50,346 bush.; Irish pot's, 24,026 bush.; wool, 18,783 lbs.; butter, 85,611 lbs.; hay, 16,132 tons. Cash value of farms, $799,210. Total, estimated, value of all farm productions including additions to stock, etc., $355,905. Value of manufactures, $54,690.

Monona, tn. in Clayton co., Iowa., Pop., 1,656.

Monona, p. v. in the above tn., on the Iowa & Minnesota Division of the Milwaukee & St. Paul R. R., 15 mls. from McGregor.

Monongahela, tn. in Greene co., Pa. Pop., 1,424.

***Monongahela City,** p. bor. in Washington co., Pa., on the Monongahela R., 20 mls. S. of Pittsburgh; surrounded by a mining section; has numerous manufactories and an active trade. Pop., 1,078. Two newspapers.

Monongahela River, one of the branches of the Ohio R.; is formed by the Tygart's Valley R. and the West Fork, which unite 3 mls. above Fairmont, in Marion co., W. Va., and flowing in a northerly direction, unites at Pittsburgh, Pa., with the Alleghany R. to form the Ohio. The stream is about 175 mls. long, has a tortuous course, and is navigable to Brownsville, Pa., while smaller boats ascend as far as Fairmont. Its principal tributaries are Cheat R. and Youghiogheny R. The former rises in Randolph co., W. Va. and empties in Fayette co., Pa.; the latter rises in Garrett co., Md., and after flowing through a valley W. of the Alleghany Mts., breaks through Laurel Ridge and Chestnut Ridge, emptying near McKeesport.

Monongalia, co. in W. Va., N. part. Area about 450 sq. mls. Pop., 13,547; in 1860, 13,048. It borders on Pa. and is intersected from N. to S. by the Monongahela R., which drains it with numerous small affluents. The surface is rolling and the soil productive. Morgantown is the co. seat. Agr. productions in 1870: Wheat, 111,805 bush.; rye, 5,130 bush.; Indian-corn, 301,328 bush.; oats, 148,072 bush.; Irish pot's, 23,772 bush.; sweet pot's, 435 bush.; butter, 345,573 lbs.; hay, 12,030 tons. Cash value of farms, $4,724,358. Total, estimated, value of all farm productions, including additions to stock, etc., $1,141,914. Value of manufactures, $329,714.

Monroe, co. in Ala., S. W. part. Area about 1,000 sq. mls. Pop., 14,214; in 1860, 15,667. The Alabama R. forms the western boundary and receives Flat Cr., Brimstone Cr. and Little R. The surface is slightly undulating; the soil moderately productive. Monroeville is the co. seat. Agr. productions in 1870: Indian corn, 232,486 bush.; oats, 3,011 bush.; Irish pot's, 1,418 bush.; sweet pot's, 44,788 bush. butter, 45,037 lbs.; cotton, 6,172 bales. Cash value of farms, $768,867. Total, estimated, value of all farm productions, including additions to stock, etc., $921,752. Value of manufactures, $21,450.

Monroe, p. o. in Tuscaloosa co., Ala.

Monroe, co. in Ark., E. part. Area about 900 sq. mls. Pop., 8,336; in 1860, 5,657. The White R. partly forms the western boundary and partly intersects this county, and receives the Cache R. and Big Cr. The surface is level and low and in many portions covered with cypress swamps. A narrow strip bordering on White R. near Aberdeen is broken by hills a hundred feet high. The ridges exempt from overflowing are amongst the finest cotton lands in the state. The Memphis & Little Rock R. R. passes through the N. W. extremity. Clarendon is the co. seat. Agr. productions in 1870: Indian-corn, 184,358 bush.; oats, 396 bush.; Irish pot's, 1,208 bush.; sweet pot's, 8,205 bush.; cotton, 7,334 bales. Cash value of farms, $1,266,794. Total, estimated, value of all farm productions, including additions to stock, etc., $1,227,703. Value of manufactures, $77,307.

Monroe, tn. in Mississippi co., Ark. Pop., 1,133.

Mont Alto, p. v. in Franklin co., Pa., 10 mls. from Chambersburgh.
MONTANA, one of the western territories, is bounded on the N. by British America, on the W. by Idaho Ter., on the S. by Idaho and Wyo. Ters., and on the E. by Dak. Ter. It lies between 104° and 116° W. long. and 44° 26′ and 49° N. lat., embracing an area of 143,776 sq. mls. or 92,016,640 acres.

Surface.—The western part of the territory is occupied by the Rocky Mts., and many of their spurs and outliers; the eastern part belongs to the region of the "Great Plains," that vast and gently rolling table-land which extends along the eastern base of the Rocky Mts. throughout their entire length, and gradually sinks away toward the central valleys of the Mississippi and the Red River of the North. A line drawn from the intersection of the southern state line of Mont. with the 109th meridian, to the intersection of the northern with the 113th meridian, roughly marks the boundary between these two sections.

The principal range of the Rocky Mts. trends along the south-western boundary of the territory from the west line of Wyo. Ter. to the intersection of the parallel 45° 40′ N. lat. with the 114th meridian, where it bends suddenly eastward, and then from near the 112th meridian runs N. N. W. to the northern line of Mont. The Bitter Root Mts. branch off from the great easterly bend of the Rocky Mts., and together with the Coeur d'Allene Mts., further to the N., form the western boundary of the territory to the 48th parallel. Other ranges, as for instance the Snow Mts., a continuation of the Big Horn Mts. of Wyo. Ter., enter the southern part of Mont. This great mountain belt has an average width of from 175 to 200 mls., and includes the source streams of the Missouri R. and of Clark's Fork of the Columbia R. Although the ranges of Mont. are considerably lower than those of Wyo. and Colo. Ters., further S., they abound in grand and picturesque scenery. The highest pks. probably do not exceed 10,000 or 12,000 feet above the sea level; the passes often sink below 5,000 feet, and the valleys, deeply countersunk in the mountain flanks, average about 4,000 feet.

The eastern part of the territory has an elevation varying from about 4,000 feet, near the base of the Rocky Mts., to about 2,000 feet at the Dakota line. Some isolated mountain ranges rise in various localities and diversify the generally even or rolling surface. South of the Missouri R. are the Belt Mts., the Highwood Mts., the Judith Mts., etc. Between the Yellow Stone and Muscle Shoal Rs. are the Crazy Mts., and between the Missouri and Maria's Rs. the Bear's Paw and Little Rocky Mts.

Rivers and Lakes.—Mont. belongs to the drainage systems of the Missouri R. and the Columbia R. The culminating range of the Rocky Mts. is the water-shed, which divides them. Clark's Fork of the Columbia is formed by the confluence of the Missoula and Flat Head Rs.

The Flathead R. rises among the Rocky Mts. of British America, flows S. to its junction with the Jocko R., and then due W. for about 50 mls. Near the 48th parallel the stream expands into the beautiful Flathead Lake, about 30 mls. long and 10 mls. wide, which is surrounded by a belt of beautiful meadows. The principal tributaries are Maple R., Hotspring Cr. and Jocko R. The latter runs through a valley including about 50 sq. mls. of good arable land, which may easily be irrigated.

The Missoula R. is formed by the confluence of the Big Blackfoot R. and the Hell Gate R.; and receives Fishery Cr. and Regis Borgia R., which have their sources in the Bitter Root Mts. The Hell Gate R. is formed by the Deer Lodge R. and Little Blackfoot R., and receives Stony and Flint Crs. and Bitter Root R. Deer Lodge R. rises in the great bend of the Rocky Mts., near Deer Lodge Pass, and flows through a very beautiful and fertile valley, 450 sq. mls. of which can be irrigated and cultivated. The valley of the Bitter Root R. includes some of the finest agricultural land in Mont., probably exceeding 750 sq. mls. in area.

The source streams of the Missouri are Jeffer-

son, Madison and Gallatin Rs., which unite near Gallatin city. The largest of these is the Jefferson, which is formed by the confluence of the Wisdom or Big Hole R., Beaver Head R., and Stinking Water R. They drain the great horse-shoe bend formed by the principal chain of the Rocky Mts. in Beaver Head and Madison cos. Big Hole Prairie, on the banks of the river of the same name, about 50 mls. long and 16 mls. wide, is covered with nutritious grass and affords one of the best summer grazing fields of the territory.

Madison R., whose upper course is called Fire Hole R., rises in the region of hot springs and geysers near Yellow Stone Lake, which forms part of the National Park in Wyo. Ter. Gallatin R. is formed by the East and West Forks. Its valley is separated from that of the Yellow Stone by a spur of the Rocky Mts.

Below the junction of the three streams above named, the Missouri flows N. through a narrow but very fertile valley as far as St. Peter's Mission, where it changes its course to the N. E., skirting the northern base of the Belt and Highwood Mts. Here it forms the Great Falls, about 40 mls. above Fort Benton, the head of navigation. From the intersection of the 48th parallel with the 110th meridian, to the state line, the Missouri follows an easterly course. Its tributaries in Mont. are numerous. North Bowlder Cr., Prickly Bear Cr., Deerborn R., Teton R. and Marias R. rise in the principal chain of the Rocky Mts. Deep R. flows through a valley of the Belt Mts., which contains good farm and grazing land. Milk R., a large stream, rises in British America and joins the Missouri near long. 106° 15′. Judith and Muscle Shell Rs. rise in the Belt Mts.

The Yellow Stone R. is the outlet of the lake of the same name, which lies in the National Park, in Wyo., flows N., then turns N. E. and empties into the Missouri R. below Fort Union, near the eastern boundary of Mont. In length and size it is not inferior to the parent stream, and for small vessels it is navigable for 330 mls. Its largest tributaries, the Big Horn, Tongue and Powder Rs., rise in Wyo.

The Climate of Mont. is much warmer than that of the states further E. in the same latitude. The mean annual temperature of the eastern portion of the territory varies from 44° to 48° Fahr., and corresponds with that of southern Mass. and Conn., 6° of lat. further S. The mountainous portion is colder, on account of its greater elevation, but many of the sheltered valleys have so mild a climate that fruit and grain are successfully cultivated. At Fort Owen, on the Bitter Root R., 3,284 feet above the sea, the mean temperature of spring has been found to be 48°; of summer, 69.50°; of fall, 45.50°, and of winter, 24.75°, making a yearly mean of 46.75°. Observations made at Deer Lodge City, in an elevation of 4,768 feet, show the mean temperature of spring to be 41.50°; of summer, 63°; of fall, 43.16°; of winter, 20.50°, and of the year, 41.20°.

The great distance of the territory from the seaboard renders the climate very dry. The greater portion receives but 12 inches of moisture (rain and snow) during the year. The western mountain slopes, being exposed to the winds from the Pacific Ocean, receive 16 inches and somewhat over.

The mountains of Mont. are usually well timbered, but the woods consist almost exclusively of willow, poplar and coniferous trees (pine, fir, spruce, cedar and balsam). Hickory, oak or other hard woods have not yet been found in the territory.

Population.—Mont. was settled by emigrants from other states, and organized as a territory under an Act of Congress approved May 26, 1864.

According to the census report, the population in 1870 was 39,895, including 18,306 whites, 183 colored persons, 1,949 Chinese and 19,457 Indians, of whom all but 157 sustained tribal relations and led a nomadic life. The natives of the United States numbered 12,616, of whom 1,693 were born in the territory, 468 in Iowa, 528 in Ky., 333 in Me., 142 in Md., 1,305 in Mo., 296 in Mass., 218 in Mich., 101 in N. H., 118 in N. J., 1,683 in N. Y., 1,127 in Ohio, 911 in Pa., 185 in Vt., 375 in Va. and W. Va., 256 in Wis., and 185 in Utah. The foreign-born population numbered 7,979, including 1,172 natives of British America, 1,233 of Germany, 692 of England, 1,635 of Ireland and 141 of Sweeden.

The population of 10 years and over numbered 18,170, of whom 14,048 were engaged in the different useful occupations, viz.: 2,111 in agriculture, 2,674 in professional and personal services, 1,233 in trade and transportation, and 8,030 in mining, mechanical trades and manufactures.

Minerals and Mining.—With regard to mineral resources, Mont. is one of the most favored sections of the Union. Veins of gold, silver, copper, lead and coal have been discovered in nearly all the explored mountain districts. Placer mines are numerous, and are found even near the summits of the mountains. The mines on Cedar Cr. are believed to be rich enough to furnish profitable employment to from 5,000 to 10,000 miners. The territory has over 700 mls. of ditches, constructed at a cost of $3,500,000. It is estimated that $100,000,000 of gold have been taken from the mines since 1863, and that the yield in 1870 amounted to $12,000,000. Silver is found in the Flint Cr. Valley, in the Belt Mts., near Helena, and other localities. Near Fort Howie and Bannock City are productive copper mines. Bituminous coal has been discovered along Dearborn and Bighole Rs., and in the Mullen and Bozeman Passes.

Agriculture.—The valleys in the mountain region embrace large bodies of highly productive farm lands, which in their natural state are covered with nutritious grasses, and when properly cultivated and irrigated will certainly be a source of great wealth.

In 1870 there were 84,674 acres of improved land, 1,198 acres of woodland, and 53,665 acres of other unimproved land in the farms of the territory. The cash value of farms was $729,193, and of farm productions, including additions to stock, $1,676,660.

There were 177,535 bush. of spring wheat, 3,649 bush. of winter wheat, 1,141 bush. of rye, 320 bush. of Indian-corn, 149,367 bush. of oats, 85,756 bush. of barley, 91,477, bush. of Irish pot's, 600 lbs. of tobacco, 408,080 lbs. of butter and 18,727 tons of hay.

As a grazing region Mont. is believed to be unsurpassed. The grass is abundant and of good quality, and the winters are mild in the sheltered valleys of the mountain belt. "I know of no business," writes Governor B. F. Potts, "which offers such solid inducements as stock raising in Mont. Men long engaged in the business assure me that the profits exceed four per cent. a month, thus doubling the capital in two years."

The live stock had a value of $1,818,693, and included 5,289 horses, 475 mules and asses, 12,432 milch cows, 1,761 working oxen, 22,545 other cattle, 2,024 sheep, and 2,599 swine.

The Manufactures of Mont. are thus far neither extensive nor varied, the settlements being of too recent a date. But a beginning has been made, and, with coal and water-power in abundance, Mont. will, at no distant day, occupy a prominent place in this branch of industry. In 1870 there were 201 manufacturing establishments, employing 701 operatives, and $1,794,300 of capital, and turning out products of $2,494,511 in value. Flour and meal was produced in eight mills to the value of $480,859; malt liquor of $112,998; sawed lumber of $430,957, and milled quartz of $801,873.

Mont. has several large navigable streams,

as the Missouri and Yellow Stone Rs.; but no railroads have yet been constructed. The Northern Pacific R. R. will intersect the territory from E. to W., and must have invaluable influence upon the development of its great natural resources. This great national route, commencing at Duluth, Minn., will be in operation by the end of the year 1873 to the Missouri R. Crossing western Dakota it will strike the Yellow Stone R. at the mouth of the Powder R., and then follow the Yellow Stone R. to western Mont., where it will surmount the Belt Mts. by Bozeman's Pass. After crossing the productive valleys of the Gallatin, Madison and Jefferson Rs., it will ascend the latter and Divide Cr., run through Deer Lodge Pass, and descend the valleys of Deer Lodge Cr., Hell Gate R. and Clark's Fork of the Columbia R., to Lake Pend d'Oreille in Idaho Ter.

Wealth, Taxation and Debt.—The real and personal estate in Mont. was estimated in 1870 to the amount of $15,184,522. The assessed value was $9,943,411, including $2,728,128 for real estate and $7,215,283 for personal property. The total taxation was $198,527, of which $38,131 was state taxes, $157,396 county taxes and $3,000 town and city taxes. The city, town and county indebtedness amounted to $278,719. The territory had no debt.

Education.—According to the census Mont. had, in 1870, 45 public schools, with 46 teachers and 1,544 pupils; one academy, with eight teachers and 50 pupils, and eight other schools, with 11 teachers and 151 pupils. The six newspapers published in the territory had a circulation of 12,200.

Government.—The government consists of a Governor, Secretary of State, District Attorney, Surveyor-General, Superintendent of Indian Affairs, United States Commissioner and a Treasurer. These territorial officers are appointed by the President of the United States by and with the consent of the Senate.

The Legislature comprises a Council of 12 members and a House of Representatives of 26 members. The U. S. District Court of Mont. is composed of one District Judge and two Associate Justices.

Mont. Ter. is divided into the following 11 counties: Beaver Head, Big Horn, Choteau, Dawson, Deer Lodge, Gallatin, Jefferson, Lewis and Clarke, Madison, Meagher and Missoula. Deer Lodge City is the capital of the territory, and Helena and Virginia City the largest cities.

Monterey, co. in Cal., S. W. part. Area nearly 4,000 sq. mls. Pop., 9,876; in 1860, 4,729. The Pacific Ocean forms the western boundary, the Monte Diablo Range the eastern, and the Pajaro R. the northern. This co. is traversed from N. W. to S. E. by two of the Coast Ranges; the Santa Lucia Mts. in the W. and the Gavillan Mts. near the center, which separate the beautiful valleys of the Salinas and the San Benito Rs. The best cultivated portion of the co. is the Pajaro Valley, which has been settled by Americans and Europeans. The Salinas Valley, containing also much fertile land, is almost wholly devoted to cattle and sheep grazing. Monterey B. lies in the N. W. part of the co., and near its southern extremity is the old town of Monterey, the co. seat. Agr. productions 1870: Wheat, 744,093 bush.; Indian-corn, 3,570 bush.; oats, 21,411 bush.; Irish pot's, 69,850 bush.; sweet pot's, 1,200 bush.; wool, 1,054,310 lbs.; butter, 423,385 lbs.; hay, 18,927 tons. Cash value of farms, $5,150,298. Total, estimated, value of all farm productions, including additions to stock, etc., $1,640,107. Value of manufactures, $197,505.

Montgomery, co. in Ala., central part. Area about 1,100 sq. mls. Pop., 43,704; in 1860, 35,904. The Alabama R. forms the N. W. boundary and receives Catawa Cr. and Manacks Cr. The southern part is drained by the head waters of the Patsaliga R. The surface is rolling and the soil fertile. The co. is intersected by the Montgomery & West Point R. R., the Alabama & Florida R. R. and the Alabama & Mississippi R. R., all of which center at Montgomery, the co. seat. Agr. productions in 1870: Wheat, 2,040 bush.; rye, 50 bush.; Indian-corn, 602,549 bush.; oats, 3,045 bush.; Irish pot's, 2,074 bush.; sweet pot's, 25,648 bush.; cotton, 25,517 bales; butter, 3,403 lbs. Cash value of farms, $3,793,895. Total, estimated, value of all farm productions, including additions to stock, etc., $3,403,382. Value of manufactures, $692,450.

***Montgomery,** city, co. seat of the above co. and capital of Ala., on the Alabama R., 351 mls. above Mobile, on the Mobile & Montgomery R. R. (186 mls. N. E. of Mobile), and on the Western Alabama R. R.; is the terminus of the Louisville, Nashville & Great Southern R. R. (490 mls. S. of Louisville), and of the Montgomery & Eufala R. R. It was first settled in 1817, and became the capital of the state in 1847. The streets are wide and regular. The most prominent building is the Capitol, which stands on a gently ascending hill, affording very beautiful views over the surrounding country.

It has considerable commerce and ships large quantities of cotton, mostly by steamers, to Mobile. In 1850 it had 8,728 inhabitants; in 1860, 8,843, and in 1870, 10,588, of whom 5,405 were white and 5,183 colored. Six newspapers are published in the city.

Montgomery, co. in Ark., W. part. Area about 1,000 sq. mls. Pop., 2,984; in 1860, 3,633. The surface is hilly and mostly over 1,200 feet above the sea level. It is traversed from W. to E. by the Brushy Fork of the Ouachita, or Washita, R. Mount Ida is the co. seat. Agr. productions in 1870: Wheat, 3,072 bush.; Indian-corn, 93,739 bush.; oats, 2,596 bush.; Irish pot's, 1,897 bush.; sweet pot's, 5,100 bush.; tobacco, 3,044 lbs.; cotton, 273 bales. Cash value of farms, $133,835. Total, estimated, value of all farm productions, including additions to stock, etc., $112,074. Value of manufactures, $5,909.

Montgomery, tn. in Monroe co., Ark. Pop., 1,123.

Montgomery, co. in Ga., central part. Area about 750 sq. mls. Pop., 3,586; in 1860, 2,997. The surface is level and the soil consists mostly of sand, which is but moderately productive. Oconee R. traverses the co. from N. to S. and joins the Altamaha R., which forms the southern boundary of the co. Pendleton's Cr. forms the north-western boundary and the Little Ocmulgee R. the south-western. Mount Vernon is the co. seat. Agr. productions in 1870: Rye, 25 ush.; Indian-corn, 70,405 bush.; oats, 15,852 bush.; sweet pot's, 11,437 bush.; cotton, 391 bales; butter, 10,261 lbs. Cash value of farms, $235,402. Total, estimated, value of all farm productions, including additions to stock, etc., $234,103.

Montgomery, co. in Ill., S. central part. Area, 705 sq. mls. Pop., 25,314; in 1860, 13,979. Its surface is rolling and largely consists of prairie land. The soil is fertile. The co. is drained by several small tributaries of the Kaskaskia R. The Indianapolis & St. Louis R. R. and the Toledo, Wabash & Western R. R. intersect it. Hillsborough is the co. seat. Agr. productions in 1870: Wheat, 744,950 bush.; rye, 3,256 bush.; Indian-corn, 1,527,898 bush.; oats, 668,424 bush.; Irish pot's, 66,515 bush.; sweet pot's, 3,976 bush.; butter, 276,734 lbs.; hay, 29,871 tons. Cash value of farms, $7,961,130. Total, estimated, value of all farm productions, including additions to stock, etc., $2,493,642. Value of manufactures, $1,641,842.

Montgomery, p. v. in Kane co., Ill., on the Ottawa, Oswego & Fox River Valley R. R. and the Chicago, Burlington & Quincy R. R., 41 mls. from Chicago.

Montgomery, tn. in Crawford co., Ill. Pop., 1,792.

Montgomery, tn. in Woodford co., Ill. Pop., 652.

Montgomery, co. in Ind., W. part. Area, 500 sq. mls. Pop., 23,764; in 1860, 20,888. The western part is broken and hilly; the eastern mostly level. The soil is uniformly rich and good. Timber is abundant. Sugar Cr. is the largest stream. The Indianapolis, Bloomington & Western R. R. intersects the Louisville, New Albany & Chicago R. R. at Crawfordsville, the co. seat. Agr. productions in 1870: Wheat, 706,172 bush.; rye, 7,537 bush.; Indian-corn, 1,004,706 bush.; oats, 89,509 bush.; Irish pot's, 69,409 bush.; sweet pot's, 955 bush.; butter, 391,403 lbs.; hay, 18,104 tons. Cash value of farms, $14,480,217. Total, estimated, value of all farm productions, including additions to stock, etc., $2,370,176. Value of manufactures, $1,170,393.

Montgomery, tn. in Gibson co., Ind. Pop., 3,121.

Montgomery, tn. in Jennings co., Ind. Pop., 1,326.

Montgomery, co. in Iowa, S. W. part. Area, 432 sq. mls. Pop., 5,934; in 1860, 1,256. The surface is rolling and the soil fertile. It is drained by affluents of the Missouri R. and is intersected by the Burlington & Missouri River R. R. Red Oak is the co. seat. Agr. productions in 1870: Wheat, 59,712 bush.; rye, 146 bush.; Indian-corn, 323,168 bush.; oats, 37,393 bush.; Irish pot's, 23,991 bush.; sweet pot's, 90 bush.; wool, 18,492 lbs.; butter, 87,220 lbs.; hay, 9,079 tons. Cash value of farms, $1,373,765. Total, estimated, value of all farm productions, including additions to stock, etc., $476,059. Value of manufactures, $102,954.

Montgomery, tn. in Owen co., Ind. Pop., 808.

Montgomery, co. in Kans., S. E. part. Area, 450 sq. mls. Pop., 7,564. It borders in the S. on Ind. Ter. Verdigris R. flows through it

from N. to S. and receives Elk R. and many other small affluents. The surface is rolling and consists of prairies; the soil is productive. The Leavenworth, Lawrence & Galveston R. R. passes through the co. from N. to S. Independence is the co. seat. Agr. productions in 1870: Wheat, 881 bush.; rye, 25 bush.; Indian-corn, 12,665 bush.; oats, 753 bush.; Irish pot's, 1,443 bush.; sweet pot's, 29 bush.; hay, 1,555 tons. Cash value of farms, $821,800. Total, estimated, value of all farm productions, including additions to stock, etc., $288,159. Value of manufactures, $131,925.

Montgomery, co. in Ky., N. E. central part. Area, 395 sq. mls. Pop., 7,557; in 1860, 7,859. The surface is hilly, the soil of the valleys very fertile, and the uplands are well adapted to grazing. It is drained by tributaries of the Kentucky R. Mount Sterling is the co. seat. Agr. productions in 1870: Wheat, 31,651 bush.; rye, 16,259 bush.; Indian-corn, 542,710 bush.; oats, 43,945 bush.; Irish pot's, 16,285 bush.; sweet pot's, 1,558 bush.; butter, 87,244 lbs.; hay, 2,087 tons. Cash value of farms, $5,038,849. Total, estimated, value of all farm productions, including additions to stock, etc., $447,118. Value of manufactures, $191,393.
